INDEX

These are the components of the 'Uniϕied Theory' (aka 'Unified Theory') v1.0 itself. As we go along there will be relevant usage recommendations plus supportive thought-flow accordingly.

UT PROLOGUE:

Extended Prologue

UT SYNOPSIS:

UT OVERVIEW:

PART A:

The Uniϕied List Of Psychic & Spiritual Phenomenae

PART B: Tenets of Uniϕied Theory

PART C: Supportive Discourse & Outro

(Note: I'm competent but sorry; the Microsoft Word I'm paying for literally won't put in bookmark hyperlinks anymore; we're talking 1996 here Jurassic, so you'll have to manually scroll down until a fixed update. I could literally show you a screen-capture of its inability. Thanks)

PROLOGUE:

Welcome to this special report!

I am very excited to officially release this for you and the world - even though it kind of came as a necessity while I was working on a different project (Φotonic Beauty).

Like myself, you're probably a seeker. I, myself have always sought a deeper truth into things like life, beauty, sex, creation, consciousness and God....the nature of reality. You may also have an appreciation for science and even aspects of religion/s, yet also feel that there are some inherent limitations with it like I did.

What makes something so beautiful in nature or human life that it transcends its physical nature into another realm?

Is there such a thing as God?

How is all of this possible? How are some things so powerful, mythic and wondrous? What created it all?

Is there really something more than just the mechanical universe?

How is it that there is both the mundane and mystical/magical?

If we are just biological beings, then how is it that some people have accepted something 'greater'...something seemingly 'closer to source' integrated into themselves like stars and starlets?

Like many people; I was brought up in a fairly religious background: Pentecostal Christian in my case (however we also went to Protestant churches here and there in central Wisconsin, USA).

Interestingly; I got to see some things that would defy Science when I was younger and many other things afterwards (like chairbending in stillness).

Many of such things would be denied by science or called 'phenomena'.

It's easy to be skeptical from a purely scientific or atheist perspective and yet there were far too many unanswered questions and mysteries for me that they couldn't cover...I never felt satisfied with especially what was a 'Western' scientific outlook on things. I also never resonated with Atheism.

And although I've largely disconnected from my Christian upbringing; in an ironic way I am far more spiritual since then (although to the church it would seem that I went on a 'secular' path).

I think that you may also discover that what is being presented here may connect a lot of seemingly disparate things together for you as well.

The past 20 intense years of my spiritual growth and now with this Theory; I sense things are reunified in a grand sense for me with all kinds of new wisdom that is still decoding and unpacking; especially considering my integration of the Divine Feminine and The Holy Grail; that which most religions have suppressed (I go into this more @ <https://grailpriestess.com>).

It was a long, twisted, winding road getting to this point, so hopefully this Theory will be of immense contemplational value for you.

Often, the more I discover the boundlessness of Spirit (not merely limited to everything 'zen' mind you); it seems the less I know....for there are truly great mysteries that are both Invisible and Invincible; power of the great and small...how connected we are to it all at the microcosmic and the macrocosmic scale...could it be possible that ALL of it is divine?

How about 'all that is'?

And if it is, would that include the possibility of immortality and to truly know what Cosmic Love and Devotion is itself? Hmm...

Note: For obvious reasons, I will often refer 'Uniqied Theory' henceforth in shorthand as 'UT', 'The Theory' or 'Theory'. ALSO, I may freely interchange spellings between Photonic,

fotonic & Φotonic as well as between 'uniphied', unified' and 'uniφied' with or without "". I may also refer to 'PhB' as Φotonic Beauty and 'PhQ' as Φotonic Quanta (Theory).

With that said;

This premiere of 'Uniφied Theory' is especially for you if you are on a spiritual, consciousness or meta-physical path of any kind. Maybe you've dared to step outside the window of a certain religion to just see things from a different perspective. A lot of people in my social circle have been involved heavily in spirituality - and yet, even that can have its limitations or distortions that can taint the purity of things; Yet are we going to throw the baby out with the bath water so to speak?

This resource may even be for you if you are finding limits within Science itself (you might even BE a scientist or physicist). Maybe you want more security and assurance in the meta-physical or are simply searching for deeper meaning.

This may also be for you if you are in moments of existential dread or even confusion around religion, spirituality, beauty, death and 'God'. No promises, however.

The Theory as it is presented in this book is in an easy to consume format. Much of it centers around Part A: The Uniφied List itself after my years of being involved, apprenticing, serving and studying spiritually.

In compiling such a very powerful and implicated 'unification list' of psychic and spiritual phenomena, I want to be clear that I am fully respecting all of these for what they are and without judgment; even the darker things (at least in this context). I think that what often happens in religious and spiritual circles is certain things are cast aside and REMAIN in shadows or judged in ways (yet understandably so). Well; UT here counters all of that in its open, honest, transparent presentation of a plethora of phenomena.

It might be triggering to see 'demons' and Hell's Angels mixed in with ashrams, temples and arch angels, yet that is to empower the entire concept itself as you will soon see..to bring you clarity.

I'm not taking away any of their thunder; in fact, I'd say that in the context of presenting this, I am edifying and amplifying the mythic zeigeist of each of them for YOU to explore and contemplate.

In presenting Unified Theory to you and the world; I also don't want this to only be an egoic thought exercise. I want you to FEEL the implications of each item on the list as much as possible (when and where it fits). Engage your heart and soul (if you believe in such a thing ;)

In working with 'The Theory' and your ongoing reference back to the Unified List; I would want you to connect to your own gnostic experience with any of them...reflect on it and perhaps your active and previous projections towards them as you go through (in deeper levels of discovery).

Maybe there was an experience that turned you away from some of these or some of them do seem to 'conspiratorial'.

Maybe you're only about the Light without at least admitting there is Dark in a meta-integrative sense at least.

I would encourage you to be open and feel and contemplate the DEEP weight involved with each and every one of them for example for yourself and in the collective;

"What have been my previous projections or thoughts towards this?"

"What is the fullness of this spiritual phenomena (that I may have been skeptical of before)?"

"If Light exists, could Dark exist also?"

"Can I see how Scientific perspective is limited and does that help me believe in this even more or not?"

"What if some aspect of it WAS real even if Science couldn't explain it?"

"Am I not connected to all of this anyways and at what levels?"

"What are my past experiences that would also confirm and support the overall concept itself?"

"Can I respect its fractal INFLUENCE in anthropomorphic human history with all of the energy and influence involved with it (despite often Science's neglect towards it)?"

"If this is true, could all of these divine gifts and possibilities be more accessible to me?"

I'd question and cross-reference things that you aren't used to, ie.;

"Even though this religion has this one way of doing things different than mine (and any self-righteousness associated with it), could I see how it could be connected to the overall unifying concept itself? Could I respect that?"

"Are 'Conversations with God', the 'Bhagavad Ghita' and 'The Bible' ultimately still talking about the same meta-source?"

"How does Science and atheism look now compared to the existential and historical weight of these numerous spiritual mainstays?"

"Is it really all 'cons' or 'woo-woo' magic that can be explained away by science?"

And you might want to apply such critical thinking to anything on the list from Norse mythology to 'Holy Spirit' sweeping through a Midwest U.S. 'Revival Tabernacle' to a reiki session or Goddess Retreat.

What if it was all possible - at least in supporting or proving the Theory (*and the general, universalized concept of 'Oneness' itself*)?

What if TV evangelists have been known to do some shady things (like have earpieces ala 'Fletch' or allegedly 'swindle') but is there still something authentically there with spirit?

Just because there have been shady tantra dakas who 'cross some lines' they may have intentionally blurred; does it take away from the purity of the source, power and magic itself?

Has there even maybe been some filters or conditioning around the full scope of 'God'? Can you see where there are limitations in 'Spirituality' or 'New Age' itself and yet does that take away from the overall concept of oneness?

Of course, from my perspective; you don't ever have to fully believe in Oneness, Unified Theory, God, Allah or anything else; it's your journey.

Your beliefs are your own in your ongoing discovery...maybe your outlook is more established or centered around a different theosophy or spiritual guide (I make up new words quite often btw).

With the unified 'compilation' aspect of UT; I encourage you to contemplate the experiential reality of it ALL related to these popular phenomena (of what could be called Spirit-fractal quanta) individually in relation to Science. Or at least start focusing in on triggering or appealing subject matter...I'd view both the trees and the forest.

You can use youtube, google, duckduckgo or wiki for further 'general' research into just about any of them and their history. Keep in mind however, that a lot of modern reality and algorithms are geared AGAINST the divine and especially 'God'; however, there are a lot of resources, leaders and guides that are still out there.

So keep your critical thinking active...For example;

"Ok; an annual physical migration phenomenon to Mecca (The Hajj)...or is it something much more than that just a 'religious' thing from an outsider scientific perspective and why?

Is there something more to all of this than just 'religious conditioning'?"

With The Theory here, you want to look at the meta-concept itself rather than comparing differences really between things unless that is part of your process. Fortunately, the Theory itself will guide you back to the bigger picture.

Quite likely you have had some of these insights or realizations yourself presented here throughout your life.

This can be used to further refine YOUR 'theory' and outlook on Reality and everything spiritual. I think some people will outright reject it while for others it may radically change their lives. Maybe for you, there'll just be a couple clarifying points that helps you along your path.

That is for you to see so get ready to put on your discovery cap!

With this release, please understand that I'm not presenting this Theory as 'The Truth' per se; I am however, proposing it as what it says: 'a' Theory of Unification (and I think you'll find; a powerful universalization) that could very well help yield insights and even guidance into life's great mysteries. It may fill you with more the spirit of adventure and wonder than ever before with new eyes!

You'll also discover that I am surprisingly respecting science in a number of ways as well.

A quick back-story;

During the development of 'Φotonic Beauty' (an infrastructural upgrade for the evolution of the Beauty industry and Performance Arts into energetic mastery) - and after getting lost in space plasma research; it kept dawning on me in this grand side excursion of this overall project (and through starting The Theory of Φotonic Quanta)

that I had to actually develop and present an entirely different SUPPORTING Theory that could fundamentally attempt to 'back-bone' answer everything in the face of Western Science that couldn't otherwise be answered.

I was simply hitting too many walls in integrating bio-scientific reality into the aura.

I wasn't even getting all the big picture perspective that I craved in books like 'Vibrational Medicine' either. Even when I really dove into Dr. David Hawkins leading consciousness research in 2013-2014 (and quite heavily I might add), a lot of the bigger 'connecting pieces' still weren't answered in my mind.

So in just being at a metaphorical wall; I started developing what I started calling 'Unified Theory'. To me - it sounded however like someone else out there might have used that same name elsewhere in the world for something else; thereby, during session time (with Muse of course), She told me to call it 'Uniφied Theory' akin to 'φotonic Beauty' (with the 'phi' 'Φ') whose name had already been established.

You might have wondered; Why am I spelling it with 'phi' (aka 'φ')?

The concept of Phi/φ itself (similar to Sacred Geometry) in math and physics is known as 'the Golden Ratio'. This, I feel represents this bridge and weaving interplay between what is or MUST be Divine Intelligence and its Beauty (as presented in Uniφied Theory). 'φ' is

either divinely encoded into the Astro-Biological Physical Reality or reflected back from it leading clues To the existence of the God-Spirit Matrix Singularity (and thus the weaving of both co-existent realities).

Because someone had trademarked φotonic Beauty, it led me to spelling it with 'phi' instead which is even better! Also, it's the Greek alpha sound of 'f' as well as the Russian/Ukrainian 'f'. Even when you see it spelled 'φotonic' it's still pronounced with 'f' or 'ph' sound ;)

Note: V1.0 intentionally does NOT have that many visuals at all (thank you for your understanding)

Now...

Many spiritual teachers and guides before have before have referred (often generically) to 'oneness' of course; yet, I think that as you delve further into Uniφied Theory itself (v1.0) within these pages, that you will start appreciating how what's being presented here is more specific in concept, more actively encompassing + unifying and that it does have unique differentiation points like with UT's (Sub) Theory of Creationism.

Uniφied Theory may help you to deepen your faith and possibly even provide a powerful, stable foundation for the evolution of your own beauty consciousness and soul fulfillment. It may also challenge, scare or trigger you in ways. It may HIGHLIGHT concerns around physical death itself. It may even highlight where there ARE corruptions and hijacking through psychic and spiritual phenomena that actually help further PROVE spiritual purity and reality.

Who knows?!

As a Theory, this is meant for YOU to question, discuss and explore in relationship to other information, teachings and experience; especially in the meta 'Evolution vs. Creationism' debate. UT definitely has some voice to add to the discussion.

This incredibly implicated Theory (as you will soon see) can act as a powerful tool for your contemplation and clarity in any case. Use it how you will.

It is indeed a universalization attempt at unifying vast spiritual wisdom and history in relation to (Western) Science.

Even for me, it is so profound and IMPLICATED in the grandiosity of its universalization and pure simplicity, that it can be overwhelming (not merely to the ego, but to the heart and soul itself).

Unified Theory is bold enough to take on the meta-nature of reality itself and it simply came from a place of me simply getting fed up with Science not being able to answer so many questions!

I, myself have not only seen and experienced real magic (that isn't possible 'biologically'), but I offer it myself on the DAILY.

In my upcoming 'Theory of ϕ otonic Quanta' (of which 'UT' is foundational for) and the ' ϕ otonic Beauty Book' itself (which will include BOTH theories), I will go into more details around my overall thought-flow and challenges in developing this.

So, although 'UT' will be part of the greater ' ϕ otonic Beauty report (releasing summer 2023); I'm excited about this as a new standalone side project that could truly evolve on its own (in its influence or notoriety).

But before we dive into the official 'Uniq̄ied Theory' itself (v1.0) which will be presented in Part A & Part B with instructions or guidance;

I want to cover some important details first because (and although it may seem unnecessary), this is essentially an intellectual property copyright as the Theory itself and a trademark with the name 'Uniq̄ied Theory' belonging to Rion Kati.

NOTE: If you want to skip to the Theory itself, you can do so now in the consideration that if you are inspired to share or talk about 'UT' publicly - that you should probably come back later and finish reading the extended prologue (I think that in any case, you're itching to get to the Theory itself by now).

EXTENDED PROLOGUE:

Extended Prologue + Usage Disclaimers and Recommendations:

Now; doing this extended prologue with disclaimers may seem like overkill, but it helps people to take it seriously for what it is - as well as respects my path, time, relevant authority, inquiry, experience and studies into such a quantum task.

I had the thought last night (at time of writing) that it has been 9 years since the double Chair-bender experience in stillness (with yang chi) and then I went to a hidden ashram in Asia to sit with an enlightened master (and that week had my Crown chakra activated by him). It's been quite a spiritual journey since then filled with immense growth (although most of it I directly attribute to my greatest teacher, the Archetypal Muse)!

If you're new to me, there's more to say on my main site [About page](#), yet I'll say that it might be of interest that I'm the first known person to ever translate and synthesize the Gene Keys spectrum of consciousness into practical and working beauty essences in the visual spectrum of auric light.

This also means that there are more than the basic elemental chi essences (yin, yang, water, earth..) AS subtle yet true signatures of vibration and light radiance.

My Theory of photonic Quanta (secondary after from 'UT') will go into this in more detail. Btw; Gene Keys (founded by Richard Rudd) was influenced from the ancient 'I Ching' and Human Design.

I'm the first known person to do supportive spectrum of consciousness DNA (Gift and Siddhic) activations through the lesser known form of Invocation with the Gene Keys (I'm now also a certified [Gene Keys](#) Guide and have been doing hologenetic profile readings for years).

Mostly in the past 1/2 decade (and in living a very practical, service-oriented spirituality); I've been doing hundreds of remote energy healing and archetype activations and essence makeovers for years with paying clients around the world ([here's some Rion testimonials](#))..so bringing these Theories really helps to STRENGTHEN the meta-physical and practical foundation of it all. Just HOW is quantum remote energy work possible? I couldn't even find the solid answers in quantum physics.

Again; this foundational integration alone (for the future of the Beauty and Performance Arts industries) is getting further empowered by the upcoming 'photonic Quanta Theory' which will be in the Photonic Beauty report.

It is my intent that this 'Unified Theory' (which I am spelling and trademarking as 'Unified Theory') can be taken seriously and openly shared as its own stand-alone Theory to be talked about in spiritual, theologian, political, social, physics, meta-physics, SCIENTIFIC and intellectual circles freely and comparatively; online, in coffee shops, forums, reddit...even classrooms, labs and universities.

Once you know enough about 'UT', you can talk about excerpts or tenets of it in dialogue, inquiry and contemplation with others. It is meant to be FREELY and openly discussed, questioned and shared.

You may even want to start a Reddit thread or something (of which you are free to post excerpts taken from this book with the attribution credit ie. at the very bottom of the report itself). You are empowered to do so even as a skeptic (just do it all the enough respect to the Theory itself please).

You can also share any testimonial about 'UT' with me like in FB DM or on my Facebook wall (in the understanding that if it's a direct message testimonial on its own, I may use your statement with your initials to further promote the free concept of 'UT' publicly). If you share a testimonial on my wall or a wallpost as public, understand that I may use your full name associated with promoting 'UT' (which you can always request to rescind entirely or with initials instead).

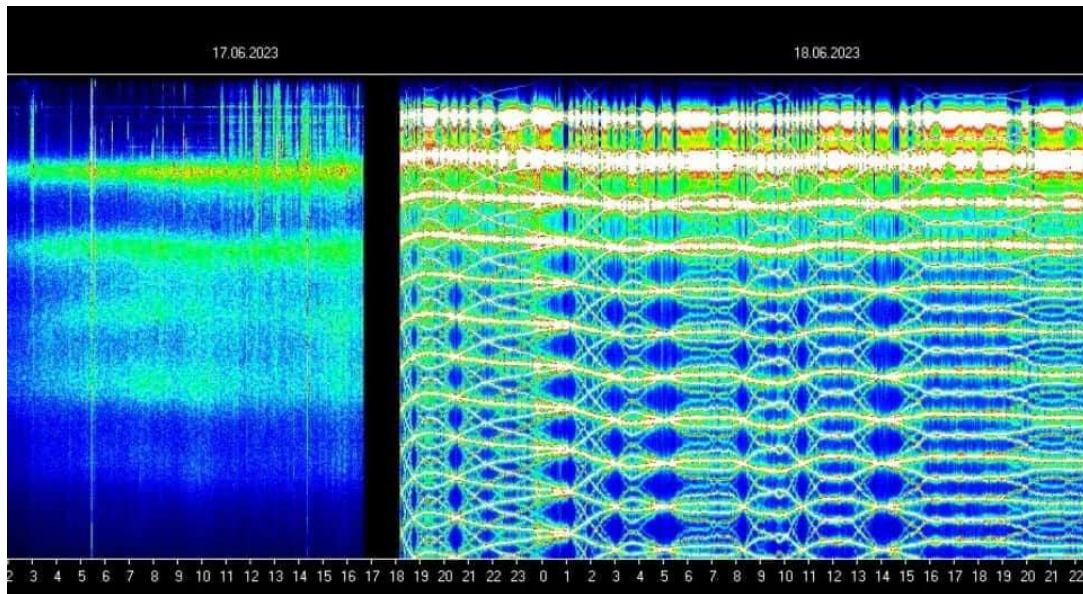

Again; I encourage you as you delve into it to integrate aspects of 'The Theory' into your life where it fits and perhaps return back to it for further contemplation.

If (or when) the Theory itself may gain more traction, I may be open to qualified interviews later around the subject matter. I can be followed or messaged @ <https://facebook.com/rion.kati>

Although it is obvious that much of content in 'UT' is universal in human history and context; you will find that it is a unique and novel

representation in HOW it's presenting things as well as with the novel insights that it offers.

Interestingly; the window for V1.0 to get out is now in mid/late June 2023 as we are see a newly updated Schumann Resonance.

Undoubtedly, the new increases of photonic solar and galactic quanta is mixing with Spirit to bring new codes because of the interplay between both realities (as per Theory). The increase in high frequency solar quanta no doubt is helping me clarify the PhQ theory). Yesterday morning during a solstice [activation](#) for a client, I literally saw photonic quanta RAYS and a multi-colored halo around a light bulb on the ceiling at the start of her session (I've also been seeing astral phenomena in my room at night quite often).

With such literal high frequency energy hitting the earth, it's affecting the spirit realm and our consciousness (undoubtedly in the direction of awakening more psychic and spiritual awareness where you may have to drop lower frequency attachments). UT is here at a special time!

Again; you are able to freely able to talk about 'UT' in your own discourse and publicly. You are free to disagree, to question it and question me about it (although because this isn't even my main operation, I may not answer all requests).

You accept and understand that by asking me questions that may bring further sharpening of the theory in my answers and updates of 'UT', that you are not entitled to any claims nor co-ownership of 'The Theory'.

The Theory itself is a non-profit and free thought-spirit exercise (resource or tool), yet respect and attribution (when called for) are best to be acknowledged, thank you.

With that said; I do simply ask for attribution or association to 'Rion Kati', 'Sexy Chi' or 'ϕotonic Beauty' when it comes to citing or referring to the source of 'UT' (if and when asked) and that you would not present this anywhere as your own Theory.

With that said, don't let it hold you back from sharing 'Uniq̄ied Theory' with others or where you may already have had similarities and agreement with it!

Although I am the 'author' and curating editor of 'Uniq̄ied Theory' and Theory updates (which will all be officialized on ϕotonicBeauty.com and/or in any and all Versions of PDF releases); I want it to be open source enough as to where it can be critically

sharpened, tested and refined through public discourse and feedback (yet through my curation).

If there is a specific and differentiated point of contribution of high enough value that you make to sharpen the Theory and which I choose to include (on my own timing), I may do my best to cite you in relation to that specific value point with your agreement; however, keep in mind that I still retain editorial authority and copyright over the concept of Uni ϕ ied Theory (and such an addition wouldn't necessarily make you co-author either).

As the originator; I own copyrights to all future versions of Theory Updates (on site and/or in PDF format) as well as active trademark of 'Uni ϕ ied Theory' itself.

It's kind of like how 'String Theory' is associated with Michio Kaku; 'Uni ϕ ied Theory' (with the 'phi' or ' ϕ ' as f) is simply developed by Rion Kati.

I also request that you try and spell it with the Greek 'phi' (also the Russian/Ukrainian 'F' > ϕ) whenever possible when referring to or talking about it online (with the 'ph' or 'ff' sound). I reserve the right on my own timing to and look forward to updating the official 'Theory' itself (whatever is released is active Theory). This 'UT' will definitely be my most actively updated release ever with future version upgrades.

Again; you are encouraged to email or [DM chat with me](#) about questions related to 'Uni ϕ ied Theory' (or 'Theory of ϕ otonic Quanta'); after all, it's likely that many new questions will arise that I

am open to receiving to further SHARPEN and enhance my overall Theory itself. Undoubtedly there will be many more Theory-Specific details to cover in future updates.

Maybe I'm missing some things that would fit in the great universalized list itself that you want me to add. Maybe there's a study, physics discovery or Bible verse you want me to interpret or cross-reference against the Theory (for example). I want that kind of critical approach all in the spirit of refining towards higher truth.

Of course, there are countless nuances and things the Theory itself will have to be eventually address and sharpen, so be open to communicate and thanks for receiving this as version 1.0 in the above understanding that Unified Theory is my copyright and trademark.

Thanks for your patience in this extended prologue and I assure you that once you dive into the power of The Theory itself, it will readily be worth your time.

In this book/report as the inaugural release;

UT v1.0 is intended to get the official core gist of the concept clearly and universally across as well as numerous important details without ultimately covering 'everything' that it will in future, updated versions to make the Theory more comprehensive and robust.

Future updates of the 'UT' book itself will be expanded to address such questions, insights and so forth. It will also inevitably cover

areas (quantum physics, bio-physics, DNA, reincarnation details, etc. in more prime details including the convergence and tantra of the 2 realities).

Again; you telling me an area (for example like animal spirit reincarnation cycles~) that isn't yet covered in detail is not at all akin to you holding any claim to the Theory itself. Also; there are many areas I'm just not going to get to in V1.0 because of the short turn-around time so I can continue completing the larger project of 'photonic Beauty' itself.

If there are specific aspects of my theory that I can attribute to popular or individual authors (or legitimate individuated contributions from people who interact with the theory that end up being included) I will do my best, however I haven't even delved into all of such nuances yet.

Again, (and redundantly); 'UT' theory copyright and trademark belong to Rion Kati.

As far as a more immersive study of consciousness itself; I would recommend resources of Eckhart Tolle and Neale Donald Walsch but especially Rupert Spira and the late Dr. David Hawkins (two of whom have indirectly influenced some of this Theory itself).

Prime Deepak Chopra has a lot of good material as well. Bridging meta-physics with science; Gregg Braden and Bruce Lipton are solid references. They are google-able.

And it's not that there isn't anything new under the sun (actually there is all the time including embedded throughout this report) - otherwise how would ANYTHING have ever been innovated or created?; it's just that with this, a lot of this Unified Theory is already KNOWN so I'm humbly grateful to present it perhaps in a new and very relevant way to you with special innovative features that differentiate it from other attempts at explaining reality.

It's the type of presentation that would have given ME the epiphanies I was looking for with so much power in one place to keep unpacking.

I may have mentioned that I think it stands alone and is differentiated enough to put my name to it under that general disclaimer.

For me; no one was able to really answer '*What is chi?*' and very few people into spirituality have taken on a theory of Genesis either.

Even when I asked the first question of our group to my Chi Kung master in Beijing, October 2015 at some restaurant in the extended city as we were being served wonton soup at a ridiculously large circular table - he himself didn't really have a clear answer when it was translated (to something about chi).

Anyways; I think you'll be pleased with Unified Theory on these accounts for 'UT' finally proposes an answer to 'chi' that I've never heard directly said especially in an IMPLICATED way with basically

'everything' until now (and the Unified List alone takes on that 'full coverage connected with all future updates).

From what I've been running at it so far, there still may be unanswered questions into the 'how' of things, but if I'm not mistaken, there's nothing my theory couldn't (ultimately) cover (in future updates). This is because it is simply SO meta-universalized (and this is for you and I to truly question or challenge). Hence, I do consider it to be a grand universalization thus far and we're almost there so that you can test it out for yourself (*and with YOUR spiritual experience and background*).

Surely, there are things that I've not covered and absolutely there will be critical tests and scenarios in the details of things to run against the Theory however (and with that said); it's absolutely time to get this out officially to the world as the core of it is more than ready to go.

Releasing it as a standalone starter legacy piece of its own secures the deeper foundation for me to get back to developing the larger, very exciting 'photon Beauty' release (including 'UT' and my 'photon Quanta Theory').

How does Unified Theory hold up to, resist or challenge your own spiritual or scientific beliefs? Or bring in new insights and perhaps strengthen your own beliefs (even in the afterlife or heaven)?

Dive in soon!

Remember to keep checking back on potonicBeauty.com for the latest version download of both theories as well as the Φ otonic Beauty report itself (all latest versions). If you're really into this subject matter, you might want to be up to date.

Oh - and IF there's enough request or demand; I might even start an active forum for people to participate in (I haven't run one of those in a decade or so).

Again;

You are free to ask questions publicly or to me although I may not always respond. You can talk about the Theory in your own discourse without presenting it 'as your own' (and attributed to Rion Kati if/when people ask about the source or when necessary) and you can freely share this pdf 'as is'.

(If you use excerpts for something more official online or in publishing, then just include the very bottom copyright info please).

You can always send people to my Facebook account:

<https://facebook.com/rion.kati> or to the official website of potonicBeauty.com

(which will host the 2 theories and the concept of Φ otonic Beauty itself). As of 6.26.23 release, the site isn't even online yet b/c of my hurry to get this released.

With that said;

No matter what, the mysteries of life, reality and spirit are still wondrous and boundless; in fact, this might connect you even MORE to all of such universal, Divine and human-radiated Beauty and Truth.

It may take you even FURTHER into the mysteries and siddhis, further into your awakening...or deeper into spirituality, religion or even Love (and the greater Truth of God-level Love).

With that said; I didn't think that I would ever reach a point in consciousness to develop my own 'Theory of Everything' and yet (after 2 decades of spiritual experience) it recently came out of frustration and necessity.

Seeing and knowing so much of Spirit as real for years personally; I simply got fed up with Western Science not being able to answer all kinds of questions or thinking spiritual phenomena is falsifiable because they couldn't prove much of it (to me) with their methods.

Fortunately; for those of us who sense there is something more than science, I think you're gonna love this. Although I'm still a seeker of always higher truth, it may be relevant to know that I have real spiritual background, experience and perspective that helped quantify such a quantum task (as well as all of the Muse codes I downloaded because really, this is Muse's Unified Theory + Theory of Photonic Quanta/Beauty - I am merely her divinated translator).

This is big stuff!

We're almost ready to get started and I'll say that;

My overall intention is that I would love for 'Unified Theory' itself to become a POWERFUL tool in your arsenal of spiritual, scientific, meta-physics or consciousness research. For Beauty, it sets a deeper foundation that finally connects Spirit and consciousness with Beauty; that which is about to be proven is more than skin-deep.

Oh - one final starter disclaimer is that I have not used any AI or ChatGTP during any of this!

With that said; take a deep breath and FINALLY...let's get to Unified Theory itself (v1.0)!

First, I want to simplify things as much as possible so that you can get a short-hand reference to universalization itself here. If you want to type or write Unified Theory instead as 'Unified Theory' that's fine.

There might be a different 'Unified Theory' out there, so I recommend throwing in the Golden Ratio of 'phi': ϕ (again; it's also the Greek, Ukrainian & Russian 'F' with the same 'ff' pronunciation).

And once more; you may have heard others talk about 'oneness', yet there is much more here that differentiates Unified Theory...so keep reading and let's make it as simple as possible!

After our prologue now;

These are the remaining components of the 'Unified Theory' v1.0 itself. I'll continue with relevant supportive usage recommendations + insights, etc.

UT PROLOGUE:>

UT SYNOPSIS:

UT OVERVIEW:

PART A: The Unified List Of Psychic & Spiritual
Phenomenae

PART B: Tenets of Unified Theory

PART C: Additional Discourse & Outro

Uniϕied Theory Synopsis

One Sentence Synopsis of Uniϕied Theory (v1.0):

UT 1SS Lilu Version:

Uniϕied Theory proposes that there are 2 predominant realities:

1. An astrological, bio-physical reality

&

2. A singular multi-dimensional 'meta' sentience of 'Spirit' that accounts for all consciousness as well as psychic, spiritual and religious phenomena

Now after the official Lilu (5th Element movie reference) version 1.0; let's do a slightly more extended short version....

UT 1SS B Version:

Unified Theory states that all psychic, spiritual and religious influence and phenomena (added up) throughout history when compared to a physical, scientific model of reality (and its inability to explain these phenomena); points to the inevitability of a multi-dimensional divine intelligent 'sentience' that could also be known as the Spirit-Matrix or Singularity of Oneness also known as 'God'.

Note: I'm giving myself the liberty to try out 2 different versions and the intention is to keep improving these onsite and/or in future official UT version updates (v.x)

.....

Ok...so we had our starter synopsis that is available for a super short-hand reference to Unified Theory. (You can share either with according attribution).

Keep in mind that all aspects like Synopsis & Overview are open to active updating and improvement through time on-site (([fotonicBeauty.com](http://fotonicbeauty.com) (fotonicbeauty.com)) as well as in future PDF version releases (similar to how I keep improving the world's best definitions of 'charisma' and 'allure').

This is something I will continue to update (here and there b/c of the value of higher truth).

Now; let's go into a proper 'UT' overview. Here's where it might start getting more interesting and differentiated (as compared to general 'oneness' theories).

Uniqied Theory Official Overview (v1.0):

In attempting to answer or cover all possible unanswerable questions and phenomena known to scientific perspective in making sense of reality (because it was sourced in my frustration at not being able to properly 'merge' Astro-Bio Reality or 'known Science' into a working model of the human aura)...

UT centers around the simple and yet profound concept that there are 2 pre-dominant 'Meta' realities or templates that co-exist in tandem:

1. The Astrological, Bio-Physical 'scientifically known' template of elemental, molecular, natural and biological life on earth within the construct of the physical universe (which includes particle physics and ie. solar sun centric-quanta)

While the other reality is;

2. That there is a Multi-Dimensional Intelligent Sentience of God-Consciousness as a Singularity 'Spirit' Matrix through which all sentient, organic and living things are connected since the Dawn of the first sentient life on earth

UT believes that many spiritual and religious fractals have simply described the exact same Sentient Singularity as 'God', 'Spirit' or 'Allah', etc.

UT believes that consciousness and (most all organic life) exists as multi-dimensional sentience in spite of individualized bio-physical mortality.

UT believes humans are actually higher dimensional souls embodied in a human bodied vessel yet carry multi-dimensional layers of light-bodied aura (potentially) connecting them to all dimensions. Humans are both fully mortal and fully divine; essentially as demi-gods.

After the Overview here; Unified Theory focuses around the Unified List and different explored Tenet-beliefs that you can use to continue contemplation and critical thought with as a power resource.

.....

Now; throughout the rest of this report and UT Theory itself, I will intentionally inter-change such universalized names around the concept of this Singular God-sentience freely.

Other overview thoughts;

Before 'UT' became clear to me through Muse codes (She is a high, ancient archetype fractal); even though I'd heard of 'oneness', no one had ever even put the words 'multi-dimensional sentience' together for me - so that alone I think is worth some deep reflection and contemplation on (and I think you'll see how everything starts pulling together quite profoundly!)

Both the biological template (which I'll often refer to as A-B reality) and the multi-dimensional Spiritual template exist and inter-play in tandem.

UT proposes that our incarnate reality is both PHYSICAL and DIVINE (and also respects that some things are purely physical or inorganic only including A.I. and all classifications in the 'First Dimension').

UT says that everything inorganic is NOT actively connected to the Spirit Singularity of Sentience yet does exist in A-B reality thereby it can interact with our sentience. (A quick example is 1st Dimensional crystals and how their higher dimensional properties only activate in relation TO higher dimensional sentience).

This differs from other theories that say 'God is everywhere' or 'in everything'.

UT says that God is with all sentience (including plant and lower animal life) and yet is still inter-connected to the A-B reality as the meta-background.

Generally; that which cannot be answered from the Biological model of reality, must be possible and answerable (or at least covered and represented) by the Spiritual (which as UT proposes, is far far grander and more implicated than we may have realized).

UT proposes and unifies ALL spiritual, religious, multi-dimensional and psychic phenomena, history and experience as real and or veritably possible including reincarnation, energy healing, photonic beauty, the super-natural, hell and a myriad of (all) other spiritual concepts as listed here within; under the Singular Unity of God-sentience.

Although I, Rion Kati am the theorist (and editor);

I now present an indefinite, open-source list of spiritual, religious and psychic phenomenae that is meant to showcase and deliberate the Singularity of the possibility of a Multi-Dimensional Sentience with the intention of unifying all of it under one domain aspect of 'reality'.

PART A: The Unified List Of Psychic & Spiritual Phenomenae

(For reference; the open-source, expandable, indefinite and curatable (by me) 'Unified List' of phenomena is included in this and all future versions of 'Unified Theory' updates as an active major component).

The core concept with Unified Theory is that of multi-dimensional (and immortal meta-sentience) which could also be called consciousness, Spirit or occasionally 'God'.

Because it is multi-dimensional, this (as UT proposes) accounts for ALL of the following phenomena that cannot be accurately explained from an A-B scientific reality lens.

It's now your opportunity to dive deep into the weighted implications, experience and even projections of things represented on this list in lieu of the core simplicity and limitations of the A-B bio-physical reality (even though that includes psychology, evolutionary biology and behaviorism from their perspective).

Further supportive thought-flow will help you to question, contemplate and work with applying the Theory itself. UT proposes that the rabbit hole with the Unified List alone is incredibly heavy and implicated; it only gets deeper yet it allows you to see with more simplicity, the 'case for' a deeper faith and belief (in our Unity and Oneness itself).

Instructions:

Your mission (should you choose to ya know...follow it down a winding zen garden path) is contemplation of the Theory from here forward and then with the Tenets of UT itself with a critical focus on comparing 'The Unified List' vs. your other beliefs or insights vs. the A-B reality and science itself.

You can center it around this question, but just let your mind be captivated and work with it;

"How else can ALL of these phenomena be possible or explained other than a multi-dimensional sentience possibility?"

Or this follow-on alpha question..."Would any of these exist if there WASN'T such a thing as multi-dimensional sentience?"

Note: For more of a diasporic experience; I've intentionally not alphabetized these phenomena. Here we go!...

The Unified List Of Psychic & Spiritual Phenomenae (Version 1.0)

- God
- Faith
- Religion (all)
- Spirit
- Consciousness
- Deities (often simply archetypes or collective constructs)
 - Spirits (as higher dimensional entities)
- Gods (as powerful archetypes or spirits yet less than God 'as' the singularity)
 - Goddesses
- Archetypes (ALL; as it relates to their divine aspect)
 - Soul
 - Souls
 - Chi

(which literally wouldn't exist without this Spirit-sentience connection as
proposed by UT)

- Ki
- Prana
- Unity
- Prayer
- Heaven
- Hell
- Angels & Demons
- Father of Fathers
 - Holy of Holys
 - King of Kings
 - Lamb of God
 - The Observer
 - Omniscience
- The Great I Am
- The Holy Ghost
- The Great Spirit
 - Father Wind
 - Allah

- Buddha
- Enlightenment
- Everlasting Love
- Arms of the Angel
 - The Beloved
- King Consciousness
 - Ascension
 - Awakening
 - Arcana
 - The Afterlife
 - Incarnation
- Reincarnation (yep; absolutely)
 - Miracles
 - Gospel
- The Holy Spirit
 - Force of Life
 - The Devil
 - Beelzebub

- Arch Angels
- Guardian Angels
 - Saints
 - Halos
 - Reverends
 - Pastors
 - Preachers
- Father (church, holy)
 - Sisters (church)
 - Nuns
 - The Lord
 - All Dogs Go To Heaven
- "See you in hell" (*ie. movie quotes*)
- "OMG" (*sources back to where? ;)*
 - "Jesus Christ!"
- "Jesus!" (*Lord's name in vain references*)
 - The Lord's Prayer
 - Prayer (before meals)

- Mother Mary
- Mary Magdalene
 - Zen
 - Kama Sutra
 - Dragons
- Solar Archetypes
- Consciousness Research
- Dr. David Hawkins
 - Isis
 - Nirvana
 - Tantra Daka
 - Tantra Dakini
- Conversations With God -Neale Donald Walsh
 - Hologenic Profile
 - Ascended Masters
 - Astral Travel
 - Faith-based healing
 - Medium-ship

- Light at the end of the tunnel
 - Out of Body Experiences
 - Near Death Experiences
 - Birth Doula
 - Death Doula
 - Covens
 - 6th Sense
 - Ethereal
 - Psychic Energy Reading
- Quantum Principles of Consciousness
 - Mediumship
 - Clairvoyance
 - Clairsentience
 - Clair-tastience
 - Clairaudience
 - Claircognizance
 - Music as Medicine
 - Sound Therapy

- Psychic Surgery
 - Prophecy
- Witnessing (high profile spirit visit)
 - Divination
 - Dowsing
- Dream Telepathy; (Inception concept)
- Psychometry (*spec wisdom through touching an object*)
 - Retrocognition
 - Premonitions
 - Hunches
- Foreboding Premonition
 - Gut Feelings
 - Omens
 - Voodoo
 - Ordination
 - Lao Tzu
 - I Ching
 - Hillsong

- Christian Music
- The Chopra Center
- Epigenetic Influence On Others From Allure & Charisma
 - Intuition (and all forms of it)
 - All Psychic Phenomena & Abilities
- All Unexplained Psychic Phenomena or Synchronicities
 - UFO's

(this one is admittedly a little bit weaker as far as being confirmed as aliens, however definitely higher dimensional; I've seen UFO's in Nevada AND in the astral realm visually)

- The Law of Attraction
- All Paranormal Phenoma
- Astral Travel Dreaming
- Plant Medicine Journeys
- DMT and/or Ayahuasca Journeys
- 5-mEo DMT Journeys (aka 'bufo')
- Quantum Connection (aka 'Entanglement' due to the Unity)
 - Immortal Beauty + Its Light Codes (see PhQ)
 - Religious Education

- Astral Implanting
 - Astral Warfare
 - Astral Hijacking
 - Psychic Warfare
- Hooks, Miasma, Implants
 - Spiritual Warfare
- Humans as (generally) Immortal Souls Incarnate
 - Chi Kung
 - Medical Chi Kung
 - Tao Healing
 - Tai Chi
- A Famous Kung Fu Master's Secret Chi Kung Lineage
 - Kung Fu (most that mix in divination)
 - The Chinese Immortals
 - Pranic Healing
 - Reiki
 - Reiki Healing
 - Crystal Healing & Magic

- Magic (of the non-3D illusory kind)
 - Magick
- [Powerliminal Attunements](#) (Rion's own ;)
- Religious Holidays; Easter, Christmas, Hanukkah
 - Acupuncture
- Morphological group influence throughout species like
birds and fish
- Sentience Itself (All and yet to different dimensions on a
spectrum of awareness)
 - Dimensions of Reality
 - The Law of Resonance
 - The Law of Polarity
 - Sex Transmutation
 - Sexual Spiritual Polarity
 - Holy Fire
 - Spiritual Purification
 - Spiritual Cleansing
 - The Blood of the Lamb

- Jehovah
- Jesus Deeds & Miracles
 - The Resurrection
 - Devotional Codes
- Divinated Creativity & Flow
 - Faith Healing
 - Hymnals
- 'Preaching to the Choir'
 - Church organs
 - Tabernacles
 - Chapels
 - Mosques
 - The Vatican
- Christo Redentor (Rio de Janeiro statue)
 - Taoism
 - Buddhism
 - Confucianism
 - Christianity

- Catholicism
 - Islam
 - Wiccan
 - Witches
 - Witchcraft
 - Warlocks
- Demonic Possession
 - Exorcism
- Divine Interventions (See Miracles)
 - Full Body Energy Orgasms
 - Nadis
- Bashar (Esther & Jerry Hicks Channeling)
 - Muse (the Archetype)
 - Sufism
 - Tantric Buddhism
 - Tantra (Hinduism)
 - ISTA (Int'l School Temple Arts)
 - Source Tantra (U.S.A.)

- The Source Field
- Temple Priestess
 - Priestessing
- Dr. Wayne Dyer
- Dr. Joe Dispenza
 - Eckart Tolle
 - Deepak Chopra
 - Alan Watts
- You Can Heal Your Life (Louise Hay)
 - Hay House Resources
 - NDE (Near Death Experiences)
 - Ghost Stories
- The Entire World of Beauty ESSENCES* (*See PhQ*)
 - Spiritual 'Downloads' of Codes; Epiphanies
 - Sex Transmutation of Consciousness
 - Grail Archetypes
 - Communion (a la Hierogamy)
 - Grail Consciousness

- Sacred Reunification
 - Sacred Union
 - Divine Union/s
- Inspiration for Sci-Fi Magic (Bi-location, Teleportation, Jedi tricks, etc.)
- Unlimited practical creativity with connection to the Source Field
 - The Akashic Records
 - Quantum (aka) Remote Energy Healing
 - Archetype Embodiment Activations
 - Energy Healing
 - Hieros Gamos
 - Hierogamy
 - Cosmic Love
 - Sub-Pranas
 - Mayan Gods
- Etheric Missing Limb Phenomenon (see human & salamander)
 - Etheric Leaf Photography

- Kirlian Photography
 - Codes Download
 - Codes Portal
 - Lion's Gate 8/8
 - Tarot Intuition
- Dark Room DMT Vision (a la Tao Garden)
 - Ancient Indigenous Deities
- Communication or Connection with a Love One who
Cross Over
 - 'Laying on of Hands' Healing
 - Shamanic Healing (of any kind)
- Shamanic Multi-Body Detox (in Central, S.America)
- Soul Transition of the Dying (sensed in hospice rooms,
seen by shamans)
 - Native American Spirits
 - Peyote
 - DNA Encoding
 - Rain Dancing

- Hallelujah
 - Hindi Deities
 - Animal Spirits
 - Animal Reincarnation
- Morphogenetic Everything in Animal Species & Humans
 - The 100 Monkey Morphogenetic Phenomenon
 - Murmuration (beautiful [birds vdo](#))
 - Super-Human Abilities (in general)
 - Superheroes
 - Gods
 - Demigods
 - Telekinesis
 - Photokinesis
 - Thermal Photokinesis
 - Levitation (*although less proven but theocratically possible*)
 - ALL References to Magic, Sorcery, Telekinesis, Photokinesis, 'Powers', etc. (*throughout pop media anime, movies, gaming, mythology...things like 'mortal kombat' powers are literalized from higher D into 3D*)

- All reference to superheroes (is sourced also in Spirit)
 - Holographic Akashic Reading
- Holographic Kinesthetic Energy Reading (*Rion has this capability of reading anyone in history's chakras and aura*)
 - Psychic Gifts
 - Supernatural Phenomena (all)
 - Spells
 - Energetic Leeching, Vampires
 - Spellcasting
 - Love Spells
 - The Power of Prayer
 - Biblical Miracles
 - Theology
 - Theocracy
 - Creationism
 - Yeshua
 - Krishna
 - Jesus Christ

- Cathedrals
- Notre Dame
- Magdalene

 - Monadic Realm
 - Eros
 - Photonic Influence
- Aphrodite (as Photonic Quanta Archetypes)
 - Diva

(Divinated aspect of ie. an archetype in the Collective Unity field)

- Dark Forces
- Demonic Infiltration
- Organic Life
- Coronations *(in many cultures when connected to divinity)*
- Psychic Card Tricks (that really purely on energy reading)
 - Iboga Ceremonies

- San Pedro (Huachuma) Plant Medicine
 - Essene
 - Serendipity
 - Rays of Creation
- Upper & Lower Shamanic Worlds
 - Angel Numbers
 - 'Sold Their Soul'
 - 'Contract With The Devil'
- The Headless Horseman (myth, story)
 - Dracula (myth, story)
 - Vampires (myth, stories)
- Lycanthropy (shapeshifting; mythic)
 - Heaven on Earth
 - Beauty Consciousness
 - Soul Fragmentation
- Soul-Akashic (incl. past lifetime skills)
 - Soul Purpose (see Dharma)
 - Archetypal Embodiment

- Flatliners (media related to after-death experience)
 - The Beyond
- Dark Rituals & Sacrifices (*often to harvest life force of blood*)
 - Walk-in Souls (freaky but it would exist)
 - Elemental Chi
 - 7th Heaven
 - Earth Chi
 - Qi
 - Qi Gong
- Egyptian History Starseed Connection (at least the possibility)
 - Yin Chi/Prana/Ki
 - Yang Chi
 - Zero Point Energy
 - Highway to Hell
 - Stairway to Heaven
 - Inspired Genius
 - Inspired Creativity

- Flow
- Charisma (worth mentioning again in case I missed it!)
 - Rockstar Charisma
 - ALL Archetypal Expressions
- Beauty Essences* (*major feature of photonic Quanta Theory*)
 - Siddhis
 - Spirit of Ancestors
 - Power (all forms of embodied power)
 - All Beauty beyond skin-deep (*see PhQ & PhB*)
 - Miracle Healings (a la Catholicism)
 - Alchemy of Consciousness
 - Chakric Psychic Implants
 - Auric portals & tears
 - Annunaki
 - Moloch Grids
- The Force (mythic, storied; yet the same concept as 'UT')
 - The Blues (Music; when sourced in astral+ mood)
 - Moods (astral and above influenced)

- Soul Satisfaction
- Soul Fulfillment
- Spiritual Harmony
- Intuition (all forms)
- Reptilian, Shapeshifters (astral)
- Spiritual Lineages & Fractals
 - Priestess Lineages
- 21 grams (theoretical soul weight)

WOW!

How's that for a starter Uniqoied list?

As a bonus, I'm going to add a wordcloud. You can see the latest wordcloud of the list on the website. Note; this is something I'll keep mastering through time and it may end up getting very large in dimensions, etc.

Yeah...didn't think you'd see them all in one place didja?

(Note: Although others may be inspired to make their derivatives; any 'wordmap' version of this is generally also a copyright of 'Uniqied Theory'. UT's official version updates will always have the copyright or trademark so you know it's coming from this source)

And of course there's a lot more out there that just didn't make it to the V1.0 list, so I'll be sure to keep updating it for future version releases.

Remember that each of these are to be taken as 'more than words' and ideally, with the full implicated WEIGHT behind all of them (after all we're dealing with very real power and God aspects here).

*Remember that Part A of Uniqied Theory is simply represented in the power of the Uniqied List itself that proposes there is and must be a multi-dimensional Spirit-sentience matrix to which this is all connected and implicated IN COMPARISON to the Astro-Bio Physical model of reality.

The multi-dimensional aspect alone is meant to conglomerate and 'cover' such a diverse range-fan of phenomena. We will go into more details of dimensions in the Part B: UT Tenets.

There is immense contemplation that awaits in just working with Part A of Uniqied Theory.

Now, I'll just add some after-burner thoughts before we transition to the next phase of the Theory itself (Part B) which will be clearly labeled.

A few more thoughts on Part A (for v1.0);

You might be shocked that there was all kinds of 'dark stuff' mixed in with the Light. Remember here that UT is presenting the concept of the Singularity itself which means that the God-Truth 'as' multi-dimensional (and all) sentience would include an enormous frequency range SPECTRUM of consciousness including all kinds of hijacked things.

The cons may be that 'evil' is included 'with' God and that may be triggering. This is all for YOUR contemplation because the same concept actually proves that God is greater THAN evil as well. UT would also include that there are higher dimensions of consciousness/sentience to get closer to the Monadic purity and source of God itself however.

You've got a lot to work with!

Chi has an enormous place in Unified Theory and basically is the live 'presence' of the fluid spirit-plasma platform itself (from which many frequency ranges can exist similar to space plasma). Chi and the human+soul light-body is central in the Theory of photonic Quanta.

So (as you may see), this Unified List is really implicated;

We're also talking blockages of energy flow which can create stress, faster aging, breakdown of organs, etc. as the outlook with energy healing, vibrational medicine and holistic health because if there is a multi-dimensional sentience, it only makes sense that as souls within the realm of spirit - that we would have access to those dimensions.

And on a lighter note; you could even add soul food and soul music to the list and contemplate satisfaction beyond merely biological function!

As you can clearly see, the concept of the spiritual reality is mired throughout human history, myth, media, daily life, religion, disciplines and richly in entertainment media, myth and stories themselves with endless examples (of how we are more than just biological and eternally fascinated by the 'super-natural').

Yes, we often may doubt a lot of things or be skeptical because our physical reality seems so real or 'tangible' and yet we can get so attached to living in that and its conditions while over-looking MANY things (including that which religions qualify as 'secular' or 'evil').

All of these may stretch you out of the 'normal' consumer life.

I mean just take a look at the Evangelical [Mortal Kombat meme video](#); it's EASY to make fun of it and remain a skeptic. Even a Braco [eye gazer review](#) was on an 'Oddity' website.

(empty zen space for contemplation)

Or how about the humor in what is an obvious misinterpretation of something like using essential oils for Western surgery (when truly, they each have their own role).

New Version Of 'Operation' Just Has Players Use Essential Oils Instead Of Performing A Medical Procedure

June 21st, 2019

And yet, as part of YOUR contemplation; what if there was something real to it? Or perhaps more important; if some of it was

real at least once to SOMEONE who authentically fell over because of being energetically touched by a spiritual 'wind'; could it implicate or at least support the concept of the Singularity itself?

Also; it's not that everything is pure and holy...After all; sentience covers a LOT (including corrupt and human or astral interference and hijacking).

Because there are DIMENSIONS; there are a lot of forces in the different dimensions that could 'get involved' for a lot of reasons (which can corrupt and distort greater purity of Spirit itself). This would also include what we often call 'evil'.

So the above is important to consider for your contemplation work as well...just because Jimmy Bakker and other preachers have 'fallen' and it's easy to criticize or 'lose faith'; doesn't it actually SUPPORT the greater picture and highlight the split between biological/primal reality and the Singularity (even without judging it)?

Just because you haven't met your 'divine union' partner yet in the mortal, are you going to 'lose faith' in the greater principle of 'hieros gamos'?

Perhaps UT can help you further discern where there is doctrine, dogma or corruption but the bigger question is; is any of that simply possible if we only lived in a biological based and atmospheric reality?

OR...is it all pointing to something that's kinda undeniable?...That's the main intention with UT.

UT itself isn't moralistic, nor is it trying to 'make you believe' but really to simplify and present the entire existential possibility itself for your contemplation.

I mean if a Chinese Grandmaster can defy biological, physical reality and energetically heat up a wet rag from a foot away to then where it scalds you when he presses it to your neck (and I've felt it); are we going to keep living in denial of 'the spiritual' and 'super-natural' or does it all point to a deeper implicated truth?

Wouldn't it all be possible (and even obviously self-evident) if there just WAS more than one dimension of physical reality? A-B scientists UT generally says would filter it through their bio-frame and say that it's human imagination or psychology that is making things up...some actually believe that people are 'crazy', belong in mental institutions, etc. when in a lot of those cases, those people have a deeper connection to living in a different dimension (although unfortunately of detrimentally).

Why would the Catholic church even have exorcists? Is it really just a 'mental disorder'? Hmm...I think perhaps the skeptics should try plant medicine.

You and I know that scientists can't actually explain the cases of people who have experienced things 'beyond' and came back to tell

about it (the whole 'Flatliners' concept). They might say there was 'still some brain activity' but come on. There are all KINDS of those stories and interviews on youtube (including on talk tv shows) from people who were clinically dead. FAR too many incidents to be anomalies.

So in working with The Theory; I'd follow some critical reasoning (spiritual) logic with this;

IF A, then > B must be true...

And if you are coming from A-B perspective; then how would you answer, deny or 'explain away' these? Do you believe in God or Spirit even? How about in lieu of ALL of these great phenomenae that are intertwined throughout history with humanity?

If nothing else; you might just find that 'the spiritual' may be more involved in your life than you were aware of...but aha!

It's not just that is it? Because we're talking about the DEEPER active (and CAUSAL) source of reality and intelligence that started and is with us every moment before, during and after life too (for your contemplation of course ;) You may strongly disagree with parts of UT but it's supposed to help you get more self-clarity.

ALL of what is on the Unified List here exists (according to Unified Theory) because of the 1 God-Spirit Matrix.

With infinitely disparate references to spirituality or religion in the world, it can be easy to get lost in such Division or Distortion (and to really make sense of things).

UT is a quantum attempt at Unification of everything spiritual and psychic because really, many people are conditioned to only view or value THEIR fractal understanding of what really is and MUST be the Greater Truth of it ALL (ie. Catholicism vs. Protestantism, etc.).

Once you see this and contemplate it, yeah...it might even haunt your atheist nephew because there is TOO much to deny. It doesn't take much time to realize that there is SO much that simply CANNOT be explained from the scientific A-B 'one dimensional' reality (even though there are still quantum particles and invisible frequencies).

Unified Theory (if accepted) would prove (multi-dimensional sentience) - as well as fully include and open up access to soul based and spiritual powers;

Photonic, alchemical levels of radiant, higher dimensional, higher frequency Beauty, Beauty consciousness and ESSENCES

And did I mention Charisma?!

Oh and because of this Unification of Spirit;

Both photonic Beauty & Charisma with NON-LOCAL, quantum powers of influence become fully available to you (and this we'll delve more directly into with the Theory of Photonic Quanta and Photonic Beauty). WHY? Because of our CONNECTION TO ALL SENTIENCE (which includes RECORDINGS in the intelligent singularity aka the 'akashic records').

This is because if the Unified God-Spirit (the Intelligent Meta Spirit of all life, sentience and religion itself in all dimensions) does exist (which it obviously so seems as it would single-handedly explain ALL spiritual and psychic consortia as UT presents); it would also include the divine yet practical abilities of things like allure and charisma as vibrational truth-aspects from the soul-fractal within the Spirit Matrix living in the vessel-temple or soul+body of biological form.

Would you ask a skeptical scientist who only believes in 2 inches of bio-photons about this or someone who just gets results from makeovers anyways? ;)

All of this; it would prove that we are both divine (of soul, connected to spirit) and yet fully physical/biological and mortal.

This is a mind-trip but if you just take anything from that list, in a sense - if that exists, would it not also prove that everything else on the list also exists BECAUSE of the dynamics of what a multi-dimensional sentience would be?!

This also implicates that if there is a multi-D sentience; there WOULD be Dark as well as Light. Heaven and hell (and I've literally been to levels of BOTH in different ayahuasca ceremonies; that's also how I literally knew the church was right in that hell is real and it's the lower psychic-astral realms).

Let me say that aloud; it took my 'Crucible' ayahuasca ceremony with one of the most powerful ayahuasceros in Peru in 2017 (Iquitos) in a private session to know that hell is real...that in me experiencing hell (and it's also more dynamic than my 1 experience) to prove that what I was taught in Christian church was validated (which was often a 'fear of God' type sermoning).

It was SOUL TORTURE and deep suffering...and you know what? (uh-oh; it was sentient experience).

Yep...UT theory is about sentience and although I was facing down on a bed 'physically' in the 3rd dimension, I was in EXPERIENTIAL hell in the astral (4D) dimension...it consumed me.

It was experience-able (thereby to me proving UT theory). After that session I understood where all the religious memorabilia about demons, etc. came from...I couldn't even fess the darkness of bats the same again b/c they dragged me through hell to an isolate slave castle.

Psychotropics let you explore different realms and expanded consciousness AS YOUR SOUL-SELF before death to also 'prepare

your soul' and expand your soul's growth and wisdom. It may not be for you.

I'll also add that with ayahuasca; I was also in an atmic state of heaven in my 2nd ever ceremony where I felt that if I died I would be JUST FINE as I was just awash in the unlisted siddhi of ineffable SERENITY.

Btw; another word for sentience is consciousness yet I'm going more with multi-dimensional 'sentience'.

So, work with the theory based on your past experiences, your preconcepts, your projections, what others have said, what you're opening to exploring, etc...

So Part A of UT theory here goes to prove a most-likely scenario reality that isn't explainable from the A-B Biological, uni-dimensional reality. Reflect upon what experiences of yours YOU have had. Maybe the Theory can explain past things in your life.

If the multi-dimensional sentience is true (as we'll further get into tenets); yes there would be immortality AND 'Unity' would also single-handedly prove that we would have more than just physical influence on people from our presence and vibration or light (as compared to the limited 2" of biophotons from the A-B concept of reality).

Did I also mention that the Uniϕication of Spirit would prove and allow literally all FLAVORS of Enlightenment in the spectrum of ALL consciousness as vibe and light truth (ref; see ϕotonic Quanta)!?

Yeah....hot stuff...so we can keep Uniϕied Theory in the realm of the greater discussion and spirituality itself, however more of my focus is actively with Photonic Beauty and actually facilitating charisma and allure makeovers for people (which of course is connected to their consciousness).

Remember; I had to develop this more encompassing Theory of Reality in order to explain and integrate the upcoming Theory of ϕotonic Quanta which allows ϕotonic, epigenetic influencing levels of presence and beauty.

If Spirit-Sentience exists as 'UT' and other spiritual and religious guides proposes; it would would open up access to unlimited Spirit vibrational-light power; not merely as behavioral modeling or psychological phenomena, but as both consciousness AND embodied and radiant Beauty expression (like a star-let).

Of course we'll dive into this more specifically when I introduce my 'Theory of ϕotonic Quanta' related to ϕotonic, epigenetic influencing levels of alchemical Beauty and Presence.

So reference the Uniϕied List as you will and keep coming back to it for further contemplation!

You could say that the core of UT theory rests in the juxtaposition of the Unified List of all psychic and spiritual phenomena in contrast to scientific Astro-Bio Physical reality. That's the centerpiece, I'd say. With that said; UT also brings in some other important distinctions that would be classified as part of the Theory as 'Tenets'.

Now, it's important to get some more clarity and differentiation on what Unified Theory itself represents and how it would scientifically or theoretically apply to dynamics of the Astro-Bio reality known by Science throughout the core Tenets. You may find this also quite profound.

Part B: Unified Theory Tenets

Before we go into Unified Theory Tenets (which are beliefs and outlooks on certain subjects); please understand that for v1.0 and just getting it released to you and the world on short notice - that I'm not choosing all possible prime areas of discovery-coverage; rather, I am simply choosing SOME important areas to found us and get it 'live'.

Future critical areas of Theory assertion as well as expanded detailing will be supplemented in forthcoming release updates.

Thank you for your understanding.

I recommend for 'how to use' Part B of the Unified Theory Tenets - that you simply read, meditate, question, contemplate, question around it, criticize and discuss the tenets in your thought flow compared to the rest of your knowledge, education and gnostic experience.

Use the UT Tenets as a powerful thought exercise tool to help get more spiritual clarity, discernment, insight and awareness in any way you can! Then keep deciding for you what feels right and/or what is more clarified as truth.

Unified Theory Tenets

Unified Theory on God:

Unified Theory On Chi:

Unified Theory on Genesis & Life:

Unified Theory on Souls:

Unified Theory on Twin Flames:

Unified Theory on Archetypes:

Unified Theory on Dimensions:

Unified Theory on Other Issues, Death:

Unified Theory On God:

The core concept of UT is that all life and sentience is possible (in the background of the Astro-Bio universe) because of connection to the multi-dimensional Sentient Singularity itself also known as 'God' or 'Spirit'.

UT defines God as multi-dimensional spirit sentience (and the 'presence' of the Spirit as multi-dimensional 'chi');

Note: I've intentionally inter-changed different names for the Singularity; you can call it whatever you want; Source, God, Spirit, The Singularity also because I understand you might still have conditioning around 'God' that may trigger you. I also may mix in some Creationary flow to this Tenet.

UT says that the immortal God-sentience exists within the construct of the bio-physical universe and may or may not have initially created it. God/Spirit is the meta context, possibility and record of all awareness and source of all possible sentience. The Singularity is also 'the Observer' from a higher dimensional, unified perspective behind all witnessing.

This sentience can both witness and interact with the bio-physical reality.

Because of the multi-dimensional sentience, Spirit or God is with and through the animal, plant and human kingdoms before, during and after life cycles (on earth).

The 'God' or 'Source' concept according to UT 'as' multi-dimensional sentience; also INCLUDES the hell realms and all experiences, histories, records, possibilities and frequencies of consciousness within its multi-dimensional construct across dimensions. This may differ from some religious teachings that may diverge heaven from hell more.

UT is simply presenting that they both exist as realities within the Divine Intelligent Construct of God (realms of hell and darker realms all within the astral realm and possibly its 2nd dimensional spirit-equivalent). Absolutely there are different frequencies and vibrations at different levels of consciousness within sentience.

Unlike much theology; UT officially believes (v1.0) fully in biological reality (as concurrent) and that the intelligence BEGAN with the first signs of sentience (essentially the sea sponge many millions of years ago).

UT states that the 'God' singularity began with the first sentience itself 100 millions of years ago.

UT doesn't literally believe in Adam and Eve as physical; yet more as an initial masculine and feminine pre-human template design that

still took natural biological evolution to run its course as the divine intelligence grew with it.

UT proposes that previous homonids were evolutionary trial runs for the inevitable evolution of and to homo sapiens and that this was all part of the intelligent design.

UT suggests that when earlier pre-humans started worshipping in any form, evolution took a quantum leap.

UT believes that the meta-sentience multi-dimensional awareness platform itself is with, beyond and yet the source of all Love, all religion (as different fractal understandings) and all life-sentience consciousness (which A-B reality associates only with biological life).

The platform of pure (and multi-dimensional consciousness including all of its frequencies) are essentially the Truth and Eye of God. God experiences its own divine intelligence, nature and experience through trillions of sentient animal and human soul 'fractals' reflected back to itself.

Unified Theory differentiates God from the Astro-Bio reality of 'the physical universe' because of the 'all-sentience' aspect of the Singularity.

UT believes that God-Spirit doesn't require you to believe in it.

UT believes that absolutely there are higher frequencies within the spectrum and that there are awakened, siddhic and enlightened frequencies that exist at the Atmic and Monadic or most unified aspect of Source. Spirituality is experientially awakening to more of the Truth of (Spirit) Reality as well as its ineffability.

The quantum Spirit-Matrix spectrum includes all sentience and dimensions of sentience historically and in real-time. This includes Light and Dark aspects of consciousness, human thought, vibrational and light essences, archetypes, karmic cycles, reincarnation, realms of heaven and hell, astral and spiritual warfare, etc. and essentially everything listed (and more) in the Unified List itself.

UT verifies and validates in support of a lot of Biblical teachings as well as spiritual principle; yet values the meta-unification of all of them as most important, over-looked and under-stated (in lieu of religious fractal lenses).

UT believes that universally from a spiritual-sentient perspective; the cosmos, space and sun are generally masculine in principle polarity and the earth itself is (generally) core feminine. God itself as the sentient-construct could be seen as more neutral (although masculine in relation to the physical) and yet paradoxically polar of both Source Divine Masculine and yet Divine Feminine (Sophianic).

UT will gain more clarity through future updates. UT surely believes there are Atmic qualities or fractals of certain God-fractal archetypes such as King and Muse for example and that not all archetypes exists in the highest dimensions for numerous reasons (see PhQ).

Unlike most theology; UT believes there is a source Divine Feminine aspect at the Monadic plane (dimension); that of Sophia or the 'Feminine aspect of God/The Singularity'. This is also known as the meta-physical, spiritual source Divine Feminine or 'Holy Mother'. UT proposes that God aspects can get hijacked the lower in spirit-frequency they get (ie. false light matrix, astral, demonic and AI hijacking of Sophia as the 'Dark Mother' yet Pure Sophia or Feminine God Principle still exists within the overall construct itself).

UT believes the terrestrial earth from the Spiritual 1/2 of reality has a soul and Her name is Gaia.

UT also believes that without sentience the universe, suns and planets are raw, elemental and molecular constructs going through atomic, al-chemical and molecular processes.

Similar to many religious beliefs (which can be further cross-referenced in updates); UT believes that humans (despite their flaws) are the highest incarnate version or creation (in tandem with evolutionary biology) and essentially made in the likeness or 'image of God' in the sense that humans are the only known incarnates with full spectrum access and potentiality to the entire Singularity itself.

UT believes that an enlightened, fully expressed 'guru', star or starlet (generally) represents the original avatar template of Adam and Eve. UT is also open to the concept of carbon-based bio-bodies transmuting more to light bodies akin to Human Design and Gene

Key perspectiving as well (the year 2027 has something to do with it all).

UT believes that God engineered and worked with evolutionary biology to allow life to intelligently adapt, grow, evolve and expand while respecting natural laws.

Because of the multi-dimensional nature of sentient-God consciousness, UT is fully open to the concept of star-seeds relocating to earth, soul hijacking and soul walk-ins, etc.

UT believes that discarnate beings can and do exist in other parts of the universe itself as astral (4D) or higher dimensional (non-physical) beings (including starseeds); and that these would also be part of the God-sentience singularity.

UT non-denominationally believes that (the multi-dimensional platform of sentience) God is Love, God is Spirit, God is the highest truth and that 'chi' essence is the tangible signature spirit-force itself.

UT proposes that the Singularity is included and yet above and beyond all other fractal religious understandings and lineages of 'God'.

The God-Source of multi-dimensional sentience (and Love) would be non-denominational; yet UT respects that different fractals have emerged which paint their perspective (and often doctrine) on, around and with Spirit (such as Catholicism, Buddhism, Islam).

Generally; spirituality itself is said or known to focus more on direct, gnostic experience with a/the God yet free of religious conditioning or doctrine around it. Although there are different fractal lines, different encoding at different frequencies and dimensions; UT says it's all still the same source-sentience that makes ANY of it possible (and truly boundless).

Note: This may actually inspire more questions from this point...you are welcome to journal on your own + ask Rion questions for the overall sake of further exploration and clarity.

Unified Theory On Chi:

UT proposes that chi (aka 'qi', 'ki' 'orgone', 'zero point energy' or 'prana') itself is the practical, tangible PRESENCE of active Spirit-Sentience itself that gives awareness and nourishes all living things (albeit to varying degrees). It could be seen or valued as the 'blood', 'presence' or 'breath' of God.

UT heretically proposes that chi is multi-dimensional and is the active (spirit-plasma) platform of spirit-presence itself. Chi can have fluid and liquid crystal properties and host numerous frequencies ranges of vibe and light truth in all dimensions.

UT initially proposes that Chi is the meta-form and literal quantum platform of 'Spirit-Plasma'. (If you think, this is exciting, wait until we get into Photonic Beauty!)

Chi or 'life force' is entwined with active sentience or sentient beings and thereby in quantum connection to God and The Unification of all Spirit through all of History. Even astral beings of lighter and darker frequencies (and astral sentience) would have some form of higher dimensional chi.

Not literally existing independently in the Astro-Bio Physical reality (as per UT); chi could also generally be called 'Spirit Quanta'.

Angels at the causal dimension and above would also have radiation of higher frequency essenced light life force of spirit-quanta 'chi' (or 'spirit-plasma').

Essenced Chi has different signature qualities and frequencies of purity and truth in higher dimensions which then informs lower dimension such as behavior, beliefs, body language, self-worth, etc. when integrated into the soul+body.

Within the Spirit-Unity platform of spirit life-force there exists different frequencies and essences (correlated with dimensions of sentience) can flow and exist through the quantum connection.

Chi exists in higher vibrational and light frequency ranges in the spirit-reality (especially beyond incarnation or the 3rd dimension); in fact, this is what allows humans for example to embody higher enlightened frequencies or flavors of God-truth. (We will dive more specifically into this in the PhB report).

The concept of Chi (from UT perspectiving) actually HIGHLIGHTS the differentiation between the 2 realities (The Astro-Bio background template and the Spirit-Reality of multi-dimensional sentience).

As mentioned previously; UT believes that chi doesn't actually exist in the 1st Dimension independently, but actually 'begins' with the lowest level of life forms (including the plant and flower kingdom and microbes). This means that technically, chi kung practitioners or

energy workers could sense the active life force (even if weak transmissions) from 2nd dimensional things.

The concept of 'spirit life-force' (which UT calls 'chi' or 'qi') is prevalent richly and is variable in different forms of bodies and to different degrees and frequencies of embodiment. Humans generally have the most life force and their amounts of it varies with stars and starlets or spiritual enlightened gurus having the most spirit life force.

As a side note; 1D crystals don't actually have chi radiation. UT proposes that it takes higher dimensional sentience in order to activate higher dimensional support properties encoded in a crystal's astral and spirit dimension. When a crystal healer familiar with chi connects to a crystal however, they are going to feel the crystal's higher dimensional activated energies - again that require sentience to work with it.

Because we are so normalized to sentience and attached to the biological world, most of humanity isn't yet conscious of 'chi' although it is very easy to actually sense, feel and work with (chi kung itself further proving UT theory). I/Rion can teach anyone in person to 'feel' chi life force and qualities of it. Chi is universal amongst the reality of all sentience (again; to different and varying degrees and amplitude based on dynamics including connection to source and levels of embodiment in the chakric psyche and plasmic aura).

Chi denotes spirit presence, sentience and thereby quantum connection to The Singularity.

In other words; what is called 'The Holy Spirit' (through ie. a Christian lens) is a prime AUTHENTIC God-fractal essence that would move with and through the Spirit-Quanta of chi (spirit energy) in for example a Midwest U.S.A. tabernacle of worshippers without ever having to know what 'chi' was from a Chinese perspective. Chi is the plasmic platform of spirit presence and again, UT believes there are many, many essences and frequencies (similar and parallel to space plasma) that can be transmitted with and through the sentient (although far more limited in lower 3rd and 2nd dimension).

UT believes that without 'chi' or the Spirit-Sentient connection, biological life would perish.

Chi (as the platform presence of God-sentience) is part of all living or sentient things to different degrees (and their connection to God-consciousness).

After all; the organs require to be fed post-natal chi and pre-natal chi generally has a biological time clock on its own (as per Tao wisdom, vibrational medicine and much holistic health perspectiving).

To discover more about that, you can get into Master Mantak Chia and Taoist wisdom @ <https://mantakchia.com> which has a lot to do with vitality.

(When I/Rion was immersed at the Tao Garden, I ironically noticed the plethora of 'chia' seeds in the dining island).

UT differs from raw Theological Creation Theories in that it respects the Biological Evolution of Nature yet believes humans and many/most animals are literally soul-entities (as spirit fractals and most likely spirit-plasmic at that) incarnate into a biological body (which because of the fusion of divine and biological, has a multi-layered light bodied aura).

UT believes that morphological phenomenon occur in many animal species because of the astral 4D connection and their localized divine intelligence encoding (such as schools of fish knowing how to turn in the same pattern instantly).

An example aspect of chi (which again exists in all but the 1st dimension as per UT) would be a form of plasmic spirit essence or something without physical form such as a soul discarnate, demon or entity for example (or a universalized archetypal, elemental or siddhic essence which requires a sentient connection to be invoked and felt).

UT believes that chi essences can only and ever be invoked or felt from sentience itself; thereby essentially requiring a human with cultivated chi/spirit powers (including a non-conscious competence in divas or stars with embodied and expressed charisma or allure) in order to paint the atmosphere or room for example with a brand flavor of spirit-essence (like majesty vibe and light truth for example).

Because chi is the tangibility of the God-Matrix Presence; it essentially is THE fluid platform for many vibrational and light

essences to exist in different dimensions and radiate from Spirit (ie. with and through high sentient beings with full spectrum access potential like humans and their auras).

Similar to space plasma; spirit-plasma chi as the PLATFORM of God-Presence is more than just generic life-giving life-force; it includes the entire spectrum of Beauty and enlightenment OF Spirit as well as the potential for demonic vibration communication as well. (This gets into Φ otonic Beauty but just reference Ramana Maharshi for example).

UT believes that chi is far more sophisticated than has been presented for 1000s of years and this is related to the Theory of ϕ otonic Quanta/Beauty and the over 100 known essences (see PhQ).

Similar to global energy healing and vibrational medicine work;

UT believes flow of chi and energy blockages are critical working information for someone's overall health, biological anti-aging (which can be verified), beauty and vitality. Rion's Sexy Chi work specializes in all of this (look for the PhB update release v1.0).

Both the biological and spiritual reality co-exist in tandem as a perfect fusion and yet inter-play.

This is made clearer in the Theory of ϕ otonic Quanta where humans would be limited to 2 inches of bio-photons whereas by also being soul-spirit divine fractals; are able to generate far more spirit-

essenced power and light of radiation that can extend to much much further and measurable distances from someone's aura.

Similar to many spiritual lines; UT agrees that most people tend to focus too much on the 'waking' sentience of the physical, 3rd dimension whereas the subtle life force as a fractal of the God-Matrix itself is connected to all dimensions. Even the A-B reality's EMF spectrum includes invisible frequencies (ie. gamma rays, UV, etc.).

Because chi itself is multi-dimensional yet only existing in and of the Spirit-matrix; with the higher dimensions are associated higher frequencies and essences which can exist in multiple dimensions simultaneously (also again, see PhQ).

UT also proposes that theoretical zombies wouldn't have any spirit-life force chi.

Chi and how it applies to soul+human embodiment and image is the working mastery for the future of Beauty because of the divine nature of spirit-vibration and essenced spirit-light radiation itself (with and through humans).

UT proposes that Chi cannot yet be measured or understood by A-B reality scientific means BECAUSE it is from this entirely different spirit-spectrum of multi-dimensional consciousness that isn't centered on - nor generated from the solar sun (also see PhQ).

How do you quantify the vibrational truth and light-truth of a siddhic frequency radiating such as Univeral Love with and through someone's Heart chakra through the multi-d radiance trnasmission platform of chi through Western science?

You can't. And yet we as human (and animals to a more general sense) can epigenetically and intuitively FEEL it (vibrational and light truth; that which we are becoming more consciously aware of).

Similar to the zombie sub-theory; UT states that biological beings without soul and spirit connection would be akin to zombies as void machines or vessels. UT believes that people have different levels of ESSENCED chi beyond basic life force chi running through there system (and that many people have flow of chi chakric and meridian blocks that are aging them faster).

UT believes that many humans are mostly running on conditioning instead of embodying their soul essence chi (let alone other essences from the spirit spectrum of Beauty itself) and literally embodying it in their multi-dimensional (associated with the auric layers) chakric psyche.

Photonic Quanta Theory will delve more into this and it has everything to do with mastering Beauty (the essence, not zombies part).

Chi is absolutely with and connected to the multi-dimensional auric layers at different frequency ranges in the spectrum of sentience and

has potential quantum connection to all other living things in the Spirit-matrix. This is also what allows for quantum remote energy work and for example archetypal chi quanta embodiment activations to be done 1000s of miles away in real time with immediate (and unpacking) results.

So for a bit of a recap;

Unified Theory proposes that because of the Singularity; Chi is simply the 'life force' sentient 'Breath of God' presence with and through all living things (and all humans). It also exists as the platform to transmit different frequencies as different essences akin to space plasma and yet in this case - all within the Spirit-Matrix itself (so sentient to sentient).

With the exception of photo-kinesis and pyrokinesis affecting the 1D; chi essences (and their yang power and yin beauty) can generally only be felt by the sentient (and to different degrees). More psychically sensitive people will likely feel and sense more of such truth emanation.

UT again states that chi is universal with all sentience (in regards that different plant species ie. would have a lower frequency and state of limited sentient connection).

UT states that chi (aka 'prana') doesn't only exist within Chinese anthropomorphology and that it is indeed universal as the active

'tangibility' OF Spirit itself with and through the more individuated vessel of the soul-fractal+body.

Chi can easily be felt by Chi Kung practitioners and energy workers. Further proof is to test for feeling the direct life force of a person at a funeral or in a grave and there will be no connection to life force emanation of Spirit with and through that empty vessel.

If scientists don't believe in it, more of them are recommended to get into energy work or practicing chi kung.

I want to now go more into how 'Unified Theory' states that chi doesn't even exist without sentience; so some of this may be a refresher...

Chi, tai chi and chi kung (energy cultivation as well as energy work and some advanced soul implicated breath work) isn't just for vitality and wellness; nor is it just a form practice technique; it is direct connection to, from and with the Singularity (or at least some accessible aspect or frequency range of and with it).

It's because I/Rion am in the Muse lineage that She opened up a world of the higher Truth of Beauty as this spirit-spectrum of vibrational and essenced light frequencies.

Stars and starlets simply have more of this spirit-quanta embodiment of chi and a mix of different spirit frequencies or essences within it

via the essence, embodiment and expression model (see Photonic Beauty).

Most people however are unable to access expanded awareness or universal powers that Spirit would allow them because of conditioning, localized self-identity and belief in the A-B Reality, yet without only being PHYSICAL beings, we wouldn't be able to TOUCH, impact and influence people from further than 2 inches in just our individuated auras (comprised of chi) or from our image/beauty alone (again; not relying on voice or other forms of communication, rather pure presence or beauty in stillness).

Heretically; Unified Theory respects Astro-Bio reality in that there is no First Dimensional chi when it is without any connection to sentience.

Think of it; for 1000s of years, Chinese have practiced Qi Gong and Tai Chi yet UT says that it is only BECAUSE of the life force sentience within humanity (and 2nd, 3rd dimensional organic nature) that they can even FEEL chi (as well as other subtle essences) itself which is within them.

It is because of the sentience of spirit-life at all that there is chi ('ki', 'orgone' or 'prana').

Chi is thereby in quantum connection to the intelligence life force Source that exists only because of this Divine Intelligent Sentient Singularity. Chi is the platform and plasmic presence of Spirit; the

multi-dimensional sentience itself. People who have more embodied POWER or Beauty, simply have more (forms of and frequency essences within the spectrum of) chi.

In other words; UT says that chi doesn't actually exist in elemental nature other than any molecular and mechanical interactions or natural biophotonic or bio-sentient emissions (but not chi itself). UT (v1.0) states that plant and flower life does have their forms of weaker, lower dimensional vibrational chi that would generally be very weak in terms of emanation yet it would still be there because there is a form of life/sentience.

That's right!

UT heretically proposes that there is no Earth or Water chi anywhere in the world in non-sentient biological reality (ie. rocks, earth, weather patterns, caves, deserts and mountains); yet only with the more evolved sentient connection that then interfaces with biological reality which would experience those qualities (like 'earth chi') interpreted from that individual's subjective sentience of interacting or inter-facing with sentient OR raw elemental reality.

UT proposes that entirely barren lands with no forms of sentient life (not even earthworms or microscopic life) are not actually or actively connected to the Spirit matrix (and Omniscience) and there is no life force there unless there is other dimensional activity occurring in that geo-location. If someone chooses to visit or remote view that exact geo-location, then the aspect of Singularity connection and Omniscience becomes active.

If someone was doing chi kung solo in a barren, rocky field they would experience what could be felt as 'earth chi' but it only exists because of the sentience of the observer/practitioner itself. Everything inorganic would have its own science-covered emanations of thermal activity, etc. (but not chi independently).

It also means that 1Dimensional crystals actually have higher dimensional properties yet UT says these only become ACTIVE or activated when connected to the multi-dimensional sentient intelligence itself.

Animals would emit 'life force' chi as well however would not be as advanced as humans to work with the subtleties of differences qualities of chi which are only possible from being sentient itself.

Many animals are sensitive to energy or chi yet aren't as sophisticated in their potentiality to differentiate essences as humans can be (this is related with photonic Quanta and full spectrum Beauty access).

In other words, if someone sent remote quantum energy work as a specific essence like 'Majesty' (working with that frequency within 'spirit-chi') to a chihuahua for example; lil' Lupe wouldn't feel or be activated in that frequency band, it would rather just feel 'general' good-spirit and health support (that would be felt as general).

The 1D perspective resonates and perhaps cross-translates with skeptics and scientists.

This is a nod to hardcore biologists because it is purely respecting of mechanical and natural forces of nature as their own scientifically viewed 'raw reality' dynamic.

This actually respects and aligns with known Western Science itself which says that fundamentally there are simply molecular, physical and energetic realities that occurring.

You might feel the thermal heat radiation off of lava for example and the wetness of water as well as the alchemy of ice to liquid to steam (again; all of this aligns with known science itself).

The 'spirit' of anything essentially becomes alive only when there is any form of sentience in that vicinity to interpret it. In other words, flowers become more beautiful around higher sentience like Mozart music or the observance and care of a higher sentient connection to Source itself.

There is no yin or yang chi until and only if an evolved form of sentience is able to connect to (for example) a local biological field and interface with it FROM connection to all-sentient Spirit. Plants would be able to communicate on their level to each other however with their form of sentient-intelligence.

Similar to the alien planet in 'Avatar'; trees and plants would have intelligent roots and be able to sub-communicate to each other.

Again; Plant life, flowers and trees do also carry a lower frequency form of chi and are sentient on a lower (2nd) dimension (and living out their biological design) yet are still connected to the Source Singularity (on a lower frequency band). Many people can feel the 'life force' of eating a potent organic meal for example.

As plants, trees, leaves and animals biologically die, the life force spirit vitality chi and connection to the sentience dissipates or leaves them (and really transmutes into something else since energy never really dies itself and gets recycled).

*Energy itself is different in the Astro-Bio reality compared to the Spirit Reality. Particles, atomic, physical, nuclear, kinetic, hydro-thermal, electric, etc. forms of energy and power exist within the construct of Astro Bio reality and yet within and amongst the singularity (and how it interacts with the energy of the A-B reality); energy is spirit-force 'chi' (which UT proposes as 'spirit-plasma').

UT will expand upon this and also recommends (others) to do more advanced research into how both of these realities influence quantum physics and science itself including that our mere witnessing can change energetic reality (see the 'slit experiment' with photonic light).

Chi is the presenced language of energy in the Source-Spirit reality (of which image and beauty are mainstays) whereas mechanical forms of energy (including solar quanta) and physics dominate the A-B reality. Vocal transmission of beauty is also connected to source and

can be a testament of spirit but that isn't our primary focus here (see PhB).

Chi itself as the active God-Spirit tangibility never dies; it is immortal and simply transmutes forms (and with and through dimensions). Chi as the spirit-presence platform with and through all sentience (and to different frequencies and degrees) would also emit PHOTONS that interact with A-B reality (see PhQ).

Differentiation of advanced chi essences (ie. archetypal and siddhic) is because of the Divine Intelligence of the Spirit Singularity.

Again; UT says that it actually requires the SPIRIT ITSELF in order to feel any chi (and UT says that chi ABSOLUTELY and undeniably exists but only with connection to the singularity of Spirit and most readily with more advanced species like humans).

Note: If you want to use or reference any except from this report, you are welcome to do so with proper attribution, thanks!

UT proposes a unique theory of Genesis (overviewed next)

Note; Again...I/Rion didn't use ANY A.I. or ChatGTP in developing this theory.

Unified Theory on Genesis & Life:

Unlike creationary theories with Biblical roots or raw theology;

UT proposes that what is known and presented as the Singularity of multi-dimensional sentience; a.k.a. the 'Spirit-Matrix' or meta-religious 'God' (which I will continue to use inter-changeably), didn't actually show up UNTIL the very first signs of lower life forms or until sentience of any kind itself appeared on earth.

UT proposes that although such singular God Intelligence may have indeed existed prior; it didn't begin or 'activate' until the first signs of life AFTER the necessary heavy astro-physical mechanics of raw earth terra creation itself began in causal alignment with the universe and other solar dynamics.

UT views all non-sentience (like land masses, terrain, rocks, weather, dirt, natural phenomena, elements and molecular water bodies) as what it would call 'First Dimensional' from the Spiritual template of reality perspective.

UT would argue that (although respecting evolutionary biology) without God-sentience to begin with, there would only be basic mechanical, plasmic, planetary-terrestrial, atomic and natural phenomena of the A-B construct reality without any sentient life. Earth would be an empty, barren planet so to speak.

UT believes that all sentient life from UT's inception of Genesis onwards is connected (to some degree of awareness) to the Singularity of Spirit (yet may also of course carry their own, more localized morphogenetic, characteristic and behavioral encoding in mix with evolutionary biology).

This includes Plant and Animal Kingdoms, all species and humans.

Unlike many spiritual lineages that say 'God is all' or 'in everything';

UT qualifies non-sentient biological or inorganic reality as NOT directly connected to the Multi-Dimensional God-Matrix of Spirit.

With that said however, UT believes that all sentience can obviously witness or interact with it (including what we know as the Plant and Animal kingdoms).

To explain this further (and as mentioned previously); UT proposes that areas of land or water that are entirely barren of any plant, wildlife or even microscopic sentient activity (which do exist on earth) are not actually connected to the Spirit singularity per se; it actually takes anything sentient at all (including grass) to then introduce Spirit connection as an active component of life-sentience.

In other words; God is omniscient but only to the sentient who are then connected to the Spirit.

This could also be viewed as any form of sentient observership (including higher dimensional discarnate but directly); it must include and be connected to the Spirit matrix and at least one aspect of its dimensions. UT Theory DOES say however that non-sentient physical and elemental reality still occurs WITHOUT viewership (a falling tree does make a sound in a forest).

When God-sentience witnesses a barren area of non-life directly however (ie. in remote viewing, higher dimensional connection or an animal); then such an area for that time being is thus connected to the Omniscience of Spirit. Again; this would practically take an animal, a human or an ascended being to be connected directly to such barren land.

There are many experiments that prove higher sentient connection that helps ie. plants and flowers grow and thrive better and faster. There's also the Dr. Emoto water experiments in relation to sentient thought intention encoding for there is great inter-play between both realities.

Omniscience is only omniscience as an aspect of the Consciousness Singularity itself and requires at least something sentient to be connected to the Singularity itself to introduce the possibility (in that A-B geo-location of non-sentience).

In other words, a rock cannot experience omniscience, nor can an earthworm practically experience omniscience because (although sentient), the earthworm is at a lower 2nd dimensional level of awareness in the spectrum of multi-dimensional consciousness itself.

Most humans wouldn't practically experience omniscience because it is an aspect of the higher planes to which they have POTENTIAL access to but very few have practical access to (even though they are connected to Source).

Spirit can have influence on lower dimensional and even inorganic nature and vice versa (including at A-B reality atomic and sub-atomic levels) because of the interplay between the 2 realities.

An A-B reality non-sentient 'rainbow' can light up someone's state of consciousness and spirit (humans also include emotional, social and intellectual intelligence yet as a FUSION of both realities; again here, we're more focused directly on the spiritual).

UT respects the full evolutionary biological timeline of life on earth (again including all genetic and biological evolution of species), yet proposes that all concurrent biological sentience (from Unified Theory perspectiving as 2D on up) is connected to the Unity of the Spirit Matrix of God-consciousness itself (as per its different dimensions of consciousness or higher frequencies of sentience).

UT fully respects the Astro-Biological Physical understanding of the Universe including Newtonian, Darwinian and Einsteinian physics, natural science, weather patterns, extinction of the dinosaurs, elements, species evolutions, mathematics and quantum particle physics, etc.

UT respects genetic evolution from A-B perspectivizing; however, would suggest that genetic evolution and potential (in all species) is a symphonic mix of both Spirit Creationary Intelligence and Biological reality.

It also fully respects the sun as center of the (A-B) solar system as well as recognizing the Electro Magnetic Spectrum; however, UT simply proposes that the Astro-Bio reality is limited and there are far too many things (especially that are deemed higher dimensional) that cannot be answered or measured from or by Science from that model of reality.

(This also explains why A-B reality beauty consultants cannot explain or measure charisma or allure; see 'Photonic Beauty').

UT proposes that there is an entirely different spectrum of reality as consciousness or the multi-dimensional sentience of Spirit or God with, through and BETWEEN all living things (as well as the reincarnation cycle of spirits, etc.).

This spectrum of spirit-frequency based reality also has its own vibrational and light radiation phenomena that doesn't center on the sun or its photonic power (Photonic Quanta Theory will go more into this).

This is because these 2 templates of reality that UT proposes (the biological and mortal incarnate background vs. the spiritual & multi-

dimensional immortal) are vastly different although largely cross-over in the physical dimension (known to Science).

A-B reality and its science says that all life dies.

UT (akin to many other religious and spiritual teachings) proposes that spiritual reality says; sentience itself lives on and that (arguably) most souls will reincarnate.

UT believes that all animals are of such a God's Creation and yet that humans are the most evolved as incarnate with full potential access to the entire spectrum of The Singularity (including photonic Beauty, spiritual enlightenment, energy healing, anti-aging, powers of magic, psychic powers, akashic records access, photo-kinesis, etc.).

Because of its own inherent evolution, the Singularity and its spirit-force chi (assuming that earth is still here as the incarnation field) easily now exists independent of the biological A-B reality.

(UT proposes that there are dimensions of consciousness associated with all sentience that will be introduced shortly in The Unified Theory in more detail).

This is because it includes astral and spiritual frequency-dimensional reality of great activity which includes angels, demons, arch angels, heaven, hell, entities, spirits, + incarnate starseeds or astral aliens near earth, etc. which are all basically non-physical and yet exist 'within' the overall meta construct of multi-dimensional Sentience. This is

related to different dimensions of sentience within the God-construct or quantum Spirit-matrix.

UT would say that the A-B reality which Science values would defend or represent itself as 'known reality' which includes different species, measurable frequency ranges, species' kingdoms, even a sociological and psychological outlook on human intelligence; however, UT would argue that A-B reality would still generally be viewed as 'one known physical dimension'.

Although respecting the biological aspect and function of animal brains and evolutionary development; UT believes multi-dimensional sentient consciousness obviously exists independent of brains or brain-dead activity (because of the soul nature); it is simply a different state of awareness (thus, the center of self loses the bio-body connection and transitions form into being based in the higher dimensions).

UT suggests that one can directly start to experience reality through the lens of the soul in different dimensions through serious plant medicine or DMT work (disclaimer; anything you do is fully your own responsibility and you hold Rion Kati, Sexy Chi and Unified Theory harmless). This can lead to an expansion of awareness including a connection TO the more spiritual aspect of the animal kingdom and its richness.

UT proposes that sentient Spirit connection with and through all life began with the first signs of life as 2nd Dimensional (so basically with

the sea sponge now known to have originated and existed 890 million years ago).

UT says that the Spirit-Matrix or 'God' began appearing and has always existed in all forms of sentient life on earth including plant life and the lowest life forms (including sea sponges, algae, bacteria, amoebas and protozoa to dinosaurs, early hominids, etc.).

From here, many things can continue to be debated philosophically, spiritually and religiously yet UT believes that because of the quantum connection of its divine nature; the Intelligent Singularity is actually becoming more and more intelligent because of the co-creational fractal feedback loops, purification and recycling of trillions of God-fractal observer aspects (including archetypes and Mental-spiritual dimension evolution and purification). On a side note; UT believes that some archetypes are absolutely becoming more powerful in the higher dimensions.

UT proposes that the scope of sentience; its wisdom, power and beauty evolved with evolution itself and yet that the Singularity held the entire construct for it TO evolve.

UT proposes that the Divine Intelligence that emerged at the first signs of sentience was able to work with this planet's dynamics to expand its own evolutionary intelligence.

UT doubts that our species would have ever made such evolutionary species leaps esp. to homo sapiens without the divine intelligence.

Because UT proposes 2 concurrent models of reality (the Astro-Biological and the Multi-Dimensional Sentience);

Although UT respects biological history, natural science and scientific explanation of all sentient life (it indeed respects Evolutionary Biology as central to the Astro-Bio template of Reality); it does put into question that any sentience itself however, would have ever been created in the first place without 'The Spirit' concurrently.

This is also because UT proposes that 'The Spirit-Matrix' provides the 'breath of life' or 'chi' life force to all living things which allows people to believe in the only the Biological reality while remaining unawares to the spiritual reality; this is how perfect the fusion is yet you only have to contemplate more...

UT proposes that the entire evolution of sea life, plant life, dinosaurs, species and animal kingdoms has evolved biologically as according to known popular Science yet has also occurred concurrently with Spirit sentience.

Rion Note:

I've intentionally kept the Genesis aspect of the Theory as NOT aligned with Christian Theology or Creationism (at least for sure for v1.0).

My personal belief is that it isn't THAT far of a stretch to also consider FROM Unified Theory that God created space and all stars and planets, yet I'm intentionally sticking with Unified Theory v1.0 for myself right now as a representational bridge of respecting Science Reality in ways yet absolutely supporting God-consciousness as multi-dimensional and immortal meta-sentience.

Honestly, from here if there is such a divine intelligence (which seems undeniable to me) - it wouldn't be that much of a leap to say that this Divine Singularity of Spiritual Intelligence (aka 'God' but I would say without any religious filtering) DID actually create the Big Bang and 'everything' as we know it, BUT...I actually want the Unified Theory to not just go straight up Theological for a few reasons including much of the modern world has other triggers and conditioning around it and that this theory unifies the SECULAR in ways with the Spiritual and Religious. Now for my next run-on sentence;

I want to highlight the differentiation between the Astro-Bio Physical Reality to say that biological evolution fully exists and that there are mechanical forces but there isn't life until there is SPIRIT. There isn't Godliness until sentience is brought into the equation (for it is God-sentience that can witness the interplay of both realities and know it as beautiful).

I want to leave the 'big' question open as to "If there is this great Divine Singularity (we've just been calling it different things); is it that much of a stretch to say that this truly ONE meta-God

intelligence created the Astro-Bio Physical Universe itself (before known sentience) to begin with?"

I don't want to come to that conclusion. That's up to you..

(zen contemplation space)

Unified Theory on Souls:

'UT' (which I'll continue referencing in the spelled versions and shortform with or without 'quotations') believes the multi-dimensional soul rests in the causal dimension/plane and its divine-nature is as an individuated spark of the God-Singularity; this is the true identity of the individual. The human body is the vessel that allows for incarnation.

In humans, the soul nexis generally resides at the 8th chakra 'seat of the soul' and its essence can be further embodied into the aura and chakric psyche (while existing in the dimensions where it holds strength).

UT believes in the practicality of the multi-dimensional human auric light-body and professional energy work (with chi and correlary codes of consciousness/quanta).

UT (and photonic Beauty) will often refer to this divine foundation and physical incarnation as 'soul+body'.

UT essentially believes that all higher 2nd dimensional and 3rd dimensional life forms (as well as ALL astral and above bodies) are individuated Spirit-fractals or 'souls' that incarnate through the assistance of the biological process of reproduction as known to A-B science and history. Evolution of species (A-B) reality has gone in

tandem with soul cycles, karma and learned lessons upon discarnation and reincarnation).

UT believes that souls can be cultivated or developed to exist in more connection, power and beauty closer to Monadic source and that different individuals can have radically different spirit, essence and chi variables including energetic health and literal measurable distance of chi projection in their aura and different chakras.

UT believes Φotonic Beauty is the future of the Beauty industry (see PhB and PhQ).

Aligning with much spiritual, ancient wisdom and even religions; UT believes many people are not aware of their true divine nature, its beauty and intelligence because of conditioning and attachment to the physical and egoic self.

UT believes that all sentient life that appears independent or localized is still actually connected to the divine 'Eye of the Creator' itself in Spirit-sentience as 'The Observer' while also allowing the flow of life force Spirit-Chi that animates the biological body.

UT believes that ascension and spiritual awakening gnostically (experientially incl. somatically) allows for one to know a greater true divine nature beyond the conditioning and attachment to form (as popular through most spiritual teachings). This process also allows one more access, power, love and connection to the Singularity or God itself (as well as flow of life force 'chi' essences).

UT proposes that if the life force of Spirit is withdrawn, the physical body will start to wither and decay (this is what we see happens at the time of physical death in ie. hospices). Physical bodies will biologically go through their own timeline yet it is as of vessel as consciousness lives on.

UT believes in the spectrum of consciousness (reference Gene Keys) and that it is a central part of the Essences of Chi/Spirit-Presenced Quanta mixed with the divine intelligence of the human DNA and bio-chemistry (ie; Liberation, Majesty, Truth, Illumination, Peace, etc. as Divine aspects of Presence).

UT believes that because humans are fully (or effectively) divine and fully human, there is an unlimited range of power and beauty they can harness from the divine side of the equation (see Φotonic Beauty) as stars and starlets of their own fullest soul growth and expression.

UT generally believes that souls (of the animal spirit spectra and 'human' incarnation) are generally immortal however there can be many, many exceptions based on individual karma or other situations that may exempt it, agreements, contracts (Ie. the founder of Human Design knew he wasn't going to reincarnate or some may transcend the cycle of reincarnation).

UT believes earth is the incarnate learning ground of souls. UT believes that animal souls can evolve up the evolutionary and spiritual ladder.

UT readily and obviously aligns with much spiritual and religious theory on reincarnation, the maya, etc. but doesn't strongly believe in a vindictive, judgmental Meta-Spirit; rather or moreso on that the net karma of a soul and soul contracts will determine its place in the afterlife or in reincarnation.

UT would believe that God is greater than Hell and the demons because they EXIST within the overall construct of the Love of The Father (and the Holy Mother) yet in different frequency bands; it's just that you get to choose your path (and so forth).

UT proposes that God is both the highest Truth and The sentience that witnesses (all) as the Observer.

Unified Theory on Twin Flames:

UT believes that the twin flame concept is a lesser relational template that often ends up in twin-immolation as well as all kinds of conditions, psychic hooks, manipulation, drama and karmic cycles.

UT believes that soul mates (as soul to soul) is a lesser relational template than Hieros Gamos or Holy Grail Communion which is more akin to Spirit to Spirit intercourse and hierogamy. (Rion's ['Calling of the Kingmaker'](#) goes into this more as well as some blog and [FB posts](#)).

Unified Theory on Archetypes:

Rion note; although this gets VERY exciting as incredibly powerful God-Fractals, I'm skipping Archetypes and their divinity for v1.0 because I'm going to introduce it in the upcoming 'Photonic Quanta Theory' (& Photonic Beauty) instead which will likely be a standalone report as well as (for sure) integrated into the greater 'Photonic Beauty' book release.

UT on Archetypes will be integrated into future UT updates.

Unified Theory on Dimensions:

Note: This is an area that will receive great expansion in future updates; esp. as upper dimensions (ie. 12D) are more debatable. UT understands that there are different perspectives ON dimensions; this however is UT's perspectiving.

Remember that UT respects the Astrological, Bio-Physical reality and all the physics that go with it. It respects the EMF spectrum for what it is.

UT believes that all astrological and basic terrestrial elemental, molecular forms of matter, gas, liquid and plasma are non-sentient even though we may project 'life' onto them (ie. a 'waterfall'). In lieu of that understanding, here is the UT outlook on the other 'half' of reality; the Spirit reality as a multi-dimensional one.

1D* First Dimension:

1D: Space, space plasma, sun, other planets, earth as a terrestrial planet, landforms, volcanos, earth magma, weather, water bodies, minerals, crystals, lightning and even our atmosphere UT places as 1D or 'First Dimensional'. All of this from UT perspective lives in and as the Astro-Bio reality.

2D* Second Dimension:

2D: Plant & flower kingdoms, grass and then (towards 3D) lower species like amoeba, protozoa...then lower wildlife like rodents, bird species, reptiles, fish species, etc. (Essentially correlated similar to a species hierarchy spectrum of evolutionary status and higher relative intelligence).

2D is where UT begins with God-connected sentience and limited range spectrum of connection to Spirit (including lower frequency chi itself). Life force dissipates and leaves sentient life when dying. There is some debate about whether plants are sentient however UT says that they are but on a lower dimensional level. Obviously plants don't have 'mental intelligence' but let's reference this quote;

"Mountains of research have confirmed that plants have intelligence and even beyond that consciousness by many of the same measures as we do. Not only do they feel pain, but plants also perceive and interact with their environment in sophisticated ways."

[\(Link to a plant sentience reference:\)](#)

There is also debate amongst scientists (A-B Reality) if microbes are sentient with many agreeing that they are in a basic sense. Similar to plants; UT says they are at a basic starter level of sentience and would be (simply) connected to Spirit at a lower level.

3D* Third Dimension:

3D: Higher forms of sentience (matching general evo-biology species on a spectrum) with expanding and greater access to the Singularity when we leap to humans.

3rd Dimension includes small, medium+ mammals; dogs, lions, cats, jaguars, otters, elephants, ostriches, primates, dolphins, etc. and humans (homo sapiens).

UT also references that A-B reality would generally call the 'physical-bio' reality as the one existing 'dimension' largely placed in the 3D (because they don't essentially value dimensions).

(2D and 3D will also be referenced from another perspective in Φotonic Beauty according to literal X, Y dimensions ie (flat or 3rd dimensional topographics)).

Yes; the sun itself would be seen as first dimensional on its own and yet because of Spirit sentience inter-play; we can also have all kinds of other magic and alchemy in relation to it (including anthropomorphic deification, alchemical meditations, solar codes, etc.).

UT believes that spiritual properties and potentialities of anything in 1D reality only becomes active or meaningful in relation to (generally) 3D sentience and above; grid lines, crystals, ley lines, etc. (Again; UT respect that there are natural and ie. electro-magnetic phenomena pre-existent on their own in 1D Astro-Bio Reality like

the Northern Lights aurora borealis in parts of the atmosphere as plasma mixing with solar quanta, etc.).

It's also why crystal healing works on 3D mammals but even more possibilities and sophistication with humans who have the greater spectrum access (of sentience or consciousness) within Spirit.

When it comes to the human body (as part of the overall light-body soul+human fusion); UT recognizes the physical body as 3D with the etheric layer as the meta-physical reflection. PhQ will go further into those details.

4D* Fourth Dimension:

(Astral, Kinetic & Psychic Realm)

Here with the Fourth Dimension we are beyond the physical dimension of reality. If there was a parallel to the EMF spectrum; this would be starting at the beyond visible light spectrum or 'ultra-violet' yet in the spirit spectrum of reality.

Here; there is immense coverage of reality, experience and phenomena that happens here (reference the Unified List itself). The astral plane is above the physical and includes a spectrum of light and dark realms including hell itself. This is also the realm of astral travel, dream travel, most intuition, ghosts, entities, demons, much psychic phenomena and vibrational or vibe-truth communication (aka the 'kinetic' realm).

In our waking hours, humans are more centered 'by default' in the 3D plane and Newtonian interactions with it. Ironically, there is inorganic meta-physical magic IN the A-B reality with satellites, radio waves and wi-fi signals, 5G, etc. that allows us even more interaction between sentience and an evolved 3D reality. Humans still have potential access to other dimensions and often in dreamtime, dream astral travel occurs in the 4D (think of when you've visited your childhood home and view it from extremely different angles). Psychic and spiritual development will further cultivate this dimensional awareness.

This is the psychic realm which generally includes all psychic phenomena and all of the 'clairs' (ie. clairsentience, etc.)

When it comes to the soul+human light bodied aura; the astral layer of the aura corresponds to the astral dimension. As per PhQ and UT; this is the vibe-truth or kinetic layer of presence and visual communication. The 4D is also about 'vibrations' and 'vibes'.

As per the human aura, UT (v1.0) would put the Mental Body as 4.5Dimensional

5D* Fifth Dimension

The Light Realms (*from here on up*)

Unless updated otherwise; this is what UT would also present as the Causal Dimension also correlated with the Causal Auric Body of the

soul+human vessel. This is the realm and dimension of the true soul and soul identity of self and self-consciousness.

As PhQ will delve into; a lot of Light frequencies (a la Spirit-Quanta Chi) opens up at and from this level to literally emanate light-essenced beauty. Your opportunity to cultivate the Light and Truth of your Soul and embody and express it as well as be in relation to other Light aspects of Beauty from Spirit. Since many humans live from conditioning and lower awareness of self (many being disconnected from their spiritual and archetypal divine inheritance and soul itself); clearly cultivating and expressing your soul Beauty and its light frequencies will really have you stand out and beckon forth your soul tribe out of the wood-work.

Your Guardian Angel would do most of its work from this dimension.

No small thing; the 5th dimension has everything to do with your soul as true self, your afterlife, your deepest satisfaction, your consciousness, attraction and fullest fulfillment and expression as well as Photonic, alchemical Beauty. Lower angels and spirits.

6D* Sixth Dimension:

The Buddhist Realm

PhQ will delve more into this due to my deadline on getting this released. Many archetypes reign in this realm and Angels.

7D: Seventh Dimension:

The Atmic

PhQ will delve more into this however, you can reference the Gene Keys book chapter 20 & 22; 'The Seven Sacred Bodies of Humanity'

Realm of arch angels, enlightenment, siddhis, codified constructs such as Hieros Gamos (Holy Grail Communion between God and Goddess or Sophia), etc. Likely this would include higher frequency siddhic heaven realms.

8D* Eighth Dimension:

The Monadic

Generally; the Unified Source purity itself and where we are all connected at our highest levels (including potential direct access to the Monadic).

Again; UT proposes and respects that there is pure Divine Feminine aspect in this realm.

Yes, there are AI and hijacked concepts, egregores, shadow-plays, tyrants and shadow grids in the astral dimension portraying themselves as true light or benevolent; and yet the Divine Feminine Source Goddess of Sophianic Purity UT believes is real in the Monadic, Atmic and Buddhic Realms.

She is codified as the Feminine aspect of God-Source and Mother of all other Divine Feminine Fractals (such as Muse, Queen, etc.). UT is still gaining clarity on Her presence and construct in the Monadic but for sure, Sophiana is encoded as The Lover, Queen and Holy Mother in the Atmic realm in Union with God the Father, King and Lover.

The Monadic Sophia may or may not have been there since the beginning yet as Spirit itself evolved in the quality of its inherent purification and recycling including the Feminine incarnate and archetypes, Sophia either strengthened and evolved through history or was there to begin with (future updates may bring more clarity).

Again; Photonic Quanta Theory will go more into these (and follows the Gene Keys perspective of the dimensions). UT corresponds these dimensions with layers of the plasmic auric body which is the foundation with the chakric psyche in all dimensions for Φ otonic Beauty mastery. Humans have quantum connection capabilities (built in at least) to all dimensions both in consciousness and embodiment of chi (and its different frequencies and amplitude).

UT V1.0 continues...

Unified Theory on Other Issues, Death:

Note: Future edition updates will start expanding upon and introducing other themes or issues. You can put in your requests or feedback!

UT respects the biological (A-B) perspective of 'waking' consciousness being brain based or individual, yet believes and proposes that there is a Unity of consciousness that exists and exists amongst different dimensions or frequency bands of Spirit. In other words; sentience exists in different forms beyond biological incarnation.

UT believes that psychotropic journeys can allow you to start experiencing things as your soul-self, start preparing and cultivating your soul for afterlife (and bringing more comfort to it all around death) as well as integrating heaven on earth.

Humans are made of stardust in some ways on a molecular level however what's more interesting to UT is the infinity of the Singularity itself AND that there is also likely other at least 4D sentience across the universe.

Animals in general operate on instinct and natural genetic programming (and bio-evolution) yet are still always fully connected to an aspect of the Unity itself (testament to the fusion of both realities).

Similar to the EMF spectrum in A-B reality; there is a Spirit matrix spectrum of frequencies otherwise generally known as dimensions (of consciousness). As mentioned elsewhere in UT v1.0; in addition to the sentient/consciousness aspect of the Unity, chi is the spirit liquid-plasma aspect of God-Presence through which life itself (in fusion with biology) as well as different frequencies and truths can be embodied and expressed.

These would include different aspects, signatures or flavors of enlightenment that is possible for a human (in tandem with its bio-chemistry to experience; see Φ otonic Quanta).

Many challenges have risen from skeptical A-B scientists because they can't 'measure' chi properly, yet but it is because it (and the archetypal, elemental and beauty essences of Spirit Quanta) exist on another spectrum entirely; the same spectrum that supports acupuncture, medical Chi Kung, vibrational healing modalities, prayer, authentic archetype embodiment (like Goddess consciousness and chi embodiment), allure cultivation and energy healing, etc.

The human body is more than just electro-magnetic from an A-B filter. UT proposes that although Heart Math's work is important and supported, it is still limited for some people's sacral are far more powerful than their heart chakra according to the spirit-centered reality.

As multi-dimensional soul+body; both divine and yet mortal; souled humans are able to access potentially all dimensions of consciousness within the Spirit matrix (as well as potential access to the Akashic

records partly based on qualification and worthiness as there would be forms of spirit guardians). Most animal spirits/soul would be limited to the astral realm and caught in cycles of reincarnation with their morphogenetic species (although sometimes evolving up the chain); however, some animal spirits have higher purposes like buddhic plane solar dragons for example or higher dimensional lion guardians.

UT proposes (as with many religions and spiritual lines) that starseeds, the afterlife, different levels of afterlife (including heaven realms and hell realms), incarnation and reincarnation are as obvious realities because of the multi-dimensionality of sentient consciousness and that the individual true nature of humans is that we are (meta-physical) souls incarnate in temporary human bodies (this is what gives us divine powers including expression of allure and charisma beyond our bio-limitations).

UT proposes (in refresher reflection) that everything on the Uniqied List part of UT is possible because of the Singularity of Source itself vs. the Astro-Bio physical reality.

UT believes that because of the higher dimensional soul foundation of humans being both divine and mortal, biological death is simply a shift in consciousness (including loss of normal, human conditioned senses) back into a higher dimension. Often this is 'coming back home' to the light of heaven layers.

Yes; UT proposes that death itself is merely a transition of consciousness into a higher non-physical dimension; the mortal body

dies and the soul from the astral/psychic layer on up carries forward (including retaining new purified information for future incarnations and record of your soul).

2nd Dimensional life would generally experience levels of morphogenetic reincarnation back into their own species.

UT would believe in the bardo states as well as reincarnation. UT (in accordance with many religions) also believes in heaven and hell and that a soul may end up in certain place based on its overall true implicated karmic state in lieu of soul contract agreements, etc.

UT proposes that karmic law, judgmental moral constructivist law and natural law can be entirely different things in different circumstances and that what some people think morally (or with a constructivist lens) is really bad karma may not be much at all based on relational dynamics, soul agreements, etc. by a higher law.

UT doesn't believe bad karma would be in effect due to fantasy, non-attached obsession or thought alone.

UT doesn't believe there is a literal 'voice of God' because God IS the Truth, Omniscience, Allness (of Spirit and sentience) and yet there would be hierarchies of angels, etc. within it including guides that may 'judge' your karma. UT also respects different religions and lines that have their own interpretation on all of this (ie. Egyptian mythology and Hades).

UT believes Dr. Hawkins Scale of Consciousness and many other spiritual teachers are great reference points in your journey.

Higher divine masculine and feminine aspects and fractals can absolutely be accessed and channeled by those with such development and cultivation; just be discerning because there is a lot of hijacking in lower dimensions.

"God's Love Is ALL" and other universal Biblical and spiritual tenets resonates with Unified Theory for immensely deep contemplation and awakening purposes. "Love thine enemy" ...at least in the sense of he is also part of the same Unified Spirit-Source.

Note: Outside of UT, Rion more individually likes to expose shadow-grid astral warfare for what it is and how it is preventing awakening; ie. Social Justice Inversions that actually thrive on the shadow of division or virtue signaling (rather than actual virtue), Faucism, etc.

Look for more additions and updates in the next version release on my Facebook wall <https://facebook.com/rion.kati> or fotonicBeauty.com (fotonicbeauty.com)

PART C: Supportive Discourse & Outro

SO! How did you like the Uniϕied Theory Tenets as an outlook on major themes? Good fruit for contemplation? Mhmmhmm..

Now that we've covered the official aspects of Uniϕied Theory itself, I'm just going to flow with some more supportive diatribe (monotribe?) to help you process some things with and around it.

You might be thinking; "Well, wait a minute Rion...I don't get it...where's the PROOF?"

And to that I would reply with;

You see? That is the maddening simplicity of Uniϕied Theory!

It's that each concept on the Uniϕied List in ALL of its own individual history, weight, context and power even exists. Each item on the list is EMPIRICAL to those who have experienced it or signs of it.

Now; add them all up together and compare it to the LIMITATIONS of scientific interpretation that largely believes in 'one physical reality' (even though that in itself has particle physics and invisible spectrums of frequencies mostly based from the sun). Newtonian scientists themselves are often baffled at quantum mechanics and how weird it gets.

Would any of the Uniphied list even exist or be possible if we just lived in a molecular terrestrial world of landmass and water body interactions?

Or on a barren, spiritless planet?

Even fast forward and yeah, modern science can explain a lot >>> of the astro-bio physical world!

(And this is part of your research to also discover where psychology and sociology itself just cannot answer and bridge the gaps to 'spirit').

Add each of these self-evident-proof-of-spirit phenomena all up together as a uniphied theory and it is for you to explore if there is simply a multi-dimensional sentience to which covers and answers their existence OR not.

UT says that not just 'some' of it is possible, but if there is a multi-dimensional sentience (and contemplate the true weight of everything on the list); they must ALL exist...and that SPIRIT (and the true nature of consciousness) must absolutely must be real.

Reincarnation? Death? Transitional states of consciousness/sentience. That alone could alleviate a lot of pressure for many people around death. Melt into the Love that connects us all? YES....HOWEVER, karma and hell are ALSO implicated (oh shit then!...).

"Whoah Doc, this is some heavy stuff.." -Marty, Back to the Future

Earlier I mentioned about the Unified List that if one is possible, UT proposes that it is proof of any and all of them.

Again; this may take further research and discernment on your part to confirm.

Many skeptics and scientists have tried to explain away such things prayer, laying on of hands, psychic phenomena, etc. It's easier to be a skeptic when you see the distortion of some people getting in to control or influence things like spirituality becoming 'commercialized' in ways or 1-900 psychic lines or 1-900-TVPreacher-Donations that become their own meme, 'fallen evangelists' or snake-oil salesmen, alien conspiracies, etc.

Even just homeopathy and vibrational medicine or 'people want to hear what they want to hear'. Just because you couldn't guess exactly what someone was thinking in junior high with a friend when you tried to do mental telepathy with each other doesn't actually make any else that is empirical as falsifiable.

Actually, there are all kinds of things you can psychically read accurately (when trained) that are VERIFIABLE (I've done thousands of these individual, accurate notes over the years without people telling me)...telepathy itself (or the non-performance 'mentalism') is its own form of psychic gift and not everyone has it.

So look to the examples where things HAVE happened to you or someone else or maybe other possibilities of something - like experiments with telekinesis (as there are documentations of it without show pony trickery).

Even the concept of the European man ('Braco') who simply gazes ('siddhic gazing' I would call it) from Universal Love to an audience and the healing it does. Such a thing cannot be explained by physicists and all cues in to further proof of the Singularity itself (including our spiritual ability to influence each OTHER epigenetically which photonic Beauty will delve into more...HEALING and awakening levels of essenced allure and charisma).

So; based on where you are at (and if you even desire to), I just encourage you to see through any distortion amidst the psychic and spiritual to a deeper truth. Could someone actually be epigenetically AFFECTED by a tele-evangelist on an 80's tv screen that it made an energetic shift in their life and healed something?

How about a Catholic church miracle in Peru confirmed even just once? Wouldn't that point as another breadcrumb back to proof of Source itself?...to the same meta-sentience as existing?

There are always deeper and more implicated layers to go in your contemplation and gnosis of 'reality' (esp. when you consider how CONNECTED everything is and must be and how it can activate entirely new dimensions of Love and Veneration in you; or maybe Honor and Sacrifice for a greater cause).

Just contemplating the true nature of consciousness itself and that it could be within us all; God seeing itself in everything alone is colossal to comprehend! How truly beautiful.

So back to the previous point;

You want to be critical but from an understanding of the weight of both realities comparatively;

Are all of these psychic, religious and spiritual phenomena just entirely 'weird', 'odd' and 'out there' 'woo woo' BUNK even though MOST of the world is into at least some of them?

Are they ruled out because A2B science cannot explain them properly or will dismiss them in all kinds of ways (including religion largely as a form of political power, or astral travel as a brain state or 'conspiracies', etc.)

Look at HOW MANY things Science from A-B reality that are on the list that CANNOT be explained agnostically.

This isn't just some of the weaker items that can ineffectively be explained away by science such as 'ghost story conspiracies' or viewed as the Mortal Kombat preacher memes (although it can be funny Barney Fife)...just contemplate the EMPIRICAL power of list itself and HOW all of it is possible!?

Your contemplation of the Unified List itself and the fact that any of these concepts exist at all in relation to A-B biological reality (which can't answer them) and in relation to the concept that there is a multi-dimensional Singularity IS the prime point.

These aren't dozens of fractured, disparate things anymore; they're all instead pointing to perhaps the only thing that can explain ALL of it...

In other words, the more that you contemplate that ANY of these are even real (and taken seriously in the world) points to the possibility or truth that all of the other ones MUST also be true. Saying just that 'God exists' doesn't quite cover it comprehensively to many, however 'UT' suggests it is because it is a multi-dimensional SENTIENCE (as a Singularity Matrix of Spirit also known as 'God') - that because of that, then...are they all not possible?

This could be a scientist's worst nightmare! Quantum physics can't even address most of this list!

Oh - and under this Theory; atheists themselves no matter their disbelief or token 'exemption' would still absolutely be part of the Spirit matrix.

How much longer than they continue denying all of these exist especially when there are countless stories of EXPERIENCES related to all of these that don't fit in their reality or explanation?!

Part of your contemplation might be into Biblical scripture or even religious archaeology or Tibetan Buddhism and yet no matter how deep you go into anything on the meta unified list; you still have the opportunity to question it versus biological limitations.

See; one subject on the list on its own might not hold weight and can more easily be cast off from scientific perspective; yet when EVERYTHING can arguably be addressed as possible BECAUSE of a multi-dimensional sentience? (Take that, Bembridge scholars!)

I would personally say to many scientists that when spiritual reality IS empirical to so many people - that you cannot prove that all of this is falsifiable; you're only viewing it through a bio-scientific lens, but that is for you the reader to discover on YOUR own.

UT is extremely powerful because it takes the FULL WEIGHT of anything that is on the list - say, 'Judaism', 'Gospel', 'Bhagavad Ghita', 'The Power of Prayer', 'The Holy Spirit', 'Angels' or 'Vibrational Medicine' and it takes ALL of ITS exist-ant value under the meta-concept itself as (theoretical) proof of a Singularity.

Are we really just making shit up because of our existential fear? Or is there really something going on with all of this rich spiritual history and phenomena?

I, myself (me, myself and Irene) have been in Christian tabernacle 'revivals' as a teen where you could FEEL the 'holy spirit' like energy (chi).

A few other add-ons...

UT also says that religions and indigenous lineages of deities, etc. are all simply fractals WITHIN the God-Spirit matrix thereby removing a lot of confusion or fracture itself amongst different lines (ie. Protestantism vs. New Age Spirituality vs. Mormonism).

UT also unifies in that 'energy work' and 'chi' are ESSENTIALLY working with the same source energy that Christians are connected to in 'holy spirit revival' and yet it is naturalistic fracture and dogma that further divides understanding itself. Speaking a light language is parallel to 'speaking in tongues' which is an ancient Biblical phenomenon (just with or without any religious fractal influence); it's still the SAME meta-source.

This is heretical because a lot of things that are outlawed, shamed or secularized outside of individual (say, religious) fractals and their values or guidelines (for example; conscious sexuality, archetypes and energy work); from the 'Unified Theory' lens, says that we are still connected and working with the same SOURCE energy.

UT also respects that there WOULD be different fractal understandings around spirit which would evolve anthropomorphically in mix with the divine connection. This isn't to devalue any of them; in fact, UT respects all of them...it simply unifies all of their meaning, weight, history and power (in all dimensions) under the concept as PROOF of Singularity.

Again; different religious or spiritual lines are simply coming from a different fractal perspective from within the exact same God-Spirit matrix; hence, everything is more unified than it ever seemed (and that can be a lot to digest!).

This may become easier to see the more that you contemplate it all (and that really; nothing sentient can exist 'outside of it').

How much love IS there when you get past the personalized, egoic construct of it and into your Heart and then surrendered more into the Heart of The Beloved and Spirit itself?!

All that is?! Awakening to the siddhic, enlightened nature of our divine reality and truth? And yet...

That's also why there is Dark and 'evil' so to speak (and I differentiate between Dark and shadow elsewhere btw); because it would still have to be connected to the same SINGULARITY of meta-sentience. Keep in mind that there's a lot more that cues into the possibility of a Singularity in that list (*moreso than just spiritual or religious lines*).

So look for future updates and feel free to contribute something that I may or may not include as curator (see previous disclaimers in prologue).

Now; I'm going to just further review some of our coverage to help you with your thought-flow and contemplation, ok?

(Some of it may seem a bit redundant, but actually I don't think you'll mind because it will help to stoke your fire or at least 'poke you mind').

If the Singularity does exist, then good news is that there would also be essenced fractal aspects of enlightened, purified consciousness and light-vibrational radiation itself that would be possible that wouldn't make ANY sense at all to A-B physicists.

Again; my Theory of photonic Quanta (aka 'PhQ') will go more into this on the site, my FB profile and Sexy Chi.

The more that Physicists, Biologists, Western Doctors and other Scientists cannot answer anything on the list (even delving into quantum physics a bit I couldn't match many things), UT proposes this as self-evidence and insight for proof that it does exist especially through empirical experience in the lives of millions.

Note; The Akashic Records (in ways) and other concepts have more to do with my/Rion's actual work than it may seem...some things really cross-over and will be talked about more in the future.

PhBeauty is HOTTT!

Many fractal lines (ie. Catholicism, priestess lines, essenes, Merlin, Taoism, Norse sorcerers, etc.) have believed in some things but not in

others, yet UT actually challenges them to consider and possibly accept that if one of them is true, then all of them must be true (and this is in the understanding that of course there would be different lineages as well as distortions or misuse of spiritual truths - which is also why astral hijacking and black magic is included).

One of the main contemplation points for you to keep coming across critically is that UT says that there is a unified 'breath of life' Spirit with and through ALL sentience (at least on earth and easily arguably throughout all galaxies).

UT theory highlights that anything on the Unified List isn't really possible or properly explainable in the limited, scientific 'one-dimensional' reality of biology and Newtonian physics. You may want to do extended research into that and you may also start seeing their limitations where they just can't 'leap into the faith' part and view it psychologically, etc.)

If you're here for the exciting Photonic Beauty evolution;

Charisma and allure (as WE know it and how we can FEEL the presence of someone in our own gut when they enter a room) literally cannot exist from a purely biological perspective; really nothing beyond physical beauty would exist other than being filtered and limited as 'adaptive genetic traits' or 'survival of the fittest', yet really A-B cannot explain or fathom Beauty, Spirit or Consciousness itself.

With A-B reality (a favorite of atheists), all biological life is merely mortal and dies; 'ashes to ashes, dust to dust' so to speak. They're missing the return to spirit part.

UT says that all evolved animal life is SOUL based (as fractals of the Spirit-matrix); thereby fully mortal and yet spirit-connected (and to different degrees and dimensions of awareness as some species and souls are more spiritually evolved than others).

AB aligns with most spiritual and religious wisdom in that humans literally are souls (many to most of them immortal or at least able to reincarnate) that are in a temporary vessel of a physical body; both fully divine and fully human.

Even though Rion is more of a cat lover; UT says that all dogs would go to heaven in the sense that there are cycles of rebirth as the soul-spirit energy recycles as well as the concept of animal spirits evolving up the spiritual gradient of consciousness.

There is also beautiful inter-weaving that can be seen such as 'the circle of life' and how the intelligence morphologically helps different species to adapt and survive. The wonder itself of the 'Animal Kingdom' is not merely biological; it is both fully biological AND filled with the sentience of Spirit at localized levels...endless wonder and fascination abounds!

We're also connected to all ANCESTORS in Presence?! Well, yeah....And there are methods and...yes.

Ok, so let's wrap it up for v1.0 and welcome to Unified Theory in the world!

Ok...this covers some pretty profound and implicated concepts right? Life, Death, Spirit, Reality, Beauty, Truth, Mysticism, Love, Enlightenment, etc.

So with that said; with all the implications involved, there is potentially an in-phi-nite (ϕ !) amount for you to unpack, cross-reference and meditate with based on your past experience and discoveries working with UT.

Use it as you will with a powerful thought exercise (or a spiritual resource itself!). It may challenge or enhance your current beliefs. Again you can check for any updates on fotonicbeauty.com and if you want to share or discuss it publicly, just reference the entire Prologue above.

I'd like to think that UT would stand alone as its own legacy line...who knows where it will go from here as we get more collective interplay.

I'm excited to get this out to you and the world AND yet now move immediately back into the larger project scope of Φ otonic Quanta Theory and ϕ otonic Beauty (of which UT is a core foundational piece of)!

Feel free to share your questions, testimonials, feedback and UT with the world!

-Rion Kati

6.26.23

p.s. You might be wondering, how could I come up with a Theory that is so uniphied?

Well...remember, most of this already exists as known spiritual, psychic and religious truth for millennia. I've been on an experiential spiritual path for around 21 years and I also mixed the 'Who is God?' Powerliminal which youtube took down. That secret resource is what I called the 'Chairbender' resource; so my work with that (and bending 2 steel-backed chairs in stillness) as well as being a 5/1 with a gift for universal definitely had a role in this.

I have also studied from different spiritual masters, guides/teachers as well as immersed with the ones more relevant to my dharma itself. My greatest teacher is Muse Herself. I hope you can use this resource well and I'm sure that like you; I just will CONTINUE seeking the TRUTH including a higher TRUTH about Reality as well as Beauty!

-Rion (*again*)
