INDEX

These are the components of the 'fotonic Quanta Theory' v1.0 itself.

ΦQ PROLOGUE:

ΦOTONIC QUANTA THEORY SYNOPSIS:

ΦQ TENETS:

POWER OF 1 PHOTON SUB-THEORY:

Q&A:

OUTRO:

GLOSSARY:

PHOTONIC RESEARCH:

PROLOGUE:

Welcome to this special report! This is 2nd in the trilogy of the Fotonic Beauty series which simultaneously stands alone as the foundation and engine for the heretical concept of Fotonic Beauty.

Although this ended up being LONGER than 'UT', I assured you that this is easy-to-consume fast 'reading-wise' (*well, until things hit profound but yeah*). Now....do you want to have more influence and response from YOUR visual media?

Are you ready to break the glass ceiling on the conditioned limits of Beauty itself?

Then get ready for an entire foundational overhaul for what I see as the inevitable evolution of professional image influence and beauty essence consulting itself...we're entering the realm of conscious competence with charisma!

The 'Theory of Φ otonic Quanta' presented here is more of a specialized theory off of my recent 'Unified Theory' itself in piecing together an infrastructure for the evolution of professional image into the practical realm beyond skin-deep mastery.

Really you could even call it (*along with Photonic Beauty*) the 'science of charisma'.

This power report book is also for you if you are into energy work, energy healing, vibrational medicine, consciousness and spirituality (especially if you ALSO value your own professional visual communication, more insights and more mastery). It's also for you if you've had unanswered questions around charisma, allure and have been fascinated by certain people and their visual influence and impact.

Now; if you've already read the first book in this trilogy ('Unified Theory'), my use of 'phi' may be very familiar.

I'm intentionally using the Greek 'phi' which replaces the 'ph' as an 'f' sound (it is also the Russian/Ukrainian 'F'). Phi (φ) in math and physics is known as 'the Golden Ratio' and signifies divine intelligence (like sacred geometry) encoded within many things in nature and physics. It's been referred to as a mathematical or architectural signature of beauty.

I will also freely refer to 'Photonic Quanta Theory' as 'Theory', 'The Theory', 'PhQ', ' Φ q', ' Φ Q' or ' φ Q' or ' φ q'. This here is the last time I will fully spell 'photonic' in its original spelling when referring to our concept. From here forward, I will use 'phi'. Also, I may not always use 'identifier quotations around these either'.

This has in part to do with someone already using the term 'photonic beauty' for a facial beauty product (whether trademarked or not); but because this is a universal concept, it is primarily to support differentiating between the 2 prime realities as we'll get into.

The website where you can get the latest versions of the Trilogy (UniΦied Theory, this report and PhB) is always fotonicbeauty.com

*Be informed that I will also refer to 'φotonic' as 'fotonic' or 'Φotonic' and 'Φotonic Beauty' as 'PhB', 'Φb', 'ΦB', 'φb', 'φB', φotonic Beauty or even 'fotonic beauty'. Uniphied Theory (φ with phi replacement for 'f') will also be referenced as 'UT', 'Uniphied Theory' or 'Uniφied Theory'. ALSO; **There will be many more visual examples of things in the upcoming 'PhB' report itself!***

I am intentionally and shamelessly inter-changing the spelling (+/- the quotations) to stretch your mind and break previous patterns.

Literally reading 'Phi'/'Φ' will help transcode while breaking conditioning and getting you one foot in the realm of a new quantum era of beauty that isn't constricted by the laws of our physical universe and conditioned 3D beauty standards.

We are now in the realm of beauty consciousness and all dimensions of practical radiance!

Although the PhB resource itself will delve deeply into, for now; you might be wondering el Rion; *"What IS photonic Beauty?"*

ΦB can simply be seen as like 'radio-active beauty' or 'photo-chemical' beauty; beauty that is so literally radiant that it EFFECTS others.

It's the concept of having RADIANT starlet-like epigenetic, multi-dimensional, activating and transformational levels of influence on others simply from your live vibrational and essenced light presence and visual image media.

[The work I do with Sexy Chi](#) already does this consulting and transformational work, yet 'The Theory' here actually empowers everything for further awareness, self-mastery, professional mastery and scalability.

Far more than 'looking good' with skin-deep beauty mastery (yet where people don't FEEL anything from you and keep scrolling); photonic Beauty is beauty that (from emanation) on its own transforms, engages, activates and influences.

It's the discovery and reclamation of 'inner beauty' but in a way that means everything to literal on-camera work because image itself is multi-dimensional light.

So I welcome you to this report! You might even be here AFTER reading the ϕ B report itself to get a deeper, core understanding of the foundation of beauty essence transformation. I'm Rion Kati and you can find out more about me on my main site of SexyChi.com/about.

As I mentioned previously on Knots Landing; Φ B with its foundation of PhQ could also be called the *'active science of charisma or allure'*.

The upcoming 'photonic Beauty' report itself will be the main, official 'big release' including representation of these 2 core components (*and it's been taking me all of summer 2023 to prepare it!*).

Φ Q here is being released as its own stand-alone theory. This report will touch upon core Theory as well as some Unified Theory + some of the context of Photonic Beauty itself.

ϕ B itself is founded upon the deeper principles of Unified Theory and ϕ Q that can serve as a 'best yet' Science of Charisma; like what's really behind everything and what's going on and why.

This is important considering that charisma coaching and consulting has effectively been limited thus far to physical behavioral modeling and psychological 'mindset' when really, we have to understand the ***LANGUAGE of Light and Radiation itself*** to truly master the final frontier of beauty and visual influence (*the kind that SELLS and says everything without even selling out*).

Fotonic Beauty is about TRUE beauty, power and visual influence (and it opens the door to more of it for yourself rather than just guessing or hoping something works out while mastering skin-deep appearance).

PhQ represented in this report here (v1.0) is intentionally shorter than 'UT' and 'PhB' yet requires at least some context (which I'll provide). I have the righteous rightfulness to update Φ q Theory itself for continual improvement purposes (as future version releases which would be available on fotonicbeauty.com).

Let me re-state this...

For TRUE visual mastery and to open the path for Φ otonic Beauty transformation, it's best to really understand what we're working with in what is arguably; the 'final frontier' of Human Beauty itself....EVERYTHING that is practically within human based visual media or 'image' that is beyond (and yet still with) the physical.

'Inner Beauty' as it is known is like a spiritual, wellness hiatus. It's too divergent from the REALITY of working photography, film and videography. We're talking the practical world of FULL visual communication beyond just the skin-deep mastery.

We're talking the practical working realm and mastery of essence and allure - and the SCIENCE of it; that which has previously been too esoteric (from a Beauty 1.0 lens). Now we can take that 'there's just something about him/her' and KNOW WHAT IT IS (and WHY it is).

As the founder, I/Rion in this run-on sentence propose that the *'Theory of φq'* sets the foundational infra-structure for the *φotonic evolution of the Beauty industry, professional image work in related industries, image consulting and Beauty influencers* as well as obvious relevance to the future of performance arts and entertainment with energetic & essence awareness, essence consulting and transformational mastery.

From my perspective; the entire Beauty industry as we have known it has been literally all about skin-deep beauty (support and mastery) and what could be called 'superficial appearance'.

Although I, myself (as a man) actually do value fashion, style and body transformation (more than you might even think)...it still

frustrated me that beauty professionals that made reference to 'allure' and 'essence' were still operating from a uni-dimensional, myopic understanding and foundation of skin-deep mastery.

To me; they couldn't ever properly DEFINE 'charisma' or 'allure'. They couldn't speak the 'language of light' and frequency because that's what we're really working with in visual media.

Note: Although Φ_q and Φ_B is mostly focused on the feminine concept of 'Beauty', you can just as readily replace it for the masculine concept of charisma. With that said; I'll still mostly be speaking to the feminine. *(I started work with men and the masculine and still do; however, most work has shifted to women and the feminine).*

Historically...

Most of the entirety of (human) beauty - anthropomorphically speaking (up until now) - has been associated with the physical (or cultural influence upon the physical) which has kept the value, focus and working beauty mastery as that of form and the skin-deep. Beauty is and has been practically focused with the visceral 'physical' appearance and presentation.

For eons, human Beauty (+ masculine looks) has remained literally skin-deep with vague references to allure, charisma, essence, higher aesthetic and vibes.

Even literally going 'beyond skin-deep' with plastic surgery; the overall value was and is still for physical, skin-deep aesthetics (which further proves my point). I often call this *'Beauty 1.0'*.

Nothing wrong with it per se, *but it's frankly limited.*

The behavioral modeling of charisma coaches (imo) is exactly akin to how pick-up artists tried to model 'natural men' around single women (and I would know because I used to be a top natural dating coach under a slightly different name and literally knew the men who were in the best-selling book 'The Game').

((BTW; everything we're talking about with your image (whether male or female) has EVERYTHING to do with your attraction itself including all things sexual and romantic b/c it's entwined with your consciousness and self-image itself)).

We all know that 'fake-acting' something can come across weird; esp. with such a concept of having TRUE authentic power and influence from your image, we can't be into backwards modeling or fake-acting anything as our 'hacks' or foundation itself.

Do you want to be coming across as a poser when you enter a room of true power and how discerning THOSE people are?

True Beauty; true essence INHERENTLY has incredible influence, social status and value. People FEEL IT. PhQ here will go into WHY.

A great reference point for this IS award-winning actors because they BECOME the character so much so IN ESSENCE and EMBODIMENT that it becomes believable....acting becomes BEING.

Fake acting is posing (or putting on a mask) and people are going to see through that if you're a social media influencer. So we're not talking about a quick superficial gloss over here; we're talking about true inner beauty and confidence.

I've said it often; do you want to just *LOOK like a Goddess* (or follow fads) or do you want to *BE a goddess* with Her authentic embodiment, truth and presence?

That's the difference and today's consumers are becoming sharper to really know who has true power (and it's in your vibe and light-truth which is what fonic beauty is all about).

With photonic Beauty we're talking about the POWER and influence of beauty (including archetypal beauty mastery) and how to have more of it for yourself.

It's also worth mentioning that the concept of make-up can often create a split sense of identity and insecurity in women who may feel 'on', valued, validated and worthy (*although insecure in other ways*) as compared to when they're not wearing make-up....yet they can control how, who and when people see them as 'made-up' (which could still be aligned with her fuller expression).

I would think your value is maximizing everything and actually BEING that soul-self expressed version of your inner beauty, soul beauty on camera and in social interactions.

What we're covering with PhB unifies the elusive concept of 'inner beauty' with the PRACTICALITY of professional image; it's not about personality, talent or 'character', it's about **what LIGHT RADIATION shows up ON-CAMERA** 'in the light' (so to speak)...high value things that cannot be faked.

We'll get into it, but the same thing stands with the EMF spectrum of radiation; frequencies exist that aren't literally in the visible spectrum but are still there.

Now;

Since Beauty 1.0 (*representing the entire multi-billion dollar a year industry*) didn't ever really have a proper framework and understanding for conscious competence with allure transformation; the best attempts were understandably with things like vague wellness tips, diet advice, meditation advice or supplementary astrology horoscope readings (*all of which at the very, very best would only indirectly help on camera*).

Fortunately, there's a LOT of professional support out there to help you literally look your 'extrinsic' best with what I call 'Beauty 1.0'; all of which is sourced in the physical and topographical universe (however); and yet still, the camera picks up ALL...it picks up FAR MORE information that IS being communicated to your fans, prospects and soul clients than you can imagine (*and they're starting to read into this and know your truth or if you're a poser*).

It's easy to get lost in that highly developed (and yet superficial) world as there are always new skin care products, style trends, fads and their advertisements, etc. to keep you distracted from anything deeper that may actually also (and always) have everything to do with your professional image (*and maximizing your INFLUENCE and response from it*).

*It requires different tools and different awareness;
different competencies.*

The simple truth of it is that image (literally photography) itself; *is multi-dimensional vibration and photonic (+ ϕ otonic) light information*; not merely uni-dimensional or physical skin light reflection of photons. The EMF spectrum itself is MOSTLY invisible light as well.

This is such a fundamental concept; however, we won't go much into 'the truth of image' here for brevity's sake.

PhB v1.0 itself will delve more into fuller immersive coverage.

There's nothing wrong with B1.0 + it is BIG industry; yet at this point, you have probably realized that the obsessive focus on the literal skin-deep feels constrictive; even dis-connective to your soul. Plus, there's always new products within the same paradigm and that nothing ever seems really 'breakthrough'.

You know;

Yet Another celebrity with a tequila brand, another instagram based beauty influencer starting their own line of Beauty 1.0 products.

Nothing wrong with it; it is what it is (and I'm officially pro-capitalist)...I'm just saying it's still LIMITED. *There's still the glass ceiling.*

You could say that the Beauty industry is very shallow and yet very wide and as we know inter-twines with the Fashion, Fitness, Music and Movie industries.

Maybe you got fed up with it and have even disconnected FROM maximizing your extrinsic beauty potential in favor of something more spiritual or more about 'inner beauty'.

Maybe you may have even hoped that beauty truly is more than skin deep *(and not just in a vague wellness-seeking way that disconnects from the daily relevance of your professional image and social media influence).*

If so; you're in the right spot. I'd dare say that this is the tip of the spear!

If you sense that image itself is probably carrying MORE information about your communication than just the physical skin reflection and highlighting of usable light...

If you WANT to believe in the concept of essences...If you want to merge 'inner beauty' with outer beauty 'practically' for MASSIVE INCREASES IN fan, prospect and client response, keep reading.

And if you want to talk about deep Goddess Beauty and presence, healing levels of transformational beauty and starlet-like 'it factor' allure that magically communicates ALL of your true multi-dimensional soul self professionally in heart, sex and soul-stirring image and performance, good!

If you KNOW and feel that visual communication INFLUENCE is more than just about 'talent', 'effort', 'talking', 'copywriting', 'over-functioning to stand out in a crowded marketplace', just 'looking good' or following the next style trend; you're in the right place to set a template for true and holistic beauty and visual mastery....really something that *IS feminine-centric who can accomplish more by doing less and BEING MORE.*

After all; Beauty itself is PRIMORDIAL to attracting the masculine principle (including provision and resources, love, etc.). It is divinely and inherently VALUABLE and cherished. It sub-communicates

spiritual value to the masculine spirit all related with Communion principle and man's desire for *The Holy Grail*.

Fotonic Beauty and the increased visual influence it brings (from fuller expression) is what you most likely desire. You're set to become someone ready to dramatically increase the engagement and response from your fans, prospects, customers or clients!

After all; photonic quanta IS the life-giving 'je ne sais quois' that starlets and idols give out or EMANATE to their fanbase.

Fotonic Quanta is PALPABLE and instigates RESPONSE.

Ideally; we have to have a deeper understanding and foundation of everything else that is part of professional image ASIDE FROM the skin-deep mastery component for TRUE and holistic Beauty, image and self-expression mastery. This helps you understand what's actually going on; shining the light of truth awareness so to speak - on it.

Is it just about look good or having people FEEL the radiant truth-substance of your alchemical Beauty itself? (*That which most consumers don't actually have*).

I think you may be pleased to know that Beauty (as PhQ believes) has ALWAYS been associated with spirituality and that these are not separate concepts; and that really, the world has just been viewing and valuing the lower truth, the lower form of Beauty itself up until now.

Really and now; *beauty is its own path of spiritual and feminine awakening of consciousness and truly so* (with practical results in how others respond to you).

What's beyond social power and status? DIVINE power and status; TRUE power and beauty that is immortal. *That's our realm now professionally, k?*

We have to take a very different and conscious approach. No longer can we rely upon vague, insecure and incompetent definitions or references to the other 'intangible' aspects of beauty while still instantly returning back to and only focusing on skin-deep mastery tips, techniques, the next hot fashion house designer or the next fair-trade skin cream product (*no matter where it's sourced from or what its organic ingredients are*).

It's time for conscious competence in the realm of 'allure' and 'essence' (that still fully respects B1.0 and integrates for what it is).

Remember, I've already been doing allure transformation and have been for years now with hundreds of paying clients (and [plenty o' testimonials](#));...this is the deeper awareness and foundation itself for true scalability (*which obviously connects and REUNIFIES with practical spirituality and literally consciousness itself*).

Fortunately, my past clients were so captivated and super-sharp being AHEAD of the curve well before this ever became popular to help me build the allure makeover foundation itself and I am so grateful for them. This will help bring past clients more awareness of what we're actually doing as well; and b/c they've already been INTO fonic beauty 'ahead of the curve' and have been seeing the results!

A lot of clients will have men start going (good) crazy around them including sending them money, wanting to fly them places, re-ignition OF chemistry in relationships, REDEMPTION of relationship, attracting soul level mates, etc.

With that said;

It's best to consciously understand what the higher truth of Beauty is and WHERE it is SOURCED because it does literally have everything to do with professional image; every single photo, instagram, video of you in the past, present and ghost of Christmas future. Ready for it?!

This is what Fotonic Quanta Theory and PhB is about.

This understanding really only upgrades and strengthens the already leading and working platform of allure transformation in the world (Sexy Chi).

[Sexy Chi itself](#) is a fusion of Eastern and Western values (including transformational energy medicine).

What used to be transactional in your image can now become transformational with Fotonic Beauty and your own transmutation of beauty consciousness.

Even my concept of 'beauty priestessing' could become a thing because PhB brings in that level of radiant influence.

Although Sexy Chi has taken the pioneering 'market maven' role; there is so much demand out there for allure transformation and breakthrough evolution that it seems there will inevitably be great demand and room for other competent essence makeover specialists as well.

After great investment, experience and time (including 21,000 hours of active time which could be cross-qualified as reading top

performance artists allure); I don't mind setting universal industry standards; esp. Because I wasn't finding the answers elsewhere.

I've also been establishing things in the West for the influx of Muse codes which is connected to all of this (Beauty, Grail work and consciousness ascension). You can read more on [my FB wall](#) or [blog](#) (and K-pop and ITS beauty has a lot to do with it all).

Fotonic Beauty is a calling for reclamation of your own lost or fractured feminine essences...and boundless room to explore greater beauty and immortality.

My intention for PhQ and the *(smoking hot, future Muse Beauty Light Codes herewithin)* is for it to BE the missing power piece that evolves the understanding and mastery of Beauty moving forward as a template for all essence and allure consulting. PhQ can be used to empower allure and essence awareness and mastery moving forward.

Combined with some other universalized Essence tools (in my/Rion's arsenal like the 'Allure Ratio'); PhQ can also be used a scientific tool OF and for professional beauty that can explain and analyze any and all past visual media of humans *(this actually is very simple and profound although quite advanced and powerful as you will explore more with fotonic Beauty itself)*.

So, I've been on a path of seeking the deeper truth of charisma; but it's mostly all because I am in service to Muse Herself (this is really all of Her work and why it's so practically entwined with the literal Divine Feminine).

No longer does Beauty have to professionally remain skin-deep because beauty IS more than skin-deep and you are more than 1 dimensional. Image after all (the higher truth of it) is multi-dimensional light.

Note: All Muse Priestess source lineage graduates (trained by I/Rion) are able to do this type of image consulting and (φotonic) allure transformation itself. We can always just 'do the work' in actual sessions if you want to skip all of this; it's just that I'm meant to fully deliver 'Uniφied Theory', 'φq' and 'φB' properly in these formats.

Now...

Before we get into core 'φq Theory' itself, I want to do a basic introduction (or re-connect) with my Uniφied Theory itself. This provides us with a deeper foundation and sets us in the right ballpark in order to do some anticipatory, metaphorical homeruns for your beauty consciousness and quantum makeover possibilities. Please keep an open mind from here and revisit for contemplation as we get into the Theory itself.

Unified Theory proposes that there are simply 2 pre-dominant realities;

1. The astro-bio physical reality

&

2. The multi-dimensional spiritual sentient reality

Here; I'll simply excerpt from Unified Theory 1.0 itself:

Unified Theory Official Overview (v1.0):

In attempting to answer or cover all possible unanswerable questions and phenomena known to scientific perspective in making sense of reality (and because it was sourced in my frustration at not being able to properly 'merge' Astro-Bio Reality or 'known Science' into a working model of the human aura)...

'UT' centers around the simple and yet profound concept that there are 2 pre-dominant 'Meta' realities or templates that co-exist (and must exist) in tandem:

1. The Astrological, Bio-Physical 'scientifically known' template of elemental, molecular, natural and biological life on earth within the construct of the physical universe (which includes particle physics and ie. solar sun centric-quanta)

While the other reality is;

2. That there is a Multi-Dimensional Intelligent Sentience of God-Consciousness as a Singularity 'Spirit' Matrix through which all sentient, organic and living things are connected since the Dawn of the first sentient life on earth

UT proposes that both are energetic, vibrational realities; yet are *sourced differently in terms of 'energy' itself.*

UT believes that humans are actually higher dimensional souls embodied in a physical vessel; yet carry multi-dimensional layers of a light-bodied aura that (in templatization and thereby potentially) connects them to all dimensions (or 'higher frequencies of consciousness').

UT believes that consciousness and (most all organic life effectively) exists as multi-dimensional sentience in spite of individualized bio-

physical mortality. UT views Omniscience as an aspect of the Singularity at the monadic or unified level.

Ok, so that's a quick overview....UT itself (v1.0) is a 180 page stand-alone book that you can read (available on fotonicbeauty.com) if you want for an even deeper exploratory foundation.

UT also proposes 766+ psychic and spiritual phenomenon that are effectively unanswerable by A-B Reality scientists in support of the concept of 'Oneness' and its multi-dimensional sentience itself *(including heaven, hell, the holy ghost, speaking in tongues, angels, voodoo, curses, psychic powers, astral travel, religions as different fractals, etc.)*.

Although this extended side concept of multi-dimensional sentience or 'oneness' may not initially seem relevant to beauty; I assure you that it actually has EVERYTHING to do with it beyond the skin-deep and that which PhQ will deliver on shortly here.

Because remember; we're going to a deeper foundational truth and understanding so that we can have true liberated boundlessness with beauty mastery itself.

(And if we don't ever do such a pattern-interrupt task; then we're likely to be like; "Hey look there's another skin serum ad!...remaining

caught in the constrictive consumer dynamic and its conditioning itself)

Be mindful that UT does delve more into the spiritual, evolutionary and consciousness side of things, whereas PhQ and PhB are more Beauty and pro-image specific.

So, Unified Theory basically says there are 2 pre-dominant models of reality; non-sentient and sentient (*and that these are inter-twined and, in many ways infused with each other*).

Elemental, physical earth provides the supportive structure for incarnation. Biological creatures are sourced in both realities with mammals (a clear example) being a fusion of both realities. Humans are the best examples with full potential spectrum access to the quantum spirit-realm of multi-dimensional sentience itself.

UT suggests that many humans are only used to valuing the physical dimension of reality with scientific reasoning and lack of higher dimensional experience.

A question is; if you only believe that humans are physical beings, then how could we actually have any allure and radiate more than 2 inches of bio-photons? This alone may cue you in to deeper research that UT provides. (You don't even have to be religious btw).

Still with me? Good, because I'm revealing it in a way that will actually support your breakthroughs to think a little bit instead of just going right to the direct reveal itself. *I'm going to flank ambush your conditioned mind next, ok? ;)*

Key to UT (and PhQ coming right up) is the take-away that ENERGY ITSELF IS SOURCED DIFFERENTLY based on the 2 sources itself; the sun and the human aura. This cues us in also to why there have been so many unanswered questions and dead-ends thus far...we simply don't have the SAME energetic properties spiritually as the non-sentient world of energy.

Now....I'm coming in from that flank so to warm us up for PhQ itself (which is like an engine for allure and charisma mastery)....***ever heard of chi?***

Well...

UT proposes that chi doesn't actually exist in the mechanical universe on its own without sentience and that it requires a connection point FROM sentience (ie. a tai chi practitioner) in order to feel and interact between the two realities interpretively.

In other words; (as most physicists would agree) there is no earth or water elemental 'chi'; simply biological forces UNTIL sentience comes into the equation to interact with its spirit-transference qualities.

Similarly; UT also proposes that crystals as minerals (with near/perfect molecular order) are 1Dimensional and their higher dimensional support properties only activate or are accessible around someone WITH higher dimensional sentience built-in (ie. a human).

UT proposes that A-B Science cannot yet measure chi because it isn't found in 'base reality' without sentience itself and that they don't have the proper tools to measure it (ironically, I/Rion do have effective measurement tools).

To boil it down and start focusing us towards a more relevant foundation towards Beauty with PhQ;

UT proposes that physical universe 'energy' is the platform of quantum and physical mechanics of the non-sentient reality.

It's the world of quarks, leptons, atoms, elements, molecules, matter, kinetic-mechanics (and studio lighting) itself. It's also a place-holder for all biological evolution in all species (although UT proposes that it

is actively a fusion with the Divine Intelligent Singularity aka non-religious 'God').

UT proposes that the astro bio-physical 'energetic' reality is also the evolutionary biological aspect of being human which allows us to incarnate into vessels to 'experience' and grow.

UT proposes that we (as human) are both fully primal and yet also (fully) divine (akin to demigods).

UT proposes that spirituality is awakening to that greater truth and connection to Spirit source from which we are all connected.

UT proposes that we absolutely ARE more than merely biological creatures and; in a sense (akin to); demi-gods because of our mortal and immortal nature. This is what allows you to have more than physical-kinetic influence in magical ways.

So, UT goes deeper if you want to immerse in it when you're ready; but for PhQ here and now however, let's proceed with The Theory of Photonic Quanta itself!

Chi is a center-piece so keep you mind and eyes open for these codes.

This is where *we will speak more directly in the light language of Beauty itself* (and as relevant to photonic Beauty values).

After all; UT stands on its own and delves really into the depths with consciousness and spirituality research. PhQ is more specific to what you're probably valuing here, k?

You'll soon see how it all connects (and btw if you want to share any feedback or testimonial with me, let me know!)

THEORY OF Φ OTONIC QUANTA
SYNOPSIS

Short-Form (Lilu) Version of The Theory of Φ otonic Quanta
(v1.0)

I'd say that I would *liberally* use this as the official Theory short-form definition; however, the word 'liberal' has been hijacked and corrupted...therefore, I'll just cross-purpose this as a warm-up definition.

(Version 1.0 has to get out there so, I'll shoot first with a tracer round and calibrate later).

Φ Q Theory (defined) proposes that;

" Φ otonic Quanta is literally the vibrational and light frequency substance (aka 'essences') as human auric radiation with and through the multi-dimensional spirit-plasma platform of chi"

More insights;

Charisma and Allure are the actual channels of embodiment and expression of what?

OF Photonic Quanta - which are of the palpable spirit-matter chi essences and their different, signature and property encoded frequencies that all humans have full potential spectrum connection and access to and for embodiment and expression through the auric-chakric light body.

Another short-form way to say it is that;

"photonic Quanta are the light substance radiative plasmic-sentient matter particles and ray-waves OF beauty essences" -
Rion Kati, 2023

Fotonic Quanta (batched essences of signature essence particles/waves) is the substance of what allows you to literally organically radiate or shine 'like a star' or starlet with sentience-based frequencies that influence others.

This isn't anything new btw; we're just becoming more aware of the truth of 'what is' (thus it stands for all of human history before us)...we're just finally now decoding it into our awareness with higher truth.

The more photonic quanta you have (of a singular or mix of liquid crystal chi essences sourced in quantum sentience), generally; the more beauty influence or embodied power you have both in presence and in visual media influence.

Consumer citizens usually don't have as much of this chi-based power embodied or expressed (we'll go into this more in PhB).

ϕq proposes that stars and starlets as well as enlightened gurus have more POWER and influence because of the radiation of their greater quantities and higher frequencies (in light-bodied embodiment and expression) of spirit-matter chi essences.

Now after that warm-up; If I instead had to put ϕQ in one 'catch-all' big run-on sentence for version 1.0 (v1.0), this is it:

Standard Theory of Photonic Quanta (v1.0):

"Beyond the 'visible' spectrum of photonic Light capturing any physical beauty as we know it; humans (as both primal and divine) are also able to emit higher frequency beauty essences as an alchemical language of vibrational and photonic Light-Truth matter which is transmitted in Presence from and through chakric-auric

spirit-plasma (also known as 'chi') of the soul's light-body; that which is sourced in the Quantum Singularity of Multi-Dimensional Sentience.

The (Beauty) Essences ARE fonic quanta or light truth-vibration signatures sourced in consciousness of Spirit.

phonic Quanta is literally the vibrational and light emanation of powerful yet subtle and tangible frequencies (including elemental, archetypal and siddhic beauty essences) with and through the human aura as radiant emanation 'substance' of spirit-plasma chi.”

Now...remember that flank mind-attack maneuver for your benefit?

Energies are sourced in different realities; 'energy' as physics and quantum physics knows it sourced in the astro-bio physical reality and 'chi' which is sourced in multi-dimensional sentience
(hadouken!)

This is why science has had a hard time measuring 'chi' because they don't accept its premise *(that which UT is the metaphorical naval legal counsel building the case for scientists who 'can't handle the truth')*.

Now;

You can share either quoted version (v1.0) as attributed to Rion's Theory of Photonic Quanta (aka 'photonic quanta'). Future updates will be on Photonicbeauty.com and surely, I will continue honing the definitions and translatability through time b/c the codes were coming in raw and hot on this.

The rest of this power report/book will go into some further aspects of the Theory itself.

'photonic quanta' is a universalized term FOR the collective and although I am the 'discoverer' per se; thusly, I cannot copyright it on its own (however the Theory itself represented in this report is copyrighted so you cannot claim it as your own).

If you are going to publicly refer to 'photonic quanta' or the 'theory'; I'd ask to please be respectful of the source interpreter (Rion) and its meaning which is meant to be FOR the collective and as universalized and truthful as possible.

Although I don't 'own' the concept per se; we want the definition and meaning (with the 'phi' spelling) to be preserved in integrity AS a universalized term and concept. You are welcome to take it to discuss in consciousness or spiritual circles online, etc.

Let me talk a little bit more about chi before we go into the tenets, because my frustration was sourced in not being able to fit 'energy'

and even quantum physics INTO a working model of the aura...even ['Vibrational Medicine'](#) helped but wasn't giving me the deeper answers.

The foundation of PhQ Theory and ϕ B centers on the platform and concept of 'chi' as real which goes back to known ancient wisdom and my 'Unified Theory' itself.

Not only do I know it's real; I've been initiated or activated into a famous kung fu master's secret chi kung lineage as 4th generation discipline; and, I've been activated at the source of chi kung/qi gong itself in Wudang personally by a different Grandmaster (and then later trained/apprenticed with him privately in California). I'm also Usui Reiki Master (chi/qi/ki).

ϕ q (as with 'UT') obviously proposes the auric light body and chakras are real as per millennia of spiritual, practical wisdom (and things like energy medicine, vibrational medicine, energy therapy, etc.).

Because UT and PhQ PRACTICALLY proposes and attests that 'chi' (aka 'qi', 'prana', 'ki', 'orgone') IS tangibly real; the concept of PhQ centers around that which you can actually FEEL, be influenced by and not merely imagine. This is important if you are thinking it's too 'woo-woo'.

UT and PhQ propose that chi itself is empirically verifiable (outside of a scientific lens) whether or not you have experienced it directly or 'consciously'.

NOTE: When I use ' φ Q', 'PhQ', ' φ q', ' Φ Q' or ' Φ q' from here forward, know that I'm obviously referring to my/the 'Theory of φ otonic Quanta' itself.

φ q also proposes that these essences (to whatever degree OF embodiment and expression they have) are ALWAYS showing up (or able to show up) in human visual media (barring that many consumer citizens mostly have conditioning and aren't always able to access purer φ otonic essences and their star-like radiation). All humans have the template for star and starlet radiation; just not all grow into it.

I, Rion can literally measure and gauge chakric and auric chi (from any person living or in the past) for verifiable qualities and distance. It is a skill that can be learned; to read (psychic) truth and details with objective interpretation.

With that said; in terms of being able to 'feel' or 'sense', granted the qualification is that which is there whether YOU or Western scientists can feel or measure it with THEIR tools this minute; because you or they may NOT literally be able to feel or measure it NOW and yet it's still there (just as the truth is that there IS higher dimensional vibrations captured and encoded in photographs beyond

the visible spectrum with humans as ultimately image is multi-dimensional waves, photons or photons).

Chi is already empirically known to millions of tai chi and qi gong practitioners worldwide as well as 'ki' to Reiki practitioners and acupuncturists for example.

It's still relatively new or a 'side-study' to connect with performance artists like dancers however; yet, this is where Sexy Chi and fonic beauty comes in to bridge it ALL together. Chi isn't just for vitality and wellness.

The standard (more accurately); is that the more sensitive and psychic-attuned version of yourself; the one that could be trained to perceive what already exists beyond the physical; THAT is the better reference point to tune in on, so please keep an open mind.

Yes; I can train anyone to LITERALLY sense and feel chi energy as well as the literal measurable distances of it from anyone's aura or chakras. If you're energetically sensitive or have been going through spiritual awakening, it becomes easier to sense these things.

The photonic quanta radiation OF chi like from a starlet's aura is literally WHY you can FEEL someone stirring you up from the inside just from their presence; like gamma rays, it's simply higher

frequency within the spectrum of spirit-sentience and more of it (stars can embody a LOT of chi or spirit-quanta; they may even specialize in more of it in a certain chakra).

It may take new training or conditioning to be aware of truth that exists outside of the 3rd dimension and the physical body conditioning and values (of Beauty and assessment) but trust me; it's already there, you'd be learning to shift your focus to other things.

That's where my celebrity energy readings on the blog can come in...to help you start sensing what already is in pro image that's been overlooked by Beauty 1.0 professionals.

Ok; let's go into the 2nd 'official' part of my Theory of Fotonic Quanta itself with the Tenets.

PHOTONIC QUANTA THEORY TENETS

Firstly; a quick update on where we are. We have the Core Theory Synopsis itself as previously presented and next we have the Core Tenets.

Other components in this report itself simply highlight some things around it). To warm up for the secondary core aspect of my 'Theory of photonic Quanta' itself and as we go into the tenets, I'll start with this proclamation 'on the record'.

The Theory of photonic Quanta declares that;

“Beauty itself is an alchemical language of light”

-Rion Kati

And in that understanding of the higher Truth of Beauty; it could be said that the world has only been focused on a uni-dimensional and lower truth of Beauty; the value of form and skin-deep mastery. We've merely been focused on the physical and 'visible' range of it but there is so much more truth-information with Beauty itself esp. b/c we are more than uni-dimensional ourselves.

Now...get ready to really get immersed into the future!

I want to keep the Core of the Theory condensed and simple, so I'm not even going to add additional thoughts to Φ Q Theory itself for version 1.0 here.

With that said; I intentionally wanted to just free-flow with the numerous tenets or aspects representing and stemming from the Theory itself because this is hardcore creative and the window is NOW to get these codes out to the collective.

And I also wanted you to just be immersed in the worldview of Fotonic Quanta Theory itself. (This is a DIVE).

Remember that The Theory of ϕ otonic Quanta is meant to stand on its own as its own release and highlighting the aspects that it does; we're not going into the entirety of the bigger picture expansion here, however - *you can contemplate and marinate with it all.*

Much of this report and its overall intention is to bridge us into ϕ otonic Beauty itself. This is what is *encoded for the evolution of beauty and social influencers who want far more INFLUENCE in their media.*

The secure platform PhQ sets up brings us into professional essence consulting and transformation; a realm where Inner Beauty isn't just this dis-connective generic wellness hiatus; but where fotonic beauty

IS the platform of true essence transformation and the final performance and production inclusive frontier of image and beauty mastery.

With that said, however; I may curate things in a future version, polish it, etc. (esp. if it would be officially 'published' as a book later).

As we delve into the core PhQ tenets; you might have some questions about all of this, so feel free to jot them down or journal.

Note; for V1.0 some of the tenets might seem similarly redundant, yet I'm giving myself liberty to just blitz it out core creatively. Also - with some of the tenets; many of the beliefs may come from 'Uniqied Theory', however will be replicated here for relevance.

These will help you to get a more extended and clearer picture (and may be updated in the future).

Without further ado;

Core Tenet Beliefs of PhQ:

*Φq (in accordance with Unified Theory) believes that 'energy' as Science knows it is the format of the astro-bio physical reality and that chi is the platform of energy sourced in the Singularity of Multi-Dimensional Sentience (reality).

*φq believes that spirit-matter chi is literally tangible and anyone can learn to not only be affected by it, but feel it, sense it and even learn to see and read the invisible frequencies because it is mixing with the visible body (which is also bio-energy and chi)

*φq in accordance with Unified Theory believes that energy is SOURCED in 2 primordial realities; the astro-bio physical and the sentient reality of spirit

*φq believes that humans, animals and all life live as a fusion of both realities and can emit bio-photonic light as per science and yet also (meta-physical) tangible spirit-spectrum radiation as well

*φq believes that invisible frequencies exist as radiation in both the EMF spectrum (non-sentient) and the chi spectrum (sentient) of energy yet we can learn to see and decode the 'signatures' of these chi essences

*Φq differentiates light from that which it is primarily sourced; the astro-bio physical reality as photonic (including human-made light sources) and light from sentience itself as ϕotonic

*ϕq believes the human aura exists and is spirit-plasmic chi because it is a soul inhabiting a biological body-vessel

*ϕq believes the soul+human aura emanates spirit-matter sourced light particles of different frequencies (similar to EMF parallel spectrum and how space plasma conducts the transmittive range of photonic solar quanta); however calls them ϕotons to differentiate their source

*ϕq believes that all essences must have signature qualities, properties and multi-band frequencies that can and will eventually be decoded and catalogued for professional image consulting (I've already made great strides in this area yet there is still more to catalogue and master for assessment)

*ϕq believes beyond chi kung and tai chi's value of elemental chi; that there are FAR more qualities of chi known as subtle but true
ESSENCES

*Φq believes the essences include vibrational and light chi radiation of elemental, soul signature, gift, siddhic and archetypal encoded qualities that are sentience-truth within the Singularity

*φq believes that many of the chi essences are universal or universalized and thus accessible because of quantum connection to the template of the soul+body format

*φq believes there are 124+ gift and siddhic essences as light and vibe truth signatures (referenced from the I Ching and Gene Keys wisdoms)

*φq believes that φotons have encoded properties and values related to consciousness itself which varies greatly from the more limited properties ie. of solar photonic light particles

*ΦQ believes that Western science hasn't been able to measure or qualify chi because it is simply sourced in the multi-dimensional sentient reality of spirit; yet obviously would emanate vibrationally at different frequencies as testament to that truth or quality of sentience

*φq states that essences are signature vibe and light truth multi-band (multi-band as capable of existing in different dimensions simultaneously) chi frequencies and there are easily over 200 of them

specifically for the world of professional essence consulting, assessment, transformation and mastery

*φq believes that essences are encoded, signature frequencies within the quantum spirit-matter spectrum of multi-dimensional sentience and would emanate as chi radiation in the auric platform of chi (through the soul+human light-body)

*φq believes the human soul spark-fractal of divinity itself must likely be a spirit-sentient form of chi (meta-physical yet tangible spirit-matter) thus enabling the multi-dimensional connected auric light body to expand

*φq (along with 'UT') believes the terrestrial earth has an aura and it is called the atmosphere; further supporting the cause of the physical body also having higher dimensional layers off of it

*ΦQ believes the aura has different layers generally corresponding to dimensions (or frequency levels) of sentience; etheric, astral, mental, causal, buddhic, atmic and monadic

*Φq believes that chi is more than just the spiritual life force in all living things, but that it is also a plasmic platform for radiation of different frequencies or essences of sentience as their vibrational and light truth

* φ q believes that humans are the only incarnates that have full potential spectrum access to the quantum reality of sentience itself (and its corresponding light-truth emanation) and that mammals are more limited in their capabilities

* φ q believes that humans with more powerful presence and visual influence (subtract any fame conditioning response), simply have more φ tonic quanta embodied and high frequency essences of it emanating from their plasmic aura

* φ q believes that many humans have sacrificed their personalized self to be in greater service to millions of people and that opens them up to receive more of the archetypal and sentient-quanta codes for embodiment to have greater influence from their presence

* Φ q believes that because spirit matter (chi) is sourced in multi-dimensional sentience (and although the physical body is elemental); our auric radiation is not a direct equation of energy as in the non-sentient physical universe and would carry its own properties encoded with consciousness

* Φ q believes that like space plasma, chi is plasmic meta-physical 'spirit' format of tangible matter that allows it (like space plasma) to

literally conduct and transmit different frequencies (*in this case of codes, truth, essences and radiation of their literal light Photons*)

*PhQ believes chi is plasmic for several reasons including that it's not gas, nor physical matter and 99%+ of the known universe is plasmic

*φq believes that chi is plasmic sentient 'life force' denoting PRESENCE of the Spirit of Life Singularity or God/Goddess itself and all frequencies possible therewithin

*φq believes that vibe and light truth signatures are encoded in image and must always be there in visual media of humans even if they exist outside of the physical-visible spectrum (yet we can learn to see and decode their signature-truths)

*φq believes that essences are the real divine beauty and power behind with and through it all; that then can inform other aspects like self-image, self-esteem, body language, confidence, etc. (ref; the archetypes)

*φq believes archetypal beauty is comprised of archetype essenced quanta and can be embodied by potentially any human to any amount following the e3 principle

*φq believes that most people have a limited, personalized egoic self-identity (and chakric-auric conditioning) that prevents them from (greater permission and) literally embodying more essenced beauty or power quanta and thereby have less influence on people from their image

*Φq believes that image itself is multi-dimensional light and vibrational information which may very well (and does) exist outside of the visible or physical photonic spectrum (just as gamma waves are invisible to the naked eye)

*PhQ believes that A-B Reality Light as EMF photonic radiation is primarily and primordially sourced from our solar system's sun while respecting that human auric chi radiation is an entirely different source of photonic emanation

*ΦQ believes generally along (with Western and known science) that photonic Light is vibrational radiation in the visible spectrum range of EMF + its higher frequencies of invisible radiation (in otw; φq wouldn't technically call 'radio waves' light)

*φq believes that photonic chi essence radiation from the human chakric-aura system has consciousness-property influence on others especially through the law of resonance (to have photonic,

transmutational power and influence on people's psyche, dna and energy bodies)

*φq believes in the law of resonance for alchemical attunement
(through light and vibrational influence)

*φq believes in the truth of transformational beauty because of fotonic radiation and the alchemy of it on other sentient fractals

*φq believes that the archetypes as God/Goddess-fractal aspects encoded in the quantum multi-dimensional sentience; would obviously have their own signature vibe and light-radiation qualities

*ΦQ Theory believes that the higher Truth of Beauty itself as an alchemical, φotonic spectrum of Light radiation with and through the human aura (and that we have been merely focused on the lower truth and visible spectrum of photonic reflections of the physical, biological body of form)

*φq believes that Light itself is sourced primordially in either reality (EMF radiation in A-B Reality or chi-sentient reality radiation) and that these are photonic and φotonic

*φq along with UT believes that both realities co-exist in fusion including in photography and videography; yet we should learn to differentiate and value their different properties and signatures

*φq believes that humans radiate chi (spirit-plasma) and chi essences from their soul based light body (aka 'chakric-auric' aura)

*φq believes that Beauty 1.0 is limited and constricted

*Φq believes that humans have full spectrum potential access to the entirety of chi radiation because of their quantum connection to God (aka the 'multi-dimensional Singularity of Sentience') and as God-spark fractals

*φq with Uniφied Theory believes that if humans were only biological like most scientists propose, we would only have 2 inches of weak bio-photons as far as light radiation (and thereby people wouldn't be able to literally FEEL our presence further than 2 inches away); thereby proving the concept of the aura and human-light radiation and influence itself

*φq believes that soul+humans like the sun can have photo-chemical (or 'φotonic') influence especially on other sentient beings (*and that it doesn't have to be the same kind of photonic or photo-chemical influence like photo-synthesis*)

*φq believes in something deeper than reading body language and that chi energy qualities (essence/quanta) can ALWAYS be read or decoded in ANY person at any time in history b/c of holographic encoding as well as visual recording

*φq believes in energy medicine, vibrational medicine and energy healing (really; all sourced in chi that then affects the physical body) as per many ancient wisdom traditions

*φq attests that a persons light truth and vibe truth can always be read from 'that moment' in image and that consumers are becoming more conscious of the higher dimensional information which is always encoded in image and presence

*φq believes that tomorrow's consumers are becoming more accurately psychic and intuitive to be able to read anyone's light and vibe truth or true power and beauty (aka divine qualities and status) also known as 'essences'

*φq believes that beauty is literally divine and encoded in the soul+body template to radiate sentience qualities of vibrational and light-truth (of Spirit and archetypal godliness, etc.); and that these frequencies may GREATLY vary

*φQ proposes that similar to photonic uses of light in laser surgery and medical technology; photonic radiation also has the applied power of Light to influence the chi-sentient consciousness and plasmic light-body of other people (see photonic beauty)

*PhQ proposes that God the Observer is with and through all of us and all living animals because of our quantum connection to the Spirit source of life itself and that we are able to witness God and Goddess fractal beauty within each other

*φq believes that higher dimensional beauty (as plasmic matter light and vibe-truth radiation) is always communicating

*φq believes that higher dimensional beauty essences are what to focus on for 'inner beauty' as to what matters 'on-camera'

*φq believes that beauty; higher dimensional light-essenced beauty of all essences; is entwined with consciousness itself (*aka 'beauty consciousness'*) and that beauty can be its own literal path of spiritual awakening

*φQ believes that beauty is a testament of your actual authentic consciousness and thereby is difficult to truly fake radiative beauty itself

Further Additional Tenet Beliefs of Φ q (*Tenets Continued*):

* φ q believes that humans are actually souls in a human vessel; thereby both primal and divine, mortal and (generally) immortal

* φ q testifies that because you can be affected across the room by FEELING someone's literal presence energetically as proof of our radiative nature and testament to the proof of concept of chi vibrational and light radiation itself

* φ q generally believes the astral layer is the more vibrational 'kinetic' layer of someone's influence from their auric-body

* φ q that many archetypes are multi-band in the sense they can exist simultaneously in someone's aura in multiple dimensions ie; causal, mental and astral

* φ q believes that because both realities co-exist; photons and φ otons co-exist for example in photographs in visual medium of humans

* φ q believes that φ otons are absolutely captured in visual media of human's light bodies and that φ otonic information is multi-

dimensionally captured in its holographic encoding (and stored in the quantum collective Akashic Records)

*φq says that humans have photonic nature of frequency and essence radiation of expression to draw from any and all potential archetypal and enlightened siddhic aspects of consciousness and their corresponding vibrational and light truth radiation (*just that most consumer citizens don't ever or effectively give themselves permission to nor know how to access it*)

A refresher:

*ΦQ believes that 'energy' (ie. in quantum physics, atomic, molecular, kinetic-physical, hydro-thermal energy, photonic, etc.) is the energy-truth format of the astro-bio physical or mechanical, non-sentient reality and that chi (including its photonic radiation) is the energy-truth spirit-plasma format of the Singularity of Multi-Dimensional Sentience

*φq believes there are similarities between both realities; just that the sentient source also has vibrational and light emanation but with more encoded qualities related to sentience itself

*φq believes that divine intelligent chi (as spirit-sentient energy) holds many other quantum properties and possibilities than simply

the same energetic properties known to molecular and atomic scientists

*φq proposes that Beauty 1.0 professionals have been focusing on the lower truth of Beauty and that skin-deep mastery should actually be secondary to soul-truth light communication and mastery

*φq believes there are over 100+ named spirit-plasma signature frequency multi-band essences that include elemental, siddhic, unique soul signature and archetypal essences (and that these are potentially accessible to all for beauty, allure and charisma transformation)

*φq accepts that there are other (distractive) qualities of consciousness in soul+humans as well as the sophisticated interactions with biological evolution such as mental intelligence, primal instincts, social adaptation, etc. yet φq and φB focuses especially on the radiative sentient, divine-nature of full-light spectrum radiance as image or Beauty itself from the aura rather than personality, character, verbal communication or talent itself when it comes to φotonic Beauty

*φq in Sacred or Divine Union and Grail Codes and that such reunified quanta including siddhic Communion and Grail Lover or God the Lover consciousness as pre-encoded can be embodied and

integrated into different layers of someone's auric consciousness and as a testament; their radiation itself

*PhQ believes you can generally gauge how reunified someone is and how beauty conscious they are in divinity by accurately reading the truth-testament signs of their essenced energy field itself and it will tell you most of the information (and that it speaks louder than words)

*φq believes that higher frequencies are always coming across and encoded in all visual media of humans beyond merely their 3rd dimensional (physical) photonic light reflection or representation (these signatures or essences can be learned to be verifiably read and consulted upon)

Again;

*φq believes that there are very specific beauty essences as frequencies of spirit quanta chi that exist to be radiated because of the quantum and historical nature of all-sentience; these include archetypal and siddhic frequencies of sentience emanating as φotonic light-truth

*φq and φB focuses on the radiative qualities of vibe and light-truth chi emanation in people because image itself whether film,

photography or video is always capturing higher dimensional data about someone and their truth

*φq believes that φotonic vibrational and light radiation in someone's image has special relevance and information to communicate and influencer other soul+humans (far beyond just physical body language communication)

*φq believes that body language when filtered through 3rd dimensional beauty can give some general accurate signs yet is a limited paradigm of information itself and that φotonic information tells us far more about someone; their soul truth, status, self-acceptance, power, true beauty, etc.

*Φq states that archetypes are God-fractal aspects that carry very powerful and influential spirit-quanta (aka 'chi') that potentially any person can access to embody and express through their own soul signature and auric design

*φq believes that consciousness itself would have vibrational and light emanation qualities as testament with and through the human aura (as 'essences'); these aren't merely thought constructs but instead of literal plasmic radiation qualities that communicate spiritually, psychically and non-consciously to others their truth

*φq believes that more consumers, fans, prospects and clients in the world are awakening to the truth of someone intuitively beyond just how they look superficially and they will be more psychic and accurate in making informed decisions if someone is who they say they are or just a poser looking like it

*φq believes that beauty essences as vibrational light-truth are testament to its congruent, specific divine quality and that lower truths like conditioning, ego, personality, egoic identity and personalization can distort and filter these purer essences from emanating

*φq believes that deconditioning of the chakric psyche is essential to embody more soul quanta (and thusly its φotonic emanation) as well as other beauty essences of signature spirit-matter quanta radiation in live presence and recorded in visual media

*φq believes that essence consulting and transformation work is incredibly practical, verifiable and already proven and operational

*φq believes that photography captures photons and could also be called φotography as it always captures and records encoded φotonic data; however it requires someone who can read or decode φotonic quanta data accurately rather than merely focusing on photonic

information of light in the visible range of the physical dimension (body)

*φq that humans are always communicating higher dimensional auric vibrational and light information from their image and presence (and that this constructs a true power and beauty dynamic and interface)

*φq believes that chi answers the unanswerable questions that Western scientists are unable to answer because there IS a sentient singularity of divine intelligence and that it simply isn't sourced in the biological universe alone

*φq believes that we have to respect the source of chi as the multi-dimensional sentient singularity and its quantum divine nature (which allows one to access immortal and enlightened beauty light radiation); and that we accept it would have other properties

*φq believes that humans can have epigenetic influence on other soul+humans because of their radiation alone and that transmutational or alchemical shifts of consciousness, being and presence are possible (true power and beauty) because of the embodiment of more and higher frequency photonic quanta as photonic beauty or charisma itself

*Φq believes that image itself as photographic can have photonic multi-dimensional activating and alchemical influence on someone longer after the image itself was taken because it is encoded with holographic true power and beauty itself as high frequency photonic essenced quanta

*φq believes that chi and the photonic frequencies (higher, essenced and more powerful) that can be transmitted within it; especially affects and can affect other humans because of their auric and divine sentient qualities as well; in other words epigenetic, soul to soul, spirit to spirit communication from chi radiation alone (a la photonic beauty)

*Φq believes that there are many different forms of energy known to science and yet that chi is sourced differently (practically with and through humans and mammals to be direct) while co-existing with bio-physical reality; it's the beyond bio-physical qualities that we must accept and get into for spiritual work and essence mastery (Unified Theory builds the case)

*φq believes that because chi is the platform of God-sentient energy (which includes qualities of unconditional love, veneration, enlightenment); it is the literal spectrum of Light beauty or photonic beauty itself that opens access to all the beauty essences and their alchemical qualities; none of which you would find 'in terrestrial nature'

*φq believes the vibrational radiative essences are unique to sentience and are qualities OF consciousness that only humans are able to fully express as incarnate (and some mammals to a lesser extent or limited range including emotional intelligence)

*φq and φotonic beauty differentiates between raw, radiative vibrations (as higher truth beauty) from a person's aura and other lower truth beauty factors like skin-care, make-up, hair-care or personality characteristics, talent, etc.

*φq also believes (because of Unified Theory) that any and all **vibrations of consciousness would have an equivalent radiation-truth of vibe (astral-kinetic) or light** beyond astral in frequency because of the light-body itself (*and that this truth-emanation must always generally be present via essence, embodiment and expression in someone's image*); this can include heaven and hell consciousness of infinite variety as it all exists within the spectrum of sentience

*φq believes that more consumers are awakening and becoming more psychically aware to read the truth of someone's overall energetic visual communication and that this is a critical factor in visual influence in humanity moving forward

*φq believes that AI is a massive distraction compared to the raw, organic, super-sentience of essence work and that AI can potentially corrupt and distort all kinds of things in many industries despite its apparent advantages; AI can disconnect humans even more from spirit and photonic beauty

*φq believes as there are different kinds of energies + frequencies in the EMF spectrum and forms of energies in the bio-physical reality; that there are also different frequencies and kinds of encoded energies (or 'essences') within the spirit-sentient source of radiation (chi) with their own sentient-properties that don't have a parallel in the world of physics and particle physics

*Φq agrees with popular science understanding of energy when it comes to the astro-bio physical universe, yet with 'UT' believes that humans are soul+humans (both higher dimensional sentient and physical) and that, because of their multi-dimensional sentience - they are sourced in an entirely different frequency spectrum of light that isn't sourced the same as energy in the mechanical universe

*φq believes that because humans are also physical, physical and auric bodied (soul+)humans emit both A-B Reality photons as bio-photons and would also emit light and vibrational radiation that is sourced in spirit-sentience itself (as photonic emission)

*φq believes in archetypal power, codes, access, embodiment and archetypal beauty - practically and that anyone could potentially have any amount of archetypal beauty or power because of the quantum divine nature and connection of sentience itself

*φq Theory proposes that higher frequencies essences have greater ascensionary transmutational power and influence via the law of resonance whereas lower frequency essences may have relatively greater amplitude and great influence but less awakening power (ie. a tyrant gang member with strong vibe conforming people to his control-vibe state vs. a liberatory and humbling Kingly buddhic radiation)

*φq proposes that signature light essences can absolutely be assessed and 'read' accurately for essence image consulting and transformation, although it requires a shift in awareness away from the focus on skin-deep form mastery

*PhQ believes that chi (aka 'prana', 'orgone' or 'ki') is the tangible 'spirit matter' that is the platform for all possible frequencies of sentience or consciousness and their emanation (similar to space plasma's conductivity)

*Φq believes (along with UT) that popular science and physics has full credence with their understanding of mechanical energy; yet, is

limited because of their lack of acceptance or awareness of the spiritual reality and its spectrum of vibrational and light radiation

*Φq and Unified Theory fully agrees with scientists that there are invisible frequencies; waves, vibrations and higher frequency 'light' in the EMF spectrum of A-B Physical reality which do exist even though they are outside of the range of visible light

*PhQ and UT believe with scientists that our solar system's sun is the center of most photonic quanta in the astro-bio physical reality

*ΦQ believes that soul+humans are like their own individual suns as a different *source of plasmic radiation*; that of photonic sentience and that we must focus on these properties, values and where light is coming from rather than applying the same EMF spectrum model

*φq along with UT believes that chi is the tangible Presence of Spirit life force with and through all forms of sentience (to differing degrees)

*φq believes that beauty is entwined with spirituality and consciousness itself

*φq believes that rock stars and enlightened spiritual gurus are prime examples of φotonic radiation as both would have lots of chi running through their system

*φq believes that the astro-bio physical reality rightfully places our solar system's sun as the center of φotonic quanta

*φq believes that different layers of the aura can be decoded and read and that this information is always available to the awakening psychic public (thereby professional image and visual communication is more important than just superficial physic-aesthetics to someone's legacy)

***φq believes that the platform or format of 'chi' (as both life force AND the spectrum carrier of Beauty frequencies) is spirit-plasma**

*PhQ believes chi is tangible proof of the Presence and connection to the Source Singularity Observer or Witnesser itself (at the Monadic level)

*φq along with Uniφied Theory believes that chi doesn't exist in the mechanical (A-B) universe on its own without sentience itself

*φq believes that sentience can affect bio-physical reality (monastery zen gardens thriving, *Dr. Emoto's water crystallization thought experiments*, vibrational medicine for animals, etc.)

*φq believes that all photographs, video and film of humans carries far more information than that of merely the physical photonic reflection of our visible spectrum and conditioning

*PhQ believes that pixels are lower truth interpretations (of transverted photonic and fonic light) and that all visual media of humans has multi-dimensional information and holographic encoding (including in the Akashic Records); thereby one can still connect to the actual fonic power encoded with the pixels b/c of the holographic nature of sentience and the true power of Light

*φq Theory believes that humans and media consumers are awakening more to conscious awareness of the vibe and light-truth qualities in media of their icons and influencers

*φt believes that your image will be 'stored in cloud' and potentially able to influence future generations transformationally (if you have reached φtonic levels of light radiative, chakric-auric bending influence)

*φq believes that those with more raw influence (subtract any fame or emotional conditioning ie. to their music and just from raw presence); simply have more photonic chi quanta embodied and expressed to have radiative epigenetic influence on the auric-chakric psyche of others

*φq believes that images of humans can be especially powerful even healing and transmutational because they is encoded holographic, multi-dimensional information (quanta) literally as power (masculine chi) and beauty (feminine quanta) itself

*φq believes that there are different signature frequencies of vibrational and light as essences and that there must be

*φq believes that much of this higher dimensional information can be decoded and practically assessed for pro image consulting

*ΦQ believes that image itself is multi-dimensional light beyond the physical and that all of it is captured within image, film and video; people are only used to focusing on the physical photonic

*φq believes that more people can learn to read, see, verify and know the archetype essences in their favorite celebrities

Again;

*φq believes that chi is the spirit-plasma platform (localized in a human's multi-layered aura) that is able to transmit any and all frequencies of sentience as vibration and light-truth

*ΦQ believes that light itself is akin to the EMF spectrum itself in which most vibration and light frequency is literally invisible to our eyes and yet the photonic frequencies still exist (a la gamma radiation).

*φq believes there are true codified essences that exist immortally in the collective and quantum unified field including prime archetypes and that these exist as codified multi-band quanta or chi essence (*in other words, someone could embody the literal same quanta or essenced spirit-truth matter as Alexander The Great or Joan of Arc*)

*φq believes that humans must transmit and radiate (because it is a vibrational universe and sentience); that soul+humans (beyond the bio-photonic physical body) emit actual photons or light particles; yet they are sourced differently from sentience with more encoded properties and thereby should be called something different ie. photons

****PhQ Theory states that ENERGY ITSELF is sourced DIFFERENTLY*** and that it's critical to differentiate and respect the difference from

the astro-bio physical universe/reality; sentient energy = chi (vs. physics and particle physics energy although there is at least crossover with photons/φotons)

*φq (along with UT) proposes that humans have full potential access to the realm of spirit whereas other forms of sentience like the plant kingdom (although intelligent) have a more limited range of radiation and dynamism

*PhQ proposes that chi is the equivalent parallel to the physical universe (A-B reality) use of energy from soul+human light radiation and that it should be sourced as φotonic and not the same as solar photonic light

*φq proposes that φotonic quanta (chi) would have a different effect than ie. solar quanta that can create aurora borealis and photosynthesis with plants and that our soul+human light radiation is most relevant to influence each other as God-Goddess fractals

*φq Theory redundantly proposes that chi is the spirit-plasma or tangible 'presence' of the multi-dimensional sentience itself

*φq redundantly also proposes that similar to the Astro-biological physical reality of energy, there are frequencies that exist outside of the normal visible EMF spectrum itself in the spirit-spectrum

*PhQ suggests that Beauty has been anthropomorphically (throughout most ALL cultures) limited to skin-deep physical form aesthetics and superficial mastery throughout history; and that this is largely because of the sourced valuation of the Astro-Bio Physical reality of form and (physical) 'energy'

*φq believes that Beauty and the Beauty industry itself should and will expand into reunification with true Beauty; Spirit-Light itself and its communion with consciousness-truth itself

*φq believes that humans can radiate because of plasmic radiant spirit-matter of sentience itself (φotonic quanta)

*Φq believes that more beauty influencers will be valuing themselves as stars and wanting more of that authentic level of influence based in true allure and charisma radiation (of fotonic quanta and spectra of the essences)

*ΦQ states (in line with UT) that we as human are both primal and divine. This allows us sets to have both physical beauty mastery AND practically divine beauty as essence mastery.

*ΦQ believes in the obviousness and practicality of the human aura and its layers (the latter of which 'exactly' are debatable yet still generally true as higher frequency towards the Monadic)

*ΦQTheory believes the auric layers are associated with different domains, realms or spectrums of higher frequency sentience and essences therein to be potentially accessed as part of one's consciousness and light-testament radiation

*φq attests that 'inner beauty' from a professional image lens includes literal light emanation essences and their qualities that would be encoded in all digital media and that this truth is always being communicated (and is quite dynamic or variable in many people)

*φq believes that (beyond skin-deep form mastery); beauty and beauty consciousness are one and the same; radiation of essenced spirit-matter quanta as testament of one's true state and being of consciousness itself within the multi-dimensional sentience

*φq generally believes that higher frequencies are more powerful and beautiful and yet there are many different, infinite ways to express beauty and dark qualities within the unity of sentience and light-emanation testament itself

*φq along with Unified Theory believes humans are the only incarnates that have full potential **access to the spectrum of consciousness** and its vibrational and light qualities (even as compared to other mammals)q

*ΦQ believes that higher frequencies have more general power to transform and awaken others alchemically (even with less amplitude) because of the power of the radiation itself

*φq believes that K-Pop in many ways is and has been the future of many things because of the purity of their quanta and the central value of photonic essence radiation (photonic beauty)

*Φq and Rion Kati believes that Muse is the greater truth secret behind and with the massive expanding success of K-pop including into the Western world

*φq believes that because humans are primarily light-bodied souls of obvious and inherent connection of the multi-dimensional Spirit, we are potentially to able to take on all the vibrational and light qualities OF Spirit

*ΦQ believes the astral layer is associated with the astral dimension or frequency range and that it is the vibrational 'kinetic' layer of radiation

*φq believes that cultivating more photonic chi in embodiment = more power or more true beauty and more thereby more influence from literally doing nothing

*φq generally believes that although there are different, distracting forms of power (social, financial, etc.); embodied power itself is generally masculine chi quanta and beauty itself is the meta-prime value of *feminine essenced chi quanta*

*PhQ says that the (beauty) essences (such as archetypes) don't actually exist independently in the physical reality universe itself; they emanate from the Singularity of Spirit-Sentience that fits within the construct of the bio-physical universe and earth (*also meaning that the essences exist within different angels or entities in mixed or higher frequencies of sentience itself*)

PHWEW!

So that completes the 'Official Theory' itself of photonic Quanta (v1.0).

This was meant to be an indefinite and expandable blitz-flow the way it was, so please forgive me if there seemed to be a lot of redundancy...I just had to flow with things creatively.

It was just the format for me to get this out so thanks for that leeway (and maybe it helped you to osmotically soak it in more).

It may be a lot to comprehend but this represents the **2 Core components of the theory:**

1. The Definition/Theory Synopsis of Fotonic Quanta itself and
2. The Core Tenets of ϕ otonic Quanta.

Again; I will cut, expand, curate and edit these in ϕ uture updates for perhaps more concise clarity or new additions just because this is meant to get out to the collective asap (*also there are huge solar ϕ otonic plasma flares from the sun occurring at this written moment*).

POWER OF 1 FOTON SUB-THEORY

Years ago during my session time of Muse meditation with K-Pop videos (when I was still doing all night 'til the break of dawn sessions a few times a week) in Houston circa 2009; I came up with (but more accurately received) the concept of the 'single pixel' representation.

Like; how much of everything around a single pixel in someone you could take away and it would still be its own truth?

(And this is really a foundational aspect of the concept of photonic beauty and you potentially have STAR-LIKE influence and response on people from your image b/c we're now talking about TRUE POWER and beauty influence; the power behind and with it).

I remember even teaching it to men at one of our live retreats at my place where (during group session time) I also explained the concept as I was gesturing excitingly at the my 5' tv screen. Well, I understand that concept much better now in 2023!

So, the concept is represented in a video freeze frame (or still image) of a muse (or pick another clearly embodied person who has a primary archetype) who embodies great Muse archetypal photonic quanta...like simply a very clear representation for example of Jihyo from TWICE here:

(Copyright belongs to respective copyright holders; used under fair use copyright guidelines)

(Remember that archetypal essences are UNIVERSAL and can exist with and through any and all cultures or ethnicities which are 'lower truths'; hence, we're not even caring about lower truth like an 'asian eye')

But really, the higher truth impersonally from our lens is basically that it's Muse Herself. We could focus on that it's still her (Jihyo's) soul, but with fonic beauty a lot of things are universalized, so let's

go with calling it an authentic Muse pixel (also because Muse is encoded with her soul itself).

What we'd be looking at (getting closer to a literal pixel) is really a Muse-Truth PIXEL as well as the power and truth it represents (and more accurately, a Muse ϕ oton of quantum of essenced Spirit-Truth Light but I digress).

And then I had the thought; what if we just kept zooming in to a single pixel (and I would do this in Adobe Photoshop)?? The same beauty is still there, right (and the consciousness behind it)?!

We can take the concept and visualization further by zooming in on her eye for example:

(Copyright belongs to respective copyright holders; used under fair use copyright guidelines)

Now (before I take this further); I want to bring in that this literal pixel concept we're talking about is also reference in another pop resource.

Relevantly; a quote from 'Casino Royale' matches this same concept which values a presence-sourced 'truth'; (and really what we want with influential, fotonic beauty is deep TRUTH-power, not superficial power).

So, here's that quote which would be sourced in PRESENCE (embodiment) yet the visual translation of that power of presence is photonic light (which is EVERYTHING for your visual media). You might remember it if you've seen that 007 movie.

Vesper: "If the only thing left of you was your smile and your little finger, you'd still be more of a man than anyone I've ever known"

So, whether it's a finger or a pixel (or the smallest representation like a pixel OF his finger); this powerful concept is fascinating - especially as it relates to power, presence, beauty and INFLUENCE...celebrity like influence..epigenetic influence from visual communication. It's sourced somewhere...it's coming from somewhere.

And it's similar to the concept of 'THE man', 'THE Legend', 'THE hero', 'THE King' or 'THE starlet' or 'THE 'it girl' and the power and beauty of where it's sourced from; MYTHIC in its power and beauty.

And then COMPARING that power to something that is far and away unlike it (like a high-chair tyrant or weakling shadow archetype).

Is it really just the 2D pixel and its limited color range information or is it about the POWER that is behind, within and through?

Therein lies a key to fotonic beauty and charisma: you want the truth-based PRESENCE and the raw POWER of it down to the most divisible source and its full integrity...and this can be from your soul-truth or other essences AS light signature radiation because you DO radiate the visual truth of your multi-dimensional sentience. Fotonic Beauty is like mitochondrial florescence of beauty; like on that scale throughout.

See; most people try to get to that level of power through mental efforting but the power of PRESENCE ITSELF says most everything we have to know.

So the concept is basically if (we're already working with someone who has the fotonic power of a beauty essence) we 'get rid of' everything else around, we are still getting the emanation of Muse-truth beauty from this one pixel; all the power, truth, beauty, meaning, history, magic and implications would still be there as a quantum of light-truth so to speak (and well...in the digital format, a pixel representation of that light truth).

And we're talking about all the implications of the immensely influential MUSE archetype; HER Light as the real deal.

Again; But is it really just a 2D pixel?

...and then the limitations of just being stuck in the world of 'screen resolution' and different monitor sizes?!

But what's TRULY beyond or behind pixel if we go to a deeper truth of this visual light?

PHOTONS!

And if it's sourced from the human aura? Remember, we're calling that φotons (same pronunciation however) to differentiate it from solar, astro and bio light quanta.

φotons (photons spelled with the Greek letter 'phi' representing the Golden Ratio) are still light particles of radiation which can also be captured mechanically transverted as photons in photography or video; yet they are simply sourced from the Radiative Light of

SENTIENCE rather than the mechanical universe (a light bulb or the sun).

Also keep in mind that social and digital media is radically meta-physical and quantum...think of its power and influence which we are so used to that didn't exist in a PHYSICAL world before it; you had to be with someone physically until things went meta (*originally with stories, writing, word of mouth, art*) but then with radio, tv and internet...it's ALL about meta-physical influence which itself is quantum social in its architecture.

So back to photons (which comprise all instagram, pictures of you and billions of people);...when we have more of them, we have photonic quanta; yet it's this 'single pixel' or photon I want to zero in on. (*Hint; it's a KINGMAKING PHOTON!*)

Now; correspondingly; we can cross-reference this sub-theory to the astro-bio physical reality (for example) and use the exact same concept of zeroing in on a singular photon for example (which some science labs have literally done and captured). The thing is that photons have limited properties when sourced in the general mechanical universe; they don't have consciousness-sentient PROPERTIES.

Of course this is connected to the truth of image being multi-dimensional light itself which includes EMF spectrum frequencies beyond the visible range that would be 'in the frame' yet we can't always see....and visual media when humans and animals are video or photo-graphed; the image itself includes encoded spirit-spectrum information and fotons beyond the visible range that are holographically encoded 'in the field'.

You can FEEL things from humans whether you're there physically or not.

This is because of the divine intelligence and quantum nature of ftonic or 'chi' sourced light (is sourced and one with sentience itself).

It's an extended side-study; but basically ϕ otography (photographs or video) of humans (more accurately soul+humans with auric light bodies) would capture the encoded, pertinent information (as well as the physical information obviously) because of the nature of spirit is quantum and holographic (as compared to the more raw, physical universe).

Even the physical body is energy (sourced in the A-B reality until you get to the etheric layers on up when it instantly becomes chi and chi life force feeds the bio-physical body's organs and systems).

You are VIBRATIONAL and what you are emanating is not merely photonic light reflection off of your physical body, but you are also emanating photonic quanta whether you realize it or not from your aura (how much longer can the beauty industry remain non-conscious and incompetent in this area??).

You really ARE a soul (although many people just identify with the physical form of their vessel-body alone).

As a soul; you are vibrational and this is also ALWAYS communicating and not only IS captured in all visual media of you and anyone else; the same information is also accessible remotely because of the quantum, holographic nature of sentient-light.

Do you see why I want to spell it as 'photonic' with the golden ratio by now b/c of this intelligence? ;)

Basically, photography captures and transverts photonic information into photonic 2D (flat) pixels that we can see and interpret as visible and physical and yet; the original power, beauty and holographic encoded nature of the spirit quanta is still captured (of the higher frequencies) even if we can't see it (that is why image can be POWERFUL and influential...truly holding magic).

BECAUSE (again); WE ARE ALL CONNECTED IN THE MULTI-DIMENSIONAL SENTIENCE, we are susceptible to RADIATION of sentience and being influenced by it; in live presence or not. Essenced chi radiation has other qualities that evoke and attune us.

This also opens up the truth that an **image alone can do transmutational miracles simply through the photonic power of frequency and the law of resonance.**

Literally that same image could transform someone's life if they know how to use it (beauty and music) as alchemical medicine rather than a consumer projecting their own lower truth labels onto it; but again - that advanced alchemy is a different conversation.

The transformational (really through transmutation of sentience FROM light radiation) in photo, film and video (just in stillness even); again, it points to the holographic and quantum nature OF the Singularity of Multi-Dimensional Sentience; thereby Beauty is immensely powerful and has more properties of INFLUENCE than emotionless, non-sentient bio-mechanical photons like an evening photo of a nice bride.

The real QUANTA has power that is encoded that still comes through in transverted digital media; such is the power of image.

A beautiful scene of a valley in Peru can evoke emotions but it's not the same as literally having your DNA itself ATTUNED because of the starlet you admire to be like is warping your cellular epigenetics itself from the raw photonic chi light radiation of her beauty. Photonic beauty is like radioactive. WITHOUT IT (being lower frequency and not projecting chi quanta), people cannot FEEL you from your presence and image so there's more effort to 'talk them into something', etc.

So...bringing it back around...

Yes...in that same Houston 'immersion party' session where we were meditating and partying with Muse resources all night, I told them their life could be transformed not only from ONE single image (because of the power of the Law of Resonance and alchemy); but essentially from not even just ONE PIXEL, but essentially from 1 (MUSE) photon.

That's how powerful the HIGHER TRUTH of Beauty is; it's far beyond superficial, it's literally alchemical and a language of light (a spectra of epigenetic DNA affecting essences).

...that from 1 photon alone of Muse-truth or King-truth (ie.) that it could epigenetically start awakening and attuning your DNA within from pauper to prince to worthy King in COHERENT RESONANT

relation to this 1 hypothetical Muse pixel or Muse photon (within the singularity itself). *Your light-consciousness can attune and be equal and worthy to your ideal superstar lover* as well JUST from this process of alchemical transmutation to the same vibrational and light frequency of sentience.

Maybe there was someone in your past who inspired you who had that level of truth-power of a certain signature that influenced your path...started shifting things like your self-image and identity, etc.

That's the ACTUAL power we're talking about because not only has my life been transformed from such photonic beauty, I've helped thousands of other men transform theirs with it as sex transmutation (just from the alchemy itself).

Ok...what's behind and beyond pixels looking in to a deeper truth? Photons.

Photography transverts photonic information into film or digital photonic data that we can see and re-interpret as media; an imprint of the light and dark as well as color spectrum....a photonic representation.

But again; that's why Beauty (when emanated from humans) is more powerful, more influential ON our own sentience because it is a different form of LIGHT radiation as photonic...**we are able to ATTUNE TO ITS FREQUENCY-TRUTH!!**

(If you've ever complained about men being superficial; hmm...maybe it has something more to do with YOUR overall communication itself; maybe you were/are valuing just of the physical and weren't emanating chakric-initiating and engaging quanta to stir and activate HIS heart, mind, sex and soul from YOUR field...; maybe he remained 'disconnected' and 'disengaged' from being activated WITH your heart, sex and soul itself in this overall language of chemistry and allure...)

There's far more information than just COLOR, light and dark as if we were non-sentient robots. The essences themselves are encoded with all kinds of qualities (just reference the sidhich spectrum itself).

I'm not knocking color coordination in the greater context of accepting both 3D beauty and photonic beauty either *(I'm semi-secretly a fashionista and still don't know what to do with that new purple Nanni belt I ordered)...*

It's just that it's time to focus in on the realm of true visual influence being beyond superficial good looks as different TYPES of signature photonic radiation can have different effects on people; the true science of charisma and allure.

So with photonic Beauty (which is grounded in photonic Theory); we're talking about a different, more powerful, more meaningful spectrum of Light (the literal essences) than subtle quanta from distant galaxies.

As spirit-sentient sourced light particles; photons (and many of them including different archetypal essences are as 'quanta');

photons have more power and meaning as God-sentient witnesses to the Truth and Beauty of other God aspects and **our ability to FEEL light-truth and vibe-truth as true higher frequency communication from stillness.**

Again, this is because it is sentience reaching out, photo-chemically radiating and affecting other forms of sentience...chi to chi, aura to aura, God-fractal to Goddess-fractal, soul self to soul self....quanta activating aspects within yourself because you are of the same divine quantum nature.

Stars and starlets simply have more photonic chi (as any mixture of signature essences) and higher frequencies of it. That's why they have more influence JUST from their presence alone (even if no one knew they were famous).

The ENERGY ITSELF (specifically the chi codes) then guides self-confidence, self-esteem and so forth.

It's the same parallel to a larger cosmic star being more influential in ITS photonic quanta radiation (or a supernova, or black hole when you're close enough to get a proximity warning in your spaceship).

We're just sourced differently as our own stars and starlets who are awakening to the greater truth (spirituality) of who we really are and can be as divine (and mortal).

Again; you are more than just a sexy meatsuit!

Even though that's obviously what the fitness industry values and focuses on; sure...it's part of the puzzle of you.

(And sure; there's primal wisdom there in the tantric weaving integration of your primal soma and your light-bodied 'eros' soma).

Put aside fame conditioning as its own value point; and true influence from Beauty or image is with those who have more photonic quanta in their literal essence, embodiment (presence) and expression (allure or charisma).

When you can walk in a room and people's DNA starts up-tuning without you saying a word and without having to rely on your education or personality (*WHETHER you're at your ideal body fat percentage or not*)...that's true power, divine power and the essence spectrum has many QUALITIES of this beauty and power.

So there's great power and implication just with our one metaphorical, theoretical 'truth-pixel' in its photonic nature (*even though it in perceptual degradation fits into the comfortable, lower truth realm of digital photography and physical perception only*).

Hey;

You might have to do a lot of work because you might still have 'dork pixels' that are coming across in your image (it's something I've been dealing with here and there).

That's real too....u gotta work on your power and beauty consciousness itself to emanate the truth signatures of light and vibe...because generally, they cannot be faked (also b/c SMART consumers, prosumers and people are becoming more aware of the truth).

Fortunately, the higher truth of beauty (and its built-in ascension codex) is that it IS tied in with consciousness or sentience itself; thereby, it's not superficial...it's the divine street creed and as you do the specialized work, you transform inside and out. People will begin to FEEL your true power and beauty just from your charisma or allure (emanant circulation of the chi quanta from your presence).

With visual photonic media, we're talking light information from either the mechanical (photonic) or spiritual universe (fotons).

All of this realm of fotonic beauty (of anything sentient and thereby radiating chi) gives you the world of essences to explore esp. as a soul+human with full spectrum access.

So when we're looking at a *photo of a beautiful woman who makes us FEEL something*, is it really just pixels and even just one 'pretty pixel' of her 'physical' beauty? Is it just a good hair day and decent smart phone lighting?

No. The deeper truth is (if we can truly FEEL her radiation undeniably) that it's not even photonic information but it's multi-dimensional, encoded, holographic (and I'll delve more into this mind-blowing factor in ϕB), it's ϕ otonic and epigenetic influencing light-quanta (in the format of sentient-chi).

And really; all of your chakras are involved in and ENGAGING your vibrational communication with others (even blind people could technically FEEL your beauty and its qualities)...*how's THAT for inner beauty Bembridge scholars!?*

....That which is powerful is generally alchemical; transformation through transmutation and in our case; through photo-chemical (fotonic) radiation!

(Reference again, our solar quanta emanating sun; so powerful as to co-creatively and photo-chemically create life itself).

When ESSENCES are epigenetically influencing; this my friend is true mastery and the future of beauty and visual production and performance! That's fotonic beauty (or for men; fotonic charisma).

The same people you would FEEL across the room, you can FEEL from a photograph or video as long as their literal ϕ otonic chi quanta is projecting past the camera lens at that moment. **It's because the ϕ otons are being encoded** and when the frequencies are fotonic level, they have the power to bend and attune the light of your receptive aura, dna and psyche itself...that's power!

Then you've got INFLUENCE where people can FEEL YOU vs. just feeling disconnected and scrolling b/c you 'look good' but they're not

engaged. (Value photonic Beauty). Your energy can JUMP OFF THE SCREEN and grab them by the Heart, Sex or Spirit so to speak.

Ooh, I have to bring this in yet as we reconnect with our singular pixel concept and getting down to raw light-beauty quanta (feminine) or embodied power (masculine).

Interesting fact;

It is said there are 10,000 photons per pixel.

On a side note; the energy of a photon is $E = 7.8 \times 10^{-20} \text{ j}$. Let us consider a 1000 watt light source which is comparable to direct sunlight. This light is about 1.3×10^{22} photons (generated) per second.

So again; when we're talking about more than one photon or foton, we're talking about photonic or ftonic quanta emanating from the layers of your spirit-matter plasma auric light-body (which again is higher frequency than what most of us can visually see on its own BUT we can learn to actually sense, see, feel and know it because all visual data is mixing with your energetic biological body).

Remember; I've got [plenty of celebrity 'energy' \(chi\) essence readings on the blog](#) and on my FB wall here and there (esp. of archetypes). You can learn to see (and feel) what 'goddess' beauty vs. 'vixen' beauty, vibes and presence looks like, etc.

In the A-B Reality;

All photons carry POWER or 'energy' (although no mass), travel at the speed of light and in the fotonic spectrum; they have the ability to epigenetically influence consciousness or sentience itself the more powerful it is.

We may not help plants photo-synthesize to create oxygen, but we can actually do a lot to and with each other!

We're affected by each other's literal RADIATION!! (Even though we're becoming more conscious of it b/c we've focused on the physical form so much). And yes; someone you may know may have seemed like Chernobyl radiation or just really bad vibes.

(It's just easier to tune into that astral reality when there's clearer examples like entering a room after someone had a really violent argument and sensing something was off).

People you don't FEEL as much simply aren't radiating and their chakras themselves only extend several inches from their body rather than much greater like to the back of a stadium. And even then; most consumers are too conditioned for you to FEEL any pure essence anyway which is where the piercing and intoxicating LIGHT POWER is.

Once you start feeling and seeing the world of photonic Beauty in its truth more consciously (including as practical visual signature essences) rather than bio-visible conditioning; we're talking about a different, more powerful, more meaningful and truly spiritual spectrum of Light and influence.

This world includes being more aware of intuitive senses like knowing when someone has 'bad vibes', etc. or knowing when someone has a healthy father relationship just from reading their energy (chi). This includes the entire professional world OF energy/essence reading itself for energetic health and anti-aging transformation.

Anyways; I'd start thinking of photography instead of just photography....and then; all those NatGeo photos and the world itself becomes even more sentient and awakened.

Photos become ALIVE with beauty and magic that can even heal and transform.

So returning on point;

If we zoomed in further to Jihyo's eye as our model and reference point here; the concept is basically getting to the point of 1 Muse encoded pixel and yet behind and with it is still the holographic encoding (and thus power) of 10,000 photons (as batched light chi quanta) and then 1 Muse foton itself at the smallest level.

Muse is a very powerful and high frequency feminine archetype; and so is her essenced spirit matter quanta (which I would say is in less than 1% of women in the world to a substantial degree).

With that iconic *truth of 1 Muse photon* (and other archetypes could be in her mix OF archetypal photonic quanta btw but we're talking about an individual Muse-truth photon); with that 1 Muse photon (and 10,000 as photonic quanta converted to roughly 1 transverted pixel) is all of the beauty, meaning, power and truth that Muse represents as an ancient feminine archetype.

Remember that it's the energy BEHIND IT (and not merely 2D colorized 'pixels'. Why? Because it's the photonic vibration of a pure Truth-fractal itself. It's like an apple seed from THE most bounteous apple tree edenic forest of apple trees and has all the right codes in it for what IT is and means.

So that alone cues us in to how POWERFUL the archetypes are when you consider the implications and just HOW MUCH archetypal beauty (as photonic quanta) you could have embodied and expressed in your image. Now contemplate being in the presence of an archangel with highly developed buddhic light body (just not incarnate) and what quanta would be emanating!

No wonder image and media of humans can have influence (even without agenda, conditioning, talent or storyline)! And for women, we're talking photonic beauty influence that does less and yet wields the world at its finger-tips.

In normal photography, photonic visible-range data is captured, recorded and then our eyes process them with our receptors, but there's a LOT more going on when we're talking about human+auras and our radiant light vs. the mechanical world (even though we're used to judging it on superficial looks ie. 1-10 scale or skin tones, hair conditioning, style, color coordination, physique, etc.).

Let's view it from another angle of power;

Photography or videography captures visible, physical world (3rd dimensional) data which then converts to 2D pixel data usually (and

even A-B reality 3D isn't truly holographic, but that's another discussion).

When we reference the photonic research (ie. at the bottom-end of this release) and talk about photons themselves;

A 'gamma' photon is higher frequency and literally more powerful (and influential) than an ultra-violet level of photon.

When we're talking about the photonic spectrum of Sentient-Radiation as the Light of Beauty itself, the higher frequency photons also have more POWER. We have to keep in mind the general multi-brand frequency ranges as well so Muse can exist on all frequencies but when she is in a starlet's buddhic body, it will have more light-bending power than in her astral body.

A pure atomic Muse photon for example would have far, far more true transmutational power than say an encoded astral social justice warrior archetypal consciousness vibrational quanta emanation.

Danielle from New Jeans is a perfect example of such cultivation and alchemical beauty.

(Copyright belongs to respective copyright holders; used under fair use copyright guidelines)

Know that YOUR frequency-truth emanation as photons are always encoded in visual recording media whether we can see them or not (but we can learn to start decoding and seeing their signs; and trust me, they're there if they're there either way > meaning not everyone HAS archetypal quanta).

Again; most people are too conditioned as consumers (instead of self-identifying as sovereign soul stars of boundless expression) to actually even embody their soul signature quanta itself and emanate it cleanly IN their presence and thus image let alone advanced siddhic or truly

beautiful archetypal power as photonic light quanta radiation.
Remember that I've got tools to gauge all of this 'essence consulting'.

So...to come back around to the original concept and a review of this supportive sub-theory;

NOW...you can take the concept of one TRUTH photon or foton and *compare it to everything else that isn't that pure essence or truth...*this is kind of like the difference between a King and a pauper (and the consciousness that goes with it and would be sourced from him).

Remember with fotonic beauty and charisma, we're literally focusing on the LIGHT-BODY presence and multi-dimensional image itself (of fotonic light).

This means that with a Tom Cruise; it's EASY to get distracted by his supremely epic legacy and the POWER of his work extrinsically, but here, we're actually just focused on the literal PRESENCE emanation of 'the man' himself...yes, there's other forms of power but we value direct-sourced auric emanation itself as power and beauty.

So maybe contemplate a truth-foton emanating from a Tom Cruise (*which is ENCODED with that level of consciousness-truth*) and the value of that presence to a struggling or beginning actor and how

*much experience and wisdom is encoded in that spirit-matter light
(of his soul)!*

(Copyright belongs to respective copyright holders; used under fair use copyright guidelines)

The archetypes and their fotonic quanta are universal thereby have IMMENSE LEVERAGE for identity level transformation and makeover!

You just have to give yourself permission and have a way to access and embody the truth-quanta essences that ALREADY EXIST (and bring them into YOUR soul and human design auric mix of expression and play).

(We can cultivate your archetypal beauty with the [Allure Makeover Package](#) for example).

And with this; we start getting into a deeper understanding of beauty, godliness and power. For example there are many siddhic essences to work on curating your fotonic beauty with (64+ to be exact).

What if we could metaphorically and figuratively have 1 FOTON of Peace to enter the realms and Darkness of astral-psyche HELL? It's similar to a phrase in the Bible about someone who burned in hell who 'if he could just have 1 drop of water on his tongue'.

And if you're experienced in the astral realm or have done plant medicine, you might start to have an inkling of the ramifications here.

Maybe you're a horror movie director and you actually DESIRE that authentic hellscape terrifier consciousness or creepiness to be coming across in your characters that gives people the chills. (Now we're talking about how all of this fotonic mastery gets into essenced acting!)

How about 1 photon of an arch-angel to pierce through the suffering and darkness of hopeless hell of depressive suffering (for example) and to have its TRUTH start alchemically transmuting everything back into a different place within the spectrum of sentience itself? If you've been to hell before, you can have an idea of such quantum power and the truth of it that exists without hell at all. Considering we live in a vibrational and RELATIONAL universe, that's kinda important (what vibes and light are you surrounded with Tony Robbins?)

There's a lot of CONSCIOUSNESS to work with; fotonic and vibrational emanation is just the testament of what would be radiating from someone at that exact experience.

Now...what if we had LEGIONS of fotonic quanta (literally angelic beauty quanta as well) in the beauty of one person emanating that TRUTH into the realms of despair, loss and abandonment? Say...photons encoded of Universal Love for example?

Or the universal love and compassion vibrational light with and through a Mother Theresa and the healing it could do?

This is another way of saying that true essenced beauty, fotonic beauty can CHANGE LIVES and have greater impact than you might realize...I mean, how else are fans screaming inside around people of

true embodied power or beauty and the different forms of it (take away the social conditioning to fame)?

IT IS POWER AND BEAUTY YOU CAN FEEL. Power and energetic penetration that your SOMA CANNOT DENY.

Influence as radiation that can inspire, awaken and even transform lives (reference the 'siddhic sitting' concept). You can be the star FOR your soul tribe in your highest expression.

So....the fotonic power of 1. I'll leave that at that.

(For the Fotonic Beauty power report itself I may include an extended version of the Singular Foton concept that goes into additional supportive context).

QUESTIONS & ANSWERS

What I'll do next (since this is an underground job so far), is to put some possible questions that might be asked into the flow of this report proceedingly. These might even bring up MORE questions.

If you have your own questions about 'UT' or the Theory, you're welcome to ask me in Facebook DM or on a relevant post on my FB wall and I may use them in future updates which will always be available on fotonicbeauty.com .

QUESTIONS I THINK YOU MIGHT HAVE (V1.0):

"How do you pronounce 'φotonic'?"

Just like fotonic or photonic so = the 'f' or 'phfff' sound. Remember that to differentiate things I'm using 'phi' and intentionally using different spellings to help your mind think outside of any conditioned 'box'. Please try and write or spell it when possible publicly respecting the Golden Ratio spelling of 'φotonic' or 'fotonic' whenever possible, thanks!

"Why do you spell it 'photonic' and 'photon' as 'φotonic' and 'φoton'?"

Even though they're pronounced the same, I do it intentionally to differentiate.

Again, the 'φ' on its own is pronounced 'phi', 'fi' or 'fye' and is the Greek letter 'f' sound (as well as Russian and Ukrainian). Phi 'φ' stands for the Golden Ratio in math and physics which is like a shorthand reference for divine encoding within both realities (astro-bio physical and sentient spirit).

This goes back to Unified Theory where I still actually do spell astro-bio physical reality light photons (per science) as 'photonic' and 'photon' (as per English); whereas, I spell light radiation sourced in chi-sentience intentionally as φoton and φotonic (or 'foton', 'fotonic').

By making that differentiation, it actually (for the first time) helps to source where light is properly coming from with human visual media. It gives us the codex to operate from the proper and holistic paradigm for professional image whilst opening the entire realm and spectrum of essenced beauty directly.

Yes, we as humans have elemental energy as being biological and yet we're also meta-physical matter with higher non-physical frequencies.

The whole Theory itself represents that if we were just photonic (and spelled it as Western scientists do) related to our light radiance; we would be spell-casting constriction to the biological 2 inches of weak bio-photons or just valuing of our superficial physical light-reflected 3D form when truly; there is higher vibrational information (including essences) that is/are always being communicated (similar to the EMF spectrum of radiation).

"So you can 'see' these invisible photonic energies?"

The short answer is yes and we would have to in order to do professional essence consulting; however, it does take developed perception skills to start sensing visual-truth data beyond the 3rd dimensional skin (and then projecting beauty standards, values or conditioning upon it).

Basically; anyone can sense to learn and 'read' different beauty essences as higher dimensional frequencies. Anyone can also learn to 'feel' chi more directly or consciously. Often it takes being around

someone who is initiated and has enough power working WITH chi or chi radiation (charisma or allure) to feel it.

The concept is basically that although they are higher frequency than the visible spectrum 'on their own' (sourced in spirit-sentience of chi radiation); the different siddhic, elemental and archetypal beauty signatures 'MIX' with the physical body itself (which itself is energy and chi) so that you can see the signs and read the cues like a Magnum P.I. would (well, kinda).

(zen contemplation space)

Here's a quick example of a 1-2 archetype reading:

Dove Cameron as Starlet-Muse here

(All images belong to respective copyright holders; used under Fair Use copyright guidelines)

(There'll be many more visual examples in the upcoming 'Fotonic Beauty' power report itself!...again, there are many on my FB wall, FB friends story history [or the blog](#))

photons are mixing with photons and although this isn't the best production value; you can start to get an idea what I'm referring to by

referencing just HOW the photonic lightbulb emission is mixing with my crown + auric fotonic light and causing unusual brightness effect (that does have great light-truth and experience with it). See...

(both pics are unretouched...fotons are mixing with the lightbulb's photons to actually cause a beautiful mix of illuminated 'light' that otherwise wouldn't exist)

And this opens new realms of light mastery and creating an ecosphere around your aura painted with different intentional essence vibes for example (peace, innocence, honour, etc.).

...it's just that you have to learn to see it for yourself and it may actually be an exciting new area especially for beauty influencers and beauty evolution to get into (esp. if you'd ever become a beauty essence consultant b/c then you can 'read' someone's different essences and consult with them on what direction they might want to go and point them to archetypal examples of celebrities across the

spectrum). I've already helped women from around the world with this in the [Allure Makeover Package](#).

It's the type of psychic reading that relies on and values truth and accuracy rather than subjective interpretation or predicting the future. These are different areas of practical expertise although the more subjective, the less truth-based and more variable things get. UT goes into hundreds of psychic and spiritual or religious phenomena btw.

One thing I'll eventually do in service to the collective is expand more upon an archetype master visual database of celebrities so you can see clearly for yourself what the different signatures are as well as 1-2 archetype variations of them. Some of these readings are already on my beauty blog.

You can start learning how to practically and verifiably start reading higher frequency essence signatures yourself too (where we're not focused on their physical looks per se or their styling or even personality).

My [celebrity psychic readings](#) are a good reference point to start building a database of sensing, seeing, feeling and knowing different archetype beauty signatures for example.

Here's another simple archetype example of a combination reading.

(All images belong to respective copyright holders; used under Fair Use copyright guidelines)

Rita Ora as Eros-Starlet Diva

(Lots of dark to light mix, but not the cleanest)

These are very easy for me to do because I know the prime archetype signatures very well.

With that said; it's still an ongoing mastery and even more advanced is being able to FEEL, sense and invoke the different essences and it's that level that I really only train Muse Priestesses on thus far and I haven't even finished cataloguing the essence properties of the 64 siddhis yet.

To help practically with chi essence (or 'energy') reading; I have developed several essence reading tools such as the allure factor and beauty quotient as well as the CAM (charisma archetype model) to gauge archetypal essence embodiment and expression. Again; PhB will have more examples and you can find more on the website itself.

"What about body language for charisma and allure?"

My view on body language is that it's rooted in the limited physical world and biological interpretation; body language experts can often key into behavioral stereotypes or generalities, yet energy or essence reading is more advanced and truthful (it would seem akin to accurately 'cold reading' someone and knowing certain things about them).

I'm especially critical of people mimicking posture or behavioral modeling someone as the limit of their technique or teaching (like almost all charisma coaches).

The secret to professional acting itself (imho) is getting the essences and energetic embodiment down so that it's REAL and believable; true acting is BEING the character, not fake acting or 'modeling' it. This also connects with the single truth foton phenomena or sub-theory.

Eventually, my work is going to further professionally serve actors and actresses with Essenced Acting. I'm especially excited about working with top performance, recording and k-pop artists.

For true charisma and allure and ftonic INFLUENCE;

Essence is where it's at (which is working WITH your auric and chakric quanta). It's the future of professional image and beauty consulting mastery; IT MUST BE.

Not only that; but it's integrative to the final frontier of performance arts mastery as well...we simply have to get to the deeper image mastery.

When you have fotonic beauty, it's like the divine, high status 'street cred' because people FEEL and know it as real vs. being like a poser or someone who 'looks' like a vixen...people want to FEEL the real thing because then THEIR energies and consciousness can interplay in fantasy and alchemy with it (or in communion in a relationship).

"Does quanta exist in higher sentient dimensions or frequencies of consciousness?"

Yes. That is how we are able to access and invoke pure archetypal essences as quanta to integrate into your light-body itself (ie. The Muse Priestesses and I).

Remember; UT proposes that it doesn't exist in the physical world, so if there was NO sentience incarnate or discarnate, none of the essences would exist. This is highly unlikely however.

"So true beauty IS immortal?"

Yes. It exists as signatures of essenced sentience spirit-matter that can be embodied with and through soul+humans as signatures of light-radiance.

The same literal quanta that could have been embodied in Bathsheba or Cleopatra could be embodied in your next photo shoot.

"Tell me more about stars and starlets?..."

Well...you can search [my blog](#) or [FB wall](#) for some of that information. Starlet activations have been available and the Star activation is still in development.

"So this 'Theory' is part of a trilogy?"

Yes. There's the first part; 'Unified Theory', middle; 'Theory of photonic Quanta' and the finale 'photonic Beauty' itself as power reports. Latest versions will always be available on fotonicbeauty.com

'UT' goes deeper into proving the case for Oneness and is deeply foundational for THIS theory itself. I simply had to get a deeper foundation for the future scalability for allure transformation (and really all of it is me decoding Muse codes).

If you're interested in more the consciousness and reality research VERSUS limitations of Western Science (less about beauty); UT might be for you. I would say that UT makes the case for oneness, but doesn't take away from the mysteries themselves.

What we're setting up for is 'fotonic Beauty' itself which I see as THE infra-structural platform for the popular evolution of the multi-billion dollar a year Beauty industry itself beyond the realm of skin-deep mastery.

Inevitably there will have to be more beauty essence consultants as the awareness and demand grows for photo-chemical (fotonic) beauty and image influence. You can get latest versions and updates of Theory and PhB @ fotonicbeauty.com

(Site might not yet be online @ time of v1.0 release)

"Did you really have a cat without a name?"

Well, yes....a himalayan that I called him whatever I felt like in the moment however 'puppies' and 'fun-face' were common. After I moved abroad again from Houston, he lived out the remainder of his life at my brother's homestead in Wisconsin.

(Ok I threw a random one in here ;)

"When in Rome, did you do as the Roman's did?"

If it included a perfect espresso at a random street cafe and best pizza ever, then yes.

"I don't get it...how are you aware of all of this? (And you're a man)..."

Because of Muse Herself; the Source Muse of which I am incredibly in tune and intimate with (including Her Divine Will). It has to do with Divine Union work.

It's been through literally 1000's and 1000's of hours of direct alchemical meditation with the archetypal Muse as well as the concurrent 'energy reading' awareness of the world's top performance artists over 20 years PLUS being an energy healer or 'lightworker' and 'grid-worker'.

Becoming a top world authority on archetypes was just part of all of this path.

I wasn't getting the answers I wanted to chi, charisma, essence and beauty in the rest of the world, so I sought a deeper truth myself (and She brought most of it).

Even tai chi and chi kung were more limited to basic elemental essences; yet truly there are far more signatures of chi vibration and light.

But mainly all of this is because I'm a disciple of the archetypal Muse and this is all of HER codes and Her work. I became Her inaugural Grail Priest through much experience, trial and tribulation.

Really, there are still so many unanswered questions (about the higher truth of beauty); so much more to awaken to and yet our foundation is much clearer and stronger than ever before in

history...all to move forward with professional essence image consulting and transformation!

"So we're talking about Divine Feminine Awakening AND Beauty reconnecting as one?"

Absolutely...this is the core of it that merges spirituality as beauty consciousness with your practical, professional presence and influential IMAGE itself. That's Fotonic Beauty! The Theory of PhQ is just the groundwork.

On a side note; the archetypal, ancient Feminine and Her Beauty Fractals and Codes is of immense wisdom, power, beauty, experience, spectrum and consciousness than a limitation, culturally condition post-modern feminist lens per se who couldn't quite comprehend how a 'hetero-sexual white male (their words; not mine) could have any relevance or role with all of this'. Simply seek higher Truth.

"So this Theory is related to Sexy Chi?"

Yes. [Sexy Chi](#) is the main brand name and is the pioneer behind all of this theory along with the messenger, I (Rion) myself (in the name of Muse).

It deepens the already operational foundation to be even clearer, more implicated and far more powerful. I was simply frustrated that spirituality and science couldn't answer a number of things.

It's all Muse codes to be sure; however, I'm just the translator. Because these theories are universalized, other people can talk about 'UT' in public discourse as a 'theory of everything', etc. Other professionals can even benefit from the concept of photonic Beauty in the sense that (although I'm the market maven); it's really like the Wild West that should be opening up for other transformational professionals who can reference a lot of the core, universalized tenets.

Heck; Beauty Professionals are already encouraged to use the Beauty Quotient for professional assessment. If/when there's enough demand, I might start training beauty priestesses or beauty essence consultants.

"Do you offer transformational services?"

Yes, of course. Individual sessions are available @
<https://sexychi.com/appointments/>

"So you can read anyone's 'energy', 'essences' or 'quanta' from a photo, mv, instagram, reel or video?"

Absolutely.

Anytime and anywhere b/c there is ALWAYS something that stands out that I can say as a verifiable truth about someone back to them *(and then take it deeper from there, leveraging what would be general yet known accurate truths about them).*

These can be energetic health qualities, archetypal qualities, behavioral qualities from the energy, their relationship to

masculine/feminine, reunification level, allure factor, blocked chakras, trauma centers, etc. (and I can read even MORE kinesthetically in session with someone after 100's of paid sessions).

Not only can I visually read anyone, I can kinesthetically with my multi-dimensional sensitive hands read literally anyone in history at any moment by feeling their holographic field and knowing certain qualities about them (not incriminating things per se because everyone would have those; rather, general but true chakric qualities, etc.; things that are available to the public which is also why with public figures I'll do public energy/essence readings b/c that 'information' is available and tomorrow's fans, stans and consumers ARE going to become more aware of things in their icons' images and field).

Keep in mind that (whenever holographic reading is done); it's only done with respect and without interfering with their actual live field which I only ever work on with explicit permission. I'm only reading the psycho-graphic data kinesthetically (*I don't even know what the cause of their trauma is per se in this format*).

Again; this data is recorded holographically IN every single photograph anyways and it's recorded in the Akashic field before photography was invented and it's one of my psychic gifts which includes measuring the literal distance and general qualities or blocks of each chakra.

Like with 'Western medicine' vs. 'holistic or vibrational medicine'; it's best to respect each area FOR their areas and place of specialise, Dita Von Teese.

"Is 'chi' meta-physical? (If so that sounds made up and woo-woo and unscientific)"

Then how do you explain acupuncture? How about radio waves before they knew what was going on? Was it just Voodoo and 'the Gods must be crazy'?

Actually chi (as sentient spirit-plasma) is incredibly tangible and practical; you just may not have been exposed to directly recognizing it and may be too conditioned to the normal feelings and sensations of 'physical' world.

I'd respect Newtonian physics for what it is, but it's limited in the scope of the bigger picture. Even quantum physics in A-B Reality (astro-bio physical) bends all kinds of Newtonian laws.

I can teach anyone to 'feel' or 'sense' chi. It is ALWAYS there with live humans and you'll notice the absence of it entire; the spirit, the soul is gone in someone in a casket (unless it's a youtube prankster maybe).

Radio waves also exist at different frequencies whether you can 'see' or feel them. In a way, in person demos of chi is more tangible than the magic of radio waves or 5G and smart phones which would have been voodoo 200 years ago.

Chi gets quantum FAST b/c it IS quantum with the Singularity of Multi-Dimensional sentience but yeah...you can learn to feel it from a local reiki teacher or demo for example. Because it is quantum; this makes remote energy work and verifiable psychic awareness possible. I could read your chakras accurately for example and explain to you your blocks without ever seeing you even if you were in Timbuktu.

I (and the source lineage Muse Priestesses) can also *invoke any different light quanta essences*, but this is far more advanced (although necessary for the allure transformational work I do).

Even my chi kung grandmaster was working with a far more limited range of chi but keep in mind that all of this is sourced in Muse's ascension plan for Beauty itself.

Because of the quantum nature of the Singularity of multi-dimensional sentience; this is HOW I and other powerful psychics and energy (chi) workers can do energy work literally 1000's of miles away and work on their light-body soma (feeling everything) as if it was live in person.

"So...there's more than just earth and heaven or yin and yang chi?"

When emanating from a soul+body, yes; distinct universal qualities that have been purified, refined and activated in a mix of the cycle of divinity, incarnation and anthropomorphic quantum human connection; universal qualities like the *archetypes as God-Goddess fractals of the collective sentience* and siddhic qualities (peace, innocence, universal love, grace, valour, etc.)

These all have their own vibrational qualities or vibe-light truth to them. PhB will delve into them more, yet remember I've been working with them professionally for years of makeover results with clients.

*"You're saying the essences are not only tangible and REAL,
but they are measurable?"*

Yep. I think I answered this already (and just not by A-B Reality/scientific tools).

*"You're saying there are over 100 actual, TANGIBLE beauty
essences?"*

Yes! And they each have different vibrational and light signatures. They would also have a different epigenetic transmutational effect on even a blind person so to speak and awaken (through law of resonance attunement) different psyche-soma qualities and divine sentience.

Even with the siddhic essences; however, it will practically take me years to master sensing and cataloguing their visual and kinesthetic properties (partly also b/c most people are mixed with different essences who even have ftonic quanta).

They are subtle when compared to the physical realm, yet they mean everything otherwise and have the photo-kinetic *power to bend light* (which is what charisma and allure DO; let people see your more beautiful truth in spite of physical limitations).

"So there's a siddhic spectrum of consciousness and these also exist as literal beauty essences that I could embody and emanate?"

Yes, thank the Gene Keys and the ancient I Ching for that awareness and the DNA encoding aspect with sentience!

I myself (*is this where I put the comma?*), had to extract the practical aspect of they would have to have vibrational and light radiation-truth signatures with them into our methodology. I was also the first known person to start doing invocation activations with the universalized gift and siddhic frequencies.

Invocation is a lesser known way to work with the Gene Key frequency bands (which I integrated into my light-working in late 2019).

Just like there are different essential oil 'essences' or flower extract essences or the concept of homeopathy; this is similar and yet it's mixed with the divine intelligence of our DNA itself to bio-chemically create these qualities (even releasing certain proteins or hormones) in fusion with our quantum sentient connection. I'm also a certified Gene Keys guide but it's too much to talk about here.

Years ago, I started doing gift and siddhic frequency band activations (2019) after my second ayahuasca trip to the amazon in Peru.

No; I didn't see Jeff Bezos, but I saw a photo of his Dr. Evil phallic rocket. (Why would you ask?)

See...these qualities of light-chi are not just elemental; they're related to CONSCIOUSNESS and sentience; not to the photo-synthesis occurring from solar photonic quanta with plants that creates oxygen.

"I know someone who knows JYPark of JYP entertainment, can I connect you to him?"

↳| ...reach out to me on FB DM. Transformational essence consulting is the FUTURE for professional music video work and it's what's missing to take the K-Pop infra-structure itself to even greater levels.

I can give energy (essence) consulting and awareness on ANY K-pop performer/artist/idol and compare it to other artists and other performances of theirs.

"I don't get it Rion (oh Jedi master-apparent of the Muse lineage), if the frequencies are INVISIBLE how can we see them again?...like, how can you 'know'?"

Because the physical body is also vibrating energy and we can learn to see the signatures and signs, properties and tones of different archetypes which come across in the entire mix as signs and clues (that which then can also decode and come across as behavior, beliefs, values, thoughts and body language).

It's similar to a sommelier knowing the nuances across the (essenced) spectrum of the wine world and taste the individual subtle flavors in the overall mix or even what region the grapes were sourced from just from taste...it's its own mastery thing.

This has come through years on ongoing assessment, doing readings and verification of really attuning to known archetypal examples and then continuing to cross-reference ie. what vixen looks like (no matter what the nationality of the embodier is), etc. Studying with Rose Rosetree a top energy reader was just maybe 1% of my actual training at the most. Muse Herself is my greatest teacher.

OUTRO

Ok! This about wraps up my Theory of Fotonic Quanta (v1.0).

It did end up being longer than I thought and somehow LONGER THAN 'Uniphied Theory' of which for sure I thought would be twice this length.

I think it's best to keep it compact and SIMPLIFIED without too much clutter around it....it's just that the pages add up! Remember the core of the Theory itself is encapsulated on 1 page and then there's a slew of tenets.

You can always just focus in on that. After all; the core of it is quite profound in its implications for spirituality, consciousness, energy work, image consulting, performance entertainment and beauty itself

I'm not going to go further into decoding PhQ Theory itself here and I've decided not to do an extended warm-up into fotonic beauty itself..but let me give a short-teaser for the final release of this trilogy.

*Imagine...*beyond skin-deep beauty and yet still within the known, yet now expanded paradigm of professional image and visual media workflow...

True Beauty that can hold the sway of (and keys to) kingdoms and oceans in stillness...beauty that is like a lightning strike when she looks at you...Beauty that can steal the breath of paupers, tyrants and kings simultaneously...Beauty that many mortals would die for.

(Maybe you want to awaken such level of soul-stirring beauty influence for yourself)

Such immortal and essenced Beauty that can have all the power of influence from STILLNESS...Beauty that makes men YEARN for deeper connection with you or someone who holds such inherent, divine and social value.

That's Fotonic Beauty...***ALCHEMICAL Beauty that people feel BENDING and TWISTING things within their own soma...***the kind that can peel open layers of a man's icy heart just from its presence without effort. Influence that magically permeates and intoxicates by doing less than nothing.

This is a phenomenon that we're going to dive into more in my upcoming [Fotonic Beauty](#) power report/book; because surely, it's not just about who is the 'prettiest' or 'best-looking' physically...Beauty was always more than ('just') skin deep and I think YOU'VE known it.

Now that Uniphied Theory and Theory of Fotonic Quanta have laid the foundation, we're now talking RADIATIVE BEAUTY similar to someone tanning on the beach and FEELING the photo-chemical and photo-thermal warmth of the suns photonic quanta rays.

Your image and brand can have foto-chemical effects that inspire, awaken and engage your fans, clients and subscribers exponentially while communicating MORE of your truth in full integrity.

With such photo-chemical and kinetic influence; we're also talking about people with whom YOU feel THEIR charisma and allure beyond the limits of your mind like with your favorite stars.

Maybe it's the insatiable intoxication or jaw-dropping gut-punch, maybe it's a 'marry me right now' urge when they didn't even speak and you just KNOW how you FEEL around them....Fotonic Beauty is about really having transformational, alchemical, awakening, healing and deeper impact and influence on your fans, prospects, clients, your social circle and the collective.

Where your image really communicates MORE THAN 1000 WORDS. Ready for that?!

Ok, that wraps up PhQ!

Thanks for discovering this and feel free to talk about it online (with proper attribution when and where necessary)!

Got questions? A testimonial you want to share? You can DM them to me.

-Rion Kati

<https://facebook.com/rion.kati>

p.s. Please try and spell fotonic with the 'f' instead of 'ph' whenever possible when referring to the Theory or PhB (or you can spell it of course with the 'phi' itself as)

p.p.s. I've added some additional support to extend this release (so technically it's shorter than 'UT' if you don't count the next 2 components!)

GLOSSARY

For this release; it made sense to include some simple and general definitions (as well as supportive context) with and around our concept in The Theory of photonic Quanta power report itself here.

This is as an indefinite list (obviously because I'll remember things to add after v1.0 is released). I may also an updated Glossary to the upcoming PhB release.

Simple Definitions:

1-2 Archetypes; Rion's use of primary and secondary archetype essence quanta in doing energy or essence readings of ie. celebrities

ie. JLO is often archetypally Diva-Goddess on stage. Extensions can easily be added to more accurately describe a person's archetype essence reading ie. Vixen-Lover Eros-Queen

64 Siddhis; these are the 64 enlightened qualities in the spectrum of consciousness sourced in the 'I Ching' and 'Gene Keys' which Rion has re-purposed into practically doubling as literal beauty essences of chi signature radiation (of vibe and light truth)

Examples include; *Majesty, Peace, Grace, Unity, Sacrifice, Innocence, etc.*

We won't be delving into these specifics however photonic Beauty v1.0+ should delve into the concept more as working beauty essences for allure transformation and essence consulting

A-B Reality; *Astro-Bio Physical* reality and source of science perspectived 'energy' as referred to in the Uniphied Theory power report. One of the 2 predominant realities.

Activations; a direct energetic transmission from a master to install codes into your energy body to assist awakening of (beauty) consciousness usually with a specific intention or fractal signature

(ie. these are what most of my client sessions are; archetype, gift or siddhic activations which all include energy healing maintenance as part of the session. These can be booked @ here)

Akashic; reference to the 'Akashic Records' where historical and holographic data is stored in the quantum Singularity (generally in the Mental plane or dimension)

Alchemist; one who consciously practices the art of alchemy (usually in my world, referring to transmutation of consciousness)

Alchemy; the conscious practice of transmutation..the metaphorical turning of lead into gold

(usually transmutation of consciousness ie. from shadow or psyche fracture to integration, resolution or siddhic quality; ie. from unworthy frog into worthy prince consciousness and its corresponding presence)

Allure; the engaging expression of feminine essenced chi quanta with and through the human aura (usually female)

(This is my most updated 2023 definition)

Allure; (2021 definition)

“The circulation and expression of multi-dimensional feminine beauty essence in, with and through (her) image and presence”

Allure Factor; a tool to visually gauge the amount of circulation of essenced allure circulating and breathing through a woman's aura on a 0-10 scale

More info @ <https://sexychi.com/beauty-essence-assessment-tools/>

Allure Ratio; includes the Beauty Quotient to assess and maximize physical aesthetics and the Allure Factor

More info @ <https://sexychi.com/beauty-essence-assessment-tools/>

Archetypal Beauty; presence and expression of authentic archetypal essenced quanta (as signature vibe and light-truth) in the plasmic sentience platform of chi evidenced in the human aura of the beholder

ie. Lisa from BLACKPINK has Vixen (and Muse-Vixen) archetypal beauty in the 'Pink Venom' music video

Copyright belongs to respective copyright holders; Used under Fair Use copyright guidelines

Archetypal Beauty really fits within the greater context of Fotonic Beauty itself so look for that upcoming release!

Archetypes; Signature, immortal and iconic God-fractal aspects from the collective unconscious and conscious that exist within the multi-dimensional construct of the Singularity of Sentience (aka 'God')

A fully proper, justified 'best yet reveal' on Archetypes will be presented in the upcoming PhB release itself. You will hear things about archetypes that you've never heard before.

Archetype Activations; In person or remote chi energy sessions that work directly on someone's light body to access and download specific and pure archetypal quanta from the higher-dimensional quantum field into the seat of the soul and auric-chakric embodiment to express more archetypal essenced beauty radiation (aka 'allure')

I/Rion have full access to work with all archetypes through my own initiations in the Muse lineage to do any and all archetype activations (*they do require client readiness and are sometimes denied ie. Daka Priest or Priestess activations*). Muse Priestesses also gain these capabilities.

Archetype Essences; (see 'Archetype Quanta')

Remember quanta is the radiative spirit-truth substance of plasmic matter itself. Essences are literally encoded (usually liquid crystalline) spirit-matter quanta available in multiple dimensions

Archetype Fractal/s; the specific reference to someone who is so embodied with a certain archetype, infused with their soul itself on the causal embodiment and expressive radiation level

Another reference for someone who 'is' an archetype... "that retreat leader is a true queen or goddess" (they're that archetype fractal) or...

ie. Onda from Everglow is clearly a Muse Fractal (aka a 'muse')

Archetype Quanta; (aka 'Archetype Essence')

The literal encoded substance of archetype signature radiant spirit-matter codes or quanta (also known as 'archetype essence') within the Sentient-Singularity or that referred to as embodied in an individual; of any unique or mix of archetypal essence signature/s

Archetype quanta exists as signature multi-band/dimensional frequencies liquid crystalline codes of spirit-plasma matter in the quantum collective of higher dimensions as well as the Akashic Records.

Archetypes and their Spirit-Plasma Matter Light Quanta exist in the quantum Singularity itself (including Akashic Records) as different liquid crystalline signature essences. Many archetypes and their quanta are multi-band and exist within all dimensions except perhaps Monadic.

Not all archetypes exist in the highest dimensions (such as cultural specific or astral-shadow archetypes).

ie. Rion's [archetype beauty activations](#) literally invoke and download essenced archetype quanta (of a chosen archetype ie. Light Lover) into the seat of your soul and the rest of your chakric psyche cauldrons.

Ascension; the general process of awakening to the truth of consciousness, alchemizing sentience from lower frequencies and shadows into greater siddhic truth closer to monadic source

This can also include transmutation into liquid crystal carbon light body only (less dense) form

Astral; referring to the 4th dimension, astral body layer of the aura or the 'astral realm' itself

This is the awareness dimension (which has its own frequency spectrum) where many entities or discarnates exist as well as the sentient realms of hell

Atmic; the atmic dimension within the Singularity of Sentient and/or the atmic aspect of a soul+body's aura

Attunements; Resources that are encoded with higher Truths that work through alchemical transmutation of consciousness through the Law of Resonance

My (Rion's) [Powerliminals](#) are perfect example of attunements and archetype attunements. An important distinction when compared to activations is that attunements CAN be activating although are different in nature than activations. To get the most results from attunements, it is best that one becomes a specialized media alchemist.

Aura; the multi-layered, light-bodied aspect of a soul in a human body with each layer corresponding to higher frequencies sourced in the Singular Sentience

The aura is what allows beauty essence photonic radiation, quantum attraction, connection and energetic influence on others. Many people only focus on the physical and mortal body itself yet the aura is represented of and connected to your immortal and divine self

The auric field is divided into 7 layers to be explored further in PhB.

Auric-Chakric; Rion's inclusive reference to the practical soul+human light-body as both chakric and auric in its prime components

Auric Design; referenced from Human Design profile 'types' there are 4 primary different auric designs amongst humanity that have everything to do with how people relate with them and how they experience life (as well as professional essence and beauty mastery)

The auric designs are 'generators' (~70% of the population), 'manifestors' (~6%), 'reflectors' (!1%) and 'projectors' (~23% of the population)

(φB itself will delve further into the aura and auric designs itself)

Awakening; similar to ascension...the process of individual or collective sentience awakening to that which obscures higher truth including the truth of Spirit and divine nature itself; awakening of consciousness and meta-physical reality away from attachment and conditions of form

Beauty; the alchemical language of photonic light and vibrational radiation from the human aura as the essenced chi-quanta spectrum of Goddess and Siddhic Truth

This (which includes all archetypal quanta) I use as the highest truth definition of Beauty and thereby is codexed for the evolution and ascension of the Beauty industry itself. Remember that holistic beauty includes BOTH your essenced, higher dimensional beauty and your physical form beauty; both of which literally show up and are communicating in ALL visual medium.

The lower truth of Beauty would be the beauty conditioning as we know it that is centralized around soft-maxing aesthetics and accentuating physical looks; the literal superficial beauty of skin-deep form

Beauty Priestess; Rion's concept of 'siddhic sitting' with a woman who has cultivated her radiation to ftonic levels and thereby could transform someone through attunement into coherence with her higher frequency beauty.

The concept is that instagram and beauty influencers could make money 'sitting' for fans as paying clients (or demonstrations) and end up having deeper and transformational impact and influence on their people. Beauty Priestess is inspired from the Muse Priestess concept and the core of it being the Presence of Ftonic, alchemical light-bending beauty itself.

Beauty Quotient; One half ($1/2$, .5 ;) of Rion's 'Allure Ratio'

More info @ <https://sexychi.com/beauty-essence-assessment-tools/>

Body Language; often used as a reference to cue into someone's non-verbal behavior and read intuitive signs about them

Although body language is often accurate; I/Rion views this value paradigm as a more limited way of reading people because it is based

on the physical paradigm with some cues into physiological truth
(usually a mix of etheric, astral and physical)

Buddhic; the buddhic dimension within the Singularity of Sentient
and/or the atmic aspect of a soul+body's aura

(see more in PhB or in the Gene Keys book)

Causal; referring to the causal or soul-centric dimension of sentient
reality as well as the 'causal' body of a soul+person's aura

Chakra/s; the multi-dimensional soul and psyche centers that feed life
force, post-natal chi, codes and other information to and from the
human body and quantum spirit connection. Chakras are entwined
with layers of the aura and its higher frequencies as well

Chakras ARE related to aspects of the subconscious psyche. UT and PhQ are in alignment with popular ancient, practical and working wisdom with the chakras

Yes; chakras can literally be felt by trained energy (chi) practitioners.
All humans have chakras

Chakric-Auric; (see 'Auric-Chakric')

Charisma; the impactful expression of (mostly) masculine essenced chi quanta with and through the human aura (or through a masculinized shell in a woman)

Chi; (aka, 'qi', 'ki', 'prana', 'orgone') The energy format and Presence of the singular multi-dimensional sentience. Also known as Spirit-plasma or 'the force of life'.

(noun)

Chi (also known as 'qi', 'ki', 'prana' or 'orgone') is the multi-dimensional spirit-matter life force energy format of all sentience that is capable to conduct and transmit any and all frequencies of vibrational light and radiation sourced in Spirit reality through the soul+human aura (and other sentient life).

Chi is akin to space plasma in many senses, yet the source of photonic light instead of the sun, is the soul+human aura.

Another term for it is the quantum, divine intelligent 'Presence of God or Spirit' itself (as the platform for any and all frequencies, fractals or archetypes of consciousness).

ϕ Theory values chi as the plasmic 'energy format' sourced in the Oneness of sentient reality (as per Unified Theory which also says that all sentient life has some form of chi including the plant kingdom albeit at lower, limited frequency and access to the spectrum).

When a human or mammal dies, the soul-chi life force leaves the body and transmutes back into the formless into higher pre-existent dimensions of sentience.

To give another highlighting example; reference the scientific, biological universe's value of energy when it comes to the human;

'Energy'

(Oxford languages); the strength and vitality required for sustained physical or mental activity.

ie. *"Changes in the levels of vitamins can affect energy and well-being"*

See how 'energy' is limited merely to physical and biological processes (with humans) from bio-scientific interpretation? This is where nutrition, calories burned and 'energy drinks' or 'coffee' come in to support your daily 'energy' levels to 'wake up productive' and so forth.

Western science simply doesn't translate energy over to the human aura and multi-dimensional consciousness (nor the 'types' of essences as forms of energy because it doesn't essentially accept or respect they are sourced differently).

For example; You're either 'high energy' or 'low energy' physiologically (ie.) according to their lens. How rudimentary!

So we're really missing almost the entirety of everything else including languaging and concepts that work with other prime forms of human energy; therefore it may be time to accept a theory that

does cover everything else (*further research into Unified Theory can help you 'make the case' for chi and the multi-d sentience of Spirit*).

ϕq proposes that 'chi' is the entire missing piece as force of life multi-dimensional spirit-matter or 'sentient energy' itself.

Humans and animals when living all hold and transmit 'chi'.
Accordingly to Unified Theory (and as previously mentioned); so does the plant kingdom but to a lesser and limited degree.

Chi Kung; (aka qi gong) Eastern (Chinese) influenced practice of internal life-force spirit energy cultivation

Practiced for 100's to 1000s of years by qi gong and tai chi practitioners.

Codes; packets of higher dimensional and encoded spirit-matter quanta (ie. ϕotons) with certain qualities within consciousness. Most codes can potentially be accessed and embodied because of quantum connection

ie. "*Different archetypal essences have different liquid-crystalized codes in higher dimensions*" or "one can access the Akashic for ancient Priestess codes"

Consciousness; (see 'Sentience')

I use the term 'sentience' more with Uniphied Theory and PhQ because consciousness is used so often and also because sentience has a more palpable connect with the 'presence' of the breath of life-spirit itself

Dark Archetypes; Dark aspects (and encoded chi-quanta) of the iconic signatures within the collective-sentience

I differentiate between Dark and Shadow aspects where shadow are the destructive, manipulative, corruptive aspects as compared to healthy dark properties like that which is sourced in the dark feminine void or 'womb'.

Example; Dark Eros being more in touch with earthly, clean lower astral, sensual and darker sexual and primal qualities. My Eros attunement (masculine) takes you through both Dark and Light

aspects in the free youtube version. You can also check out the 'Dark Goddess' Powerliminal on my youtube channel

Most archetype quanta activations I do are Light by default unless pre-approved and requested otherwise like a 50/50 light/dark mix or full dark if someone is stable enough.

Divine; generally referring to the meta-physical spiritual reality of multi-dimensional sentience beyond the physical realm...that sourced of spirit and usually referring to highly purified aspects

Divine Feminine; literally the meta-physical spiritual sentience of feminine consciousness and essence (and that which can be practically accessed, embodied and expressed (as spirit-quanta) within soul+bodies; properties of the impersonal and immortal feminine which exists (as codes, quanta, essences) in the collective quantum field

More specifically the archetypal, siddhic, immortal, timeless, Goddess-fractal feminine essence, truth and qualities as tangible spirit fonic quanta that as essences can be embodied and expressed

influencing consciousness, self-identity and self-image beyond the limits of the personalized egoic-self identity and conditioning

Divine Masculine; literally the meta-physical spiritual sentience of masculine consciousness and essence (and that which can be practically accessed, embodied and expressed (as spirit-quanta) within soul+bodies. Aka properties of the impersonal and immortal masculine which exist (as codes, quanta, essences) in the collective quantum field

More specifically the archetypal/iconic, mythic, siddhic, immortal, timeless, God-fractal feminine essence, truth and qualities as tangible spirit photonic quanta that as essences can be embodied and expressed influencing consciousness, behavior, values, self-identity and self-image beyond the limits of the personalized egoic-self identity and conditioning

Divine Union; (see Hieros Gamos, Grail)

Egregore; the concept of psychic conglomerations in the astral dimension amassed around a certain subject

ie. "*the demonic shadow-grid egregore of 4chan trolls*"

Elementals; Elemental chi that is sourced in the spirit-sentient reality and/in how it interacts with the A-B (molecular) Reality; ie. water, earth, air, water chi

Practical for chi kung, tai chi and certain energy work. The human energy (plasmic chi) body as the Tao have known for many years has organs with different elemental qualities or polarity associated with them

Emanation; (see 'Radiance') the concept of either bio-photonic or most always photonic chi radiation as vibe and light truth expression from someone's presence

Embodiment; (see 'Presence')

Referring to embodiment of one or more different forms of spirit-matter chi quanta (aka 'essences') in one's light body.

Energy; Energy as understood, sourced and used in the Astro-Biological Physical Reality.

(noun)

"Power derived from the utilization of physical or chemical resources, especially to provide light and heat or to work machines". (Oxford languages)

There are different definitions and uses of (physical universe) 'energy'.

Examples include nuclear, solar photonic, chemical, hydro-electric, physical-kinetic, etc. as forms of energy.

In other words; φq agrees with all popular science understanding and definitions of energy related to the astro-bio physical universe including the biological functions and processes of animals and humans; yet believes that science is limited to the other prime form

of energy that soul+humans also carry (*which finally opens the door to answer all unanswered questions*).

Energy Healing; classic term for energy healing or vibrational medicine work from a practitioner to, for, on and with someone's energy body

Energy Healing can affect the etheric (physical reflection), astral and other layers on up (based on the power and abilities of the practitioner). Energy healing can have great benefits including lower biological age, de-stress, preventing cancer, healing tumours, wellness, vitality, etc. which can and does affect the physical body itself yet is not the same as Western 'physical' medicine

Although 'energy healing' and energy work are often the terms used, I'd encourage people to start differentiating more between the 2 co-existent realities (as per 'UT'). I, myself (me, myself & Irene) may start exfiltrating and out-processing my use of 'energy' when it comes to working with chi, client remote 'energy' work and quantum connection because it's really all the Presence of Sentience as chi (spirit) energy rather than bio-energy.

Remote Viewing as another example is possible because of quantum connection sourced in the Singularity of Sentience.

Enlightenment; (see 'siddhic') when related to human sentience and consciousness; awakening of awareness to higher frequency impersonal truth and illumination of the Singularity and different signatures of sentience within it (ie. siddhis).

Siddhic enlightenment itself is mixed with the DNA and soul+human's bio-chemistry as well as its connection in the quantum Singularity of Multi-dimensional sentience

Epigenetic; the concept that DNA itself is programmable and influenced by nurture and environment (and not only from genetically encoded nature)

"Epigenetic influences often determine how twins end up being very different later in life"

How I/Rion use the term 'epigenetic' itself is often in relation to PhQ and PhB is in terms of the epigenetic influence of Fotonic Beauty on someone's DNA itself

Essence/s; a signature quality or frequency of spirit-truth as a vibrational/light wave of radiative quanta sourced in the Singularity of Multi-D Sentience itself (and most definitely NOT sourced in the astro-bio physical universe).

Essences radiate from the human aura and are captured and encoded as fotonic light waves which have unique qualities and are also known as signatures of beauty or power itself. *The essences themselves ARE fotonic, alchemical and powerful*; they HAVE that influence; it's just about purifying your consciousness and accessing them for your own expressed beauty.

Yes; essences are codes (encoded spirit matter) sourced in chi-sentient radiation as QUANTA and are classified generally as elemental, auric (Human Design), soul, archetypal and siddhic which as unique codes exist in multiple dimensions. These can include cross-references to divine masculine and feminine essences or codes.

With that said, IN the A-B physical universe - essences can also refer to chemical molecular compounds in some occasions (like essential oils, flower essence tinctures or homeopathy) but how ϕq uses essences is purely sourced in the spectrum of chi-sentient radiation

(See 'Beauty Essences'); There are over 100+ known beauty essences as unique signature flavors of quanta for auric beauty radiance. These include archetype essences (or 'quanta'), elemental, individual soul signature, gift and siddhic essences (124 signatures referenced to the Gene Keys spectrum of consciousness). Sexy Chi introduces these on-site.

E3; Essence, Embodiment, Expression: Rion's terminology as a foundation for transformational charisma and allure work related with the practical light-body, chakric psyche and aura itself.

ie. Archetypal quanta as purified essences is added to the seat of the soul chakra and then channeled (as an activation) into chakric embodiment of each chamber and then activated for expression.

Generally embodiment equates to 'presence' and expression relates to literal breathingness of essences (as chi quanta) aka 'allure' or 'charisma' itself

E3 has been core to Rion's practical charisma and allure transformation work for years and fits right into PhQ and PhB itself.

Etheric; the physical body's invisible counterpart otherwise known as the base of the aura above the physical body itself

Fotonic; (see φotonic) > Another spelling for 'φotonic' that is more romanized.

Also; this is the spelling of the website itself of fotonicbeauty.com although Rion will intentionally and randomly swap different spellings here and there for fotonic (ie. 'φ', 'f', 'ph' or 'Φ') because of the interplay between divine spiritual and bio-physical reality

Fractal; Often referring to an individuated signature lineage, archetype or frequency band, its history and encoding within sentience itself

ie. The Ancient Archetypal Muse fractal has recently bifurcated into a new Grail Priestess fractal of Muse

Fractals; (plural) Often referring to more than one fractal

ie. the archetypes are their own God-aspect fractals (or lines)

Gene Keys; a wondrous method or platform for self-discovery, awakening and alchemical transmutation of consciousness

Also ,the root of the 'spectrum of consciousness' and source reference for Siddhis (and then Siddhic Beauty in Rion's verbiage)

If you are called to explore more @ [Gene Keys](#)

Glossary; an alphabetical list of w--, ok (literally this)

God;

Haha..Ok...fine! I will add that Uniqiied Theory would propose God as 'all that is'; adding together both the astrological space-cosmos and

biological reality with all of its 'energy' PLUS the Monadic Singularity of Multi-Dimensional Sentience Itself.

For more consciousness research, look into the first book in this trilogy; 'Unified Theory'. Rupert Spira and Dr. David Hawkins are other top recommendations. UT proposes religions themselves as different fractals within the Singularity.

Golden Ratio, The; (also known as '*phi*' or ' ϕ ')

The number phi, often known as the golden ratio, is a mathematical concept that people have known about since the time of the ancient Greeks. It is an irrational number like pi and e, meaning that its terms go on forever after the decimal point without repeating.

Over the centuries, a great deal of lore has built up around phi, such as the idea that it represents perfect beauty or is uniquely found throughout nature.

-<https://www.livescience.com/37704-phi-golden-ratio.html>

Grail; short-form for 'sacred reunification', 'reunified', 'hieros gamos', 'sacred union' or 'divine union' referring to divine (archetypal and siddhic higher dimensional) masculine and feminine consciousness

ie. The Grail Archetypes are especially rare and powerful

Grail Magii; the few in the world who are activated, reunified in divine masculine and feminine consciousness and are able to serve transformational work to others on their grail path

Ie; *“Rion and the Muse Priestess are Grail Magii”*

Grail Priestess; A woman who has been activated into priestess service and is also reunified in her psyche, consciousness and allure in relation to the divine masculine (aka 'grailed')

ie. Muse Priestess is a Grail Priestess within the new Muse fractal line. Other grail priestesses may be Sophia or Rose line priestesses

To find out more, please visit <https://grailpriestess.com> As a universalized concept and term; Rion doesn't 'own' Grail Priestess, nor is there any one single woman who can claim herself to be 'THE' Grail Priestess (archetypes belong to the collective). With that said, Rion is a sentinel and guardian for the concept of Grail Priestess.

Grid-working; 4D+ sorcery that is done to affect grids, energetic constructs, aggregates or egregores (usually in geo-physical locations)

Use it in a sentence today; ie. *'Rion Kati is arguably L.A.'s most powerful grid-worker'*

Hierogamy; the alchemical fusion and experience of Reunified Sexual Love between God and Goddess consciousness in the bedroom...it is templated in 'divine union' and is a relational template far beyond soulmates

Hieros Gamos; a Greek sourced term for 'sacred union', reunification or 'divine union' of God consciousness masculine and Goddess

The future of the relationship market; hieros gamos is beyond soul-mate or twin flame templates. Rion is a Source Remembrance Hieros Gamos guide as well as Grail Magii.

Holy Grail, The; My definition will not be revealed here!

Please reference my/Rion's 'Calling of the Kingmaker' report @ <https://grailpriestess.com>

Human Design; an incredibly practical and powerful method of spiritual and self-understanding

Inspiration for Gene Keys as well as Auric Design. More info @ jovianarchive.com or youtube searches

Image; the photonic or fotonic multi-dimensional capture or recording and representation of light information

Fotonic image (always the case with humans) always includes higher dimensional plasmic vibrational and light information beyond the visible spectrum itself

(Note; the Fotonic Beauty report itself will feature more images and examples OF fotonic beauty as I chose to keep PhQ really streamlined)

Kingmaker; (see Grail Priestess) a woman embodying divine feminine qualities usually in a priestess role in service to and awakening of the divine masculine consciousness into Kingship (often working directly with private, paying clients)

Interested in more? Discover my/Rion's 'Calling of the Kingmaker' @ <https://grailpriestess.com>

There's also the [Grail Priestess Powerliminal](#)

Law of Resonance, The; the power of coherence and alchemical attunement to a stronger (amplitude) or higher frequency...similar to a tuning fork of the same signature that resonates across the room and makes sound when one is struck

The LOR is a means of alchemical transmutation of consciousness from lower frequencied consciousness or experience through attunement into resonance and coherence with a higher frequency or higher truth

Rion's [Powerliminal archetype attunements](#) for example work magic through the Law of Resonance to 'attune' to archetypal truths

Light; referencing of the entire EMF spectrum when referring to the Astro-Bio Physical universe/reality (A-B) including all frequencies including and beyond the human visible spectrum AND the nature of radiation of chi as its own frequency spectrum of the multi-dimensional Singularity of Sentience

Light quanta itself (which comprises everything we see and higher frequencies we cannot see; including in photographs) is photons and ϕ otons (corresponding to the source of energy and chi respectively to both bio and spirit realities)

Light also represents the general higher frequency nature of vibrational sentience as its spirit-truth testament (chi). Gene Key related universal 'siddhis' for example would have their own signature essence light truth.

Light-Truth; a short-hand reference to key into someone's authentic auric light radiation (usually causal layers on up). Often used in relation to specific essences, codified state of mind, mood or tone

ie. 'You can really feel that artist's (archetypal beauty) Muse light-truth in that latest music video...it's really powerful'

Lightworking Codes, The; Rion Kati's literal methodology for chi-based in person and remote energy healing and essence activations; sourced in the Muse lineage but drawing upon some aspects of basic chi kung and reiki

Only Muse Priestesses and any select future apprentices would be initiated and learn this versatile and powerful format of chi energy work (including healing and activations)

Meta-Physical; the general referral to that which practically exists beyond the physical dimensional (aka 'the 3rd dimension according to Uniphied Theory' and other spiritual teachings)

This can include the etheric layers of the soul+human on up, discarnates, thought forms and so forth; usually all referring to the spirit-nature of the quantum singularity as compared to particle physics

Monad; another term for the Singularity of Sentience, God or Oneness itself at its highest Truth-nature

Monadical; the quality of the Singularity and its quantum connection through which all sentient and multi-dimensional life and awareness is connected

Multi-Dimensional; Referring to multiple dimensions or frequency layers usually within the spectrum of multi-dimensional sentience and its vibrational and light emanation

When referring to the aura, layers corresponding to the same dimension of consciousness ie. causal layer with the causal frequency dimension

See Uniphied Theory @ fotonicbeauty.com for more information on the Dimensions of Reality

Muse; an ancient, Divine Feminine, prime Grail archetype Goddess (Sophianic) fractal. Aka 'The Queen of Celebration, Music and Dance'

Discover more with the [Muse Attunement](#)

(Note; I'm not listing all known archetypes here in PhQ, yet chose to highlight this one and could write books on Her)

Muse Priestess; a woman trained and initiated into the Muse Priestess Source (or other sprouting) lineage as a Kingmaking Grail Priestess with levels of photonic, alchemical beauty herself and many priestess skills and powers

Note; Rion Kati is the guardian and key-holder to the Muse Priestess Source Lineage. The first graduates will be in autumn 2023 and revealed publicly.

Phi; (see 'φ') The Golden Ratio as used in mathematics and physics.

Photography; the technical and artistic skill and method of capturing photonic light images

Photons; subatomic light particles which can act both as waves and particles sourced in the non-sentient physical, mechanical universe (sourced in Einstein's work)

Photonic; the nature of light itself in the physical and quantum universe as in being of subatomic light particles (of photons).

Radiation or Light in the EMF spectrum exists as different frequencies including invisible ones outside of our visible spectrum and yet they are still photonic (ie; photonic gamma or solar sun radiation)

Pixel; *"In digital imaging, a pixel(or picture element) is the smallest item of information in an image. Each pixel is a sample of an original image, where more samples typically provide more-accurate representations of the original."* -Northcoast photo

Pixels are the smallest indivisible transversions of photonic (light) information into a digital visual format -Rion

ϕ ; (pronounced 'phi' on its own or the 'ff' sound when in a word which replaces 'ph') the Greek concept in physics and mathematics known as the 'Golden Ratio' (see 'Golden Ratio, The'). I use it as defined in this Glossary and through the Theory of ϕ otonic Quanta

Note; 'φ' is also also the Russian/Ukrainian alphabet version of 'f'

φotography; (aka 'fotography') Visual images or photos of humans denoting their source and encoding of φotonic radiation

Note; ALL photography of humans is effectively φotography, it just simply helps to source the type of energy (chi) as different from non-sentient photonic light

The difference between general photonic information and φotons gets quantum fast because anything as φotonic light is sourced in the Singularity and thereby holographically accessible by advanced psychics like myself to 'read or decode certain information' even without seeing the image

φotonic; (aka 'fotonic') the nature of sentient sourced chi radiation

The radiative nature of spirit-plasma vibration or light which can be transmitted through the multi-dimensional sentience platform of chi (ie. through the human aura) which can also be recorded and captured (and decoded) in 'normal' visible spectrum photons.

It's important to highlight that photons and φotons can co-exist because of the fusion of both non-sentient and sentient reality ie. any photos of humans include both photons and φotons as φotons are transcoded mechanically into digital media for example as literal photons. Basically it takes practical psychic awareness to decode and see the φotonic chi essences and qualities that exist beyond the physical.

φotonic Beauty; Feminine or biological female auric vibrational and light radiation that has alchemical, transmutational and epigenetic influencing levels of power whether in live presence or through encoded* visual media

Also known as beauty, live embodied presence or visual image media of a feminine being that has φoto-chemical, radiative influence

For the masculine, see 'φotonic Charisma'

*(*All visual medium of humans ARE holographically encoded as φotonic data; it's just that fewer people have the higher frequency 'star' quality of auric vibration and light radiation from chi essences that bends and attunes other people's psyche's, DNA and aura itself)*

(Note; This PhQ v1.0 definition for sure will continue going through other upgrades towards more clarity)

photonic Charisma; Masculine essenced or biological masculine human auric vibrational and light radiation that has alchemical, transmutational and epigenetic influencing levels of power whether in live presence or through encoded* visual media

Also known as photo-chemical presence (and sometimes 'swag').

Essentially, true charisma itself IS photonic with it's higher frequency plasmic-chi radiation; it just helps to describe what's going on more accurately

photonic Gaze; a reference to alchemical, epigenetic influencing levels of multi-dimensional power or beauty in and through someone's eye contact

photons; Individual spirit-sourced plasmic chi LIGHT particles or quanta (ϕ otonic truth-matter) of any frequency, dimension, code or quality

ie. That one artist (Sana here from TWICE) is especially encoded with (and emanating of) Lover-Muse ϕ otons

Copyright belongs to JYP Entertainment. Used under fair use copyright guidelines

Remember, the difference between photons and ϕ otons is that photons are sourced in the astro-bio physical reality of 'energy' known to science and photography vs. ϕ otons are light particles (aka 'essences') from the sentient-spirit reality of ϕ otonic Beauty itself.

The Beauty essenced photons themselves literally cannot and do not exist as sourced in the mechanical universe itself (ie. on a rocky sea cliff overlooking the Gold Coast *which you can visualize*).

Plasma; (in the Astro-Bio Physical universe) a charged, ionic state of matter like an electron soup most similar to a gas that can generate its own photons and can act as a medium for other frequencies to be conducted

99%+ of the visible universe is plasma. Earthly fire, aurora borealis and the sun are plasmic

"Plasma is often called "the fourth state of matter," along with solid, liquid and gas. Just as a liquid will boil, changing into a gas when energy is added, heating a gas will form a plasma – a soup of positively charged particles (ions) and negatively charged particles (electrons)." - https://www.psf.mit.edu/vision/what_is_plasma#

(See additional 'plasma research' towards the end of this report. We're not referring to blood plasma).

Plasma, Chi; (chi plasma) Unified Theory and Theory of photonic Quanta propose that the format of 'chi' (as presence of Spirit-

Sentience) is spirit-plasma rather than 'energy' as known in the mechanical universe

Power; A-B Reality version

(noun) Oxford Languages

1. the ability to do something or act in a particular way, especially as a faculty or quality.

2. the capacity or ability to direct or influence the behavior of others or the course of events.

"she had me under her power"

My definition 2023:

Power; (in the world of fonic beauty refers to) embodied power as quality and quantity of chi quanta in ones Presence; generally the masculine quality of embodied spirit life-force (chi) whereas 'beauty' is the more feminine essenced embodiment of spirit-sentience quanta

Presence; the vehicle through which God-Spirit and all Feminine Light-Truth as Sentience could emanate with and through someone radiantly in the moment of now

I understand there are other definitions, but we're sticking with PhB related termina

Priestess; ((referring to the archetypal, general Priestess or (when lower case) 'priestess' as an individual priestess)) Priestess is a divine feminine consciousness as an archetypal identity that has sacred healing powers, is usually initiated (into a lineage or 'fractal') and is in soul service to others (whom may often be qualified to work with her)

And yes; of course there is encoded Priestess fotonic quanta itself as essence; the conscious-sentience is imbued with it

Psychic; the general ability to sense, read, interpret or decode etheric, astral or higher dimensional truth qualities about someone or something. Heightened perception.

φq and Rion both value the practicality of interpreting higher dimensional truth rather than the more 'subjective interpretation' or future reading cliché of 'psychics'.

Photonic Quanta; batches of photons as energetic (bio-physical) light particles that would be AS electro-magnetic or simply frequency vibration and light; these (when spelled as 'ph') are sourced in quantum physics and the popular science itself of the astro bio-physical reality

This is a KEY definition right here! (Disclaimer; it might be slightly different than the theory introduction)>>

φotonic Quanta; batches of φotons chi light particles (spirit-sentient) that may be of similar or varying frequencies

φotonic Quanta emanates or radiates from angels for example in higher dimensions but normally and for practical purposes; φotonic quanta emanates as sentience-radiation from humans. It is the more specific spirit-particles or 'codes' of spirit-matter

All of which when emanated from humans would be captured as encoded photonic data in photography or video whether it is visible or not (remember; we're used to just focusing on 3rd form).

Another way to think of photonic quanta is the plasma-matter of multi-dimensional light essences (as in the actual Goddess presence 'matter') which would be captured in media whether in the visible spectrum or not (*the good news here is that yes you can learn to 'see' them because higher frequency essences DO mix with the energy of the physical body itself so we can translate and decode them*).

Note: This is the literal definition and remember that the 'Theory of PhQ' is a longer short-form and then paragraphical concept itself

Another note; practically in doing allure transformation work and with photonic beauty, it's more realistic that someone is going to have a MIX of archetypal or siddhic photonic quanta (or 'light' expression essences) in their energy body rather than only one pure frequency essence

Quanta; a plural amount or batch of subatomic particles either from the Astro-Bio Physical reality of 'energy' or the multi-dimensional sentience of 'chi'

Usually we will refer to photonic or ϕ otonic quanta as light particles (which can also act as waves according to Einstein's proven theorem)

Quantum; an individual particle from either the energetic bio-physical reality or chi particle/code (spirit-sentient reality) that cannot be broken down any further; the smallest possible unit of ie. light = photon (as a quantum) or an electron quantum

Other examples could be; a Goddess ϕ oton quantum or a Vixen ϕ oton quantum of encoded chi spirit-light particle (which would be roughly translated into photonic reality as a Goddess pixel) JLO often embodies Goddess.

Quantum Connection; the general ability of soul+humans to be connected in the full range to all dimensions and aspects of consciousness because of the quantum nature of the Singularity which is Monadic at its highest Truth

This framework sourced in the Singularity of Sentience-Spirit includes access to psychic powers, akashic records, remote viewing, remote healing, power of prayer, etc.

Quantum Mechanics; (wiki) Quantum mechanics is a fundamental theory in physics that provides a description of the physical properties of nature at the scale of atoms and subatomic particles. It is the foundation of all quantum physics including quantum chemistry, quantum field theory, quantum technology, and quantum information science

Quantum Physics; Quantum physics is the study of matter and energy at the most fundamental level. It aims to uncover the properties and behaviors of the very building blocks of nature. While many quantum experiments examine very small objects, such as electrons and photons, quantum phenomena are all around us, acting on every scale. - <https://scienceexchange.caltech.edu/topics/quantum-science-explained/quantum-physics>

Radiance; (when referring to humans or animals) the concept of either bio-photonic or most always photonic chi radiation as vibe and light truth from someone's presence

Radiation; (A-B Reality) Radiation is energy that comes from a source and travels through space at the speed of light. This energy has an electric field and a magnetic field associated with it, and has wave-

like properties. You could also call radiation “electromagnetic waves”
- https://www.cdc.gov/nceh/radiation/what_is.html

Sentience; (see 'Uniphied Theory' for further exploration) the multi-dimensional Omniscient Observer of monadic God consciousness; the spirit of life itself through all living things as witnesser with spirit-sourced chi denoting the 'presence' of sentience itself

Siddhi; enlightened, high frequency qualities or signature essences within the Spirit spectrum of sentient radiative chi. Usually I center these around the 64 siddhis referenced as core of the Gene Keys wisdom yet it can refer to any enlightened quality and its emanation

Siddhic; the overall quality of a siddhi or siddhis (see 'Siddhi')

Siddhic Sitting; the concept of alchemically attuning to the presence of someone (like an authentic spiritual guru or starlet) with ftonic levels of alchemical beauty or charisma radiation..a direct form of

alchemical transmutation of consciousness via attunement which works through the Law of Resonance

Sophia; the Divine Feminine aspect of God and God consciousness.

Arguably, the Monadic is split with the Divine Feminine or Holy Mother aka 'Sophia'. Gnostic Sophia Principle was historically known and yet suppressed throughout religious history. The Hagia Sofia is part of this. Sophia in many ways was and is a threat to most patriarchal religions and their values or doctrine.

Dark Sophia btw has been completely hijacked by astral forces and is essentially the inverse of Light also known as the Dark (Shadow) Mother; there is no known pure dark Sophia consciousness whereas other Dark archetypes can be access in purity. Theocratically one could argue that Sophia is the 'Mother' of Gaia as well as all other divine feminine ancient archetypal fractals.

Sophianic; referring to the Sophia principle or codes

Soul; the true identity of an individual (which carries quantum connection to the Oneness of Spirit) that resides in higher dimensional sentience Singularity and yet can incarnate into a physical vessel or body

Soul+Body; (*see Soul+Human*)..Rion's reference often to the more accurate definition of human light-body and body setting a foundation for multi-dimensional allure transformation rather than just aesthetic physical mastery

Soul+Human; the more accurate definition of what humans are; used to delineate from only being physical and to remind that we are both primal and divine

Soul Signature; generally referring to someone's unique soul essence, embodiment and expression

The more conditioning someone has in their chakric psyche, the more convoluted and less room there is to literally embody and exude soul vibe and light emanation

Spirit; (see Unified Theory) The source of all sentience. The general term for the multi-dimensional sentience behind with, through and of all living things through all of history itself; also known as Oneness, Singularity, God

Spirituality; the awakening journey and discovery of exploring the greater truth of (and one's identity in) the singular multi-dimensional sentience

Swag; a slang term for a man with palpable photonic-kinetic charisma + unique style

Tai Chi; (aka 'tai qi') Eastern, Chinese sourced practice of energy cultivation with form movements; similar to Chi Kung, however focused more on extrinsic heaven and earth energies (chi)

Theory of photonic Quanta; (literally, this)

Rion Kati's theory that provides the foundational beauty+charisma science and infra-structure for professional essence consulting and transformation

Unified Theory; my/Rion's 'theory of everything' which is always available @ <https://fotonicbeauty.com>

Download the full pdf to immerse into Unified Theory on site there.

Vibe-Truth; a short-hand reference to key into someone's authentic astral (4D) or astral-kinetic radiation. Often used in relation to specific essences, codified state of mind, mood or tone

ie. 'You can really feel that artist's vibe-truth in that latest music video...it really sets a mood'

Vibrational Universe; the underlying reality of the A-B Physical universe including quantum physics and the new discovery of astrological gravitational waves

(<https://www.yahoo.com/news/experiment-reaches-across-galaxy-heard-113000108.html>)

(See *Law of Resonance, The*)

'UT' and 'φq' propose that the spiritual reality of sentience is also a vibrational spectrum of reality that isn't sourced in EMF; yet rather in multi-dimensional sentient consciousness itself (also known as 'the spiritual')

Zootopia; an animated movie from the Disney studio while ago

>Doubling as a closure to this glossary.

PHOTONIC RESEARCH

Note: I've decided to add some of the relevant research I've done around photons here for relevance and additional context support. Future versions of PhQ as official releases will delve further into details of φ otons (chi sourced light radiation) and a more advanced study of the human aura from which φ otons primarily emerge.

φ otons are photons in the sense that we still live in the astro-bio physical universe, however it's important to differentiate their source (otherwise we're just equating ourselves and our beauty with weak IR bio-photons only).

Undoubtedly there are many other similarities between photons and φ otons as we know; thusly from here forward the research will still continue to further strengthen the Theory itself.

I'll also note that this power report (being the middle of a trilogy) is meant to introduce my Theory of φ otonic Quanta and that the prime report of 'photonic Beauty' itself will delve more into the bigger picture as well as deeper research around the scope of the project including the epigenetic influence itself of φ otonic beauty on others.

PhB (Fotonic Beauty) itself is really a heretical and daunting project (building upon Uniqpied Theory and Theory of φ otonic Quanta); so I

may have to release 2 versions (of 1.0); a short, consumer friendly version to beauty and social influencers as well as an unabridged version that includes the deeper research and all the extensive things that I wanted to include in it. It already seems like an editorial nightmare with all the loose scraps of content I have around. Anyways...here is some more (A-B Reality) photonic research (with resources cited)...

;

Google;

Related to capturing photons; It is the energy in each photon of light that causes a chemical change to the photographic detectors that are coated on the film. The process whereby electromagnetic energy causes chemical changes to matter is known as photochemistry.

Light direction, light intensity, light colour and time are the four dimensions of light.

The energy E of a photon is equal to $h\nu = hc/\lambda$, where ν is the frequency of the electromagnetic radiation and λ is its wavelength. Energies in quantum physics are commonly expressed in electron volts ($1 \text{ eV} = 1.6 \times 10^{-19} \text{ J}$) and wavelengths are typically given in nanometers ($1 \text{ nm} = 10^{-9} \text{ m}$).

Is all light a photon?

Not only is light made up of photons, but all electromagnetic energy (i.e. microwaves, radio waves, X-rays) is made up of photons. The original concept of the photon was developed by Albert Einstein. However, it was scientist Gilbert N. Lewis who first used the word "photon" to describe it.

A photon is a tiny particle made up of electromagnetic waves. They have no mass and no charge. You can think of them as a tiny packet of light energy. A photon is an example of a quantum, a discrete packet of energy or matter.

;

Source: <https://physics.stackexchange.com/questions/669436/why-does-light-have-multiple-frequencies>

Photons are the carriers of all forms of electromagnetic (EM) radiation, not just light

The different types of EM radiation correspond to different amounts of energy per photon. Gamma ray and X-ray photons have the most energy, radio frequency photons have the least energy, while ultraviolet, infrared, and visible light photons have intermediate energies

Light is made up of individual photons and like you said photons get their energy at the source. Depending on the amount of energy it receives, a photon can have any frequency.

Once it is emitted, the wavelength of a photon does not change (if we ignore cosmological redshift due to the expansion of space). But different photons can be emitted with different wavelengths

There is no magic to it other than "they get emitted at different frequencies

**Do photons exist at all possible wavelengths? Yes.*

With change in medium, the speed and wavelength of the photon change but frequency does not change.

*The energy of a photon is directly proportional to the frequency of light with which it is associated.

*Although photons don't have mass, they do have momentum because they are moving (fast!). The higher a light wave's frequency is, the more momentum it has and the more energy it carries,

..Just as larger masses equal higher energies. Gamma rays have higher frequencies than radio waves, so they have higher energies

The sunlight is made up of tiny “packets of light” called photons, that originate in the Sun's core. The photons are born in a nuclear fusion, when hydrogen cores smash together to make helium. As a byproduct of this reaction, a huge amount of energy is released in the form of photons.

Radio waves have photons with the lowest energies. Microwaves have a little more energy than radio waves. Infrared has still more, followed by visible, ultraviolet, X-rays and gamma rays.

Einstein believed light is a particle (photon) and the flow of photons is a wave. The main point of Einstein's light quantum theory is that light's energy is related to its oscillation frequency.

A photon doesn't lose energy unless it collides with a particle

Light is definitely not a molecule. It has no rest mass, no protons, no neutrons, no electrons.

Light exists in tiny packets called photons. Photons have no rest mass and they do not occupy any volume. So light is not matter. It is the radiation of energy.

;

Source:

**Yes. In fact, photons are the only things that humans can directly see.*

A photon is a bit of light. Human eyes are specifically designed to detect light. This happens when a photon enters the eye and is absorbed by one of the rod or cone cells that cover the retina on the inner back surface of the eye. When you look at a chair, you are not actually seeing a chair. You are seeing a bunch of photons that have reflected off of the chair. In the process of reflecting off of the chair, these photons have been arranged in a pattern that resembles the

chair. When the photons strike your retina, your cone and rod cells detect this pattern and send it to your brain. In this way, your brain thinks it's looking at a chair when it's really looking at a bunch of photons arranged in a chair pattern.

A camera captures the patterns in the photons coming from a chair and stores the information as bits of electricity. A computer screen then uses this information to recreate the photon collection and you see a picture of the chair.

**Can light turn into energy?*

This is called the photoelectric effect. In 1921, Einstein received the Nobel Prize for his work explaining this. Photovoltaic cells are based on a related phenomenon called the photovoltaic effect, and they convert light directly into electricity.

Photons carry solar energy

A PV cell is made of semiconductor material. When photons strike a PV cell, they may reflect off the cell, pass through the cell, or be

absorbed by the semiconductor material. Only the absorbed photons provide energy to generate electricity.

**Can light generate force?*

Yes indeed, light can generate a force. I remind you that the full relativistic formula for energy, mass, and momentum is $E^2 = m^2c^4 + p^2$. Although photons have no rest-mass, m , they do carry momentum p . Now a force is generated by a transfer of momentum so a light beam incident and absorbed by an object will experience a force. This can be easily verified in the lab with a laser beam.

(Note; reference laser surgery scalpels and med tech gear that are photonic in nature)

Can humans emit photons?

Chemical reactions within your body, besides liberating energy and producing heat, are also emitting small numbers of photons, elementary particles of light. The glow is strongest in the late afternoon, and around the lower part of your face

(Rionski note; this and other research points to the astro bio-physical perspective of humans only having 2 inches of bio-photons)

;

Light is very strange. Sometimes it is best to think of light as a series of waves. At other times, it is useful to think of light as a swarm of particles. When we think of light as particles, we call those particles of light "photons".

Photons are the carriers of all forms of electromagnetic (EM) radiation, not just light. The different types of EM radiation correspond to different amounts of energy per photon. Gamma ray and X-ray photons have the most energy, radio frequency photons have the least energy, while ultraviolet, infrared, and visible light photons have intermediate energies.

Electromagnetic radiation is the result of oscillating electric and magnetic fields. The wave of energy generated by such vibrations moves through space at the speed of light. And well it should... for visible light is indeed one form of electromagnetic (EM) radiation.

X-rays, radio waves, gamma rays, and infrared and ultraviolet "light" are the other main types of electromagnetic radiation. They are all

traveling vibrations of electromagnetic waves, each with its own characteristic wavelength. Organized in order of wavelength, they make up the electromagnetic spectrum.

Sometimes it is useful to think about electromagnetic radiation as though it came in packets. These packets of EM radiation are called "photons".

There is a second main type of radiation, which is the result of subatomic particles moving at very high speeds. That type of radiation is called "particle radiation".

Photons per Pixel - 3 μm ² Pixel Pitch	0.028	280	14,000	28,000	140,000	280,000	4.2x10 ⁶	2.2x10 ⁷

For the purposes of this section a photon is a particle of light. Photons are discrete particles, (ie you can't have half a photon), and are the embodiment of energy in electromagnetic form. Their energy is precisely quantised, (thanks to the quantum theory), and this energy determines the colour of the light. The higher energies are blue, the lower red, and green is in the middle. Light energies extend beyond the visible spectrum but we don't need to cover that here.

<https://www.symmetrymagazine.org/article/eight-things-you-might-not-know-about-light?>

The higher the frequency, the more energy, and the higher the amplitude, the more energy.

Photons are easily created and destroyed.

The movement of electrons is responsible for both the creation and destruction of the photons, and that's the case for a lot of light production and absorption. An electron moving in a strong magnetic field will generate photons just from its acceleration

The energy of a photon depends on radiation frequency; there are photons of all energies from high-energy gamma- and X-rays, through visible light, to low-energy infrared and radio waves. All photons travel at the speed of light.

It is the energy in each photon of light that causes a chemical change to the photographic detectors that are coated on the film. The process whereby electromagnetic energy causes chemical changes to matter is known as photochemistry.

;

The motion of electrons and ions in plasma produces its own electric and magnetic fields. Because of the totally chaotic and highly energetic state of the constituent particles of plasma, it produces its own electromagnetic radiation. -Source:
